**Quotationary - The A-Z Book of Quotations** Nasser Amiri,2024-06-27 Compiled over many years by Nasser Amiri, this is by far the most comprehensive collection ever compiled of carefully selected quotations from the world's great philosophers, writers, historians, musicians and thinkers. Quotationary is a source of inspiration for every writer, book-lover and thinker. It contains the thoughts of many of the finest minds since ancient man started to express his wit and wisdom in aphoristic form. **Engineering the Revolution** Ken Alder,2010-04-15 Engineering the Revolution documents the forging of a new relationship between technology and politics in Revolutionary France, and the inauguration of a distinctively modern form of the "technological life." Here, Ken Alder rewrites the history of the eighteenth century as the total history of one particular artifact—the gun—by offering a novel and historical account of how material artifacts emerge as the outcome of political struggle. By expanding the "political" to include conflict over material objects, this volume rethinks the nature of engineering rationality, the origins of mass production, the rise of meritocracy, and our interpretation of the Enlightenment and the French Revolution.

*Fear and Trembling* Søren Kierkegaard, 2024-09-06 Faithful to the original Danish text and eminently readable, Jech's translation of *Fear and Trembling* admirably communicates the literary qualities of Kierkegaard's text, as well as his occasional fits of inspiration. Jech displays an unusual sensitivity not only to the literary/linguistic qualities of Kierkegaard's prose, but also to his (often realized) aspirations to philosophical precision. As presented by Jech, Kierkegaard is not simply a gifted writer and speculative theologian dabbling in philosophy, but a philosopher concerned to limn the optimal role of philosophical reflection, and to do so experimentally, especially with respect to matters of morality and faith. The translation is furthermore supplemented by very helpful explanatory notes that convey Kierkegaard's own erudition and the multiple influences upon his thinking. The Historical Glossary will become a valuable reference tool for students and scholars of Kierkegaard's writings. It is likely to play a welcome role in encouraging an improved understanding of what Kierkegaard means when he employs his idiosyncratic categories, allusions, and vocabulary. —Daniel Conway, Professor of Philosophy and Humanities, Texas A&M University

*Screen borders* Michael Gott, 2023-05-23 Film and television offer important insights into social outlooks on borders in France and Europe more generally. This book undertakes a visual cultural history of contemporary borders through a film and television tour. It traces on-screen borders from the Gare du Nord train station in Paris to Calais, London, Lampedusa and Lapland. It contends that different types of mobilities and immobilities (refugees, urban commuters, workers in a post-

industrial landscape) and vantage points (from borderland forests, ports, train stations, airports, refugee centers) are all part of a complex French and European border narrative. It covers a wide range of examples, from popular films and TV series to auteur fiction and documentaries by well-known directors from across Europe and beyond.

**Human Rights Education** Sarita Cargas, 2019-12-20 In tracing the origins of the modern human-rights movement, historians typically point to two periods: the 1940s, in which decade the Universal Declaration of Human Rights (UDHR) was ratified by the United Nations General Assembly; and the 1970s, during which numerous human rights nongovernmental organizations (NGOs), most notably Amnesty International and Médecins Sans Frontières, came into existence. It was also in the 1970s, Sarita Cargas observes, when the first classes in international human rights began to be taught in law schools and university political science departments in the United States. Cargas argues that the time has come for human rights to be acknowledged as an academic discipline. She notes that human rights has proven to be a relevant field to scholars and students in political science and international relations and law for over half a century. It has become of interest to anthropology, history, sociology, and religious studies, as well as a requirement even in social work and education programs. However, despite its interdisciplinary nature, Cargas demonstrates that human rights meets the criteria that define an academic discipline in that it possesses a canon of literature, a shared set of concerns, a community of scholars, and a methodology. In an analysis of human rights curricula in Australia, Canada, the United Kingdom, and the United States, Cargas identifies an informal consensus on the epistemological foundations of human rights, including familiarity with human rights law; knowledge of major actors including the United Nations, governments, NGOs, and multinational corporations; and, most crucially, awareness and advocacy of the rights and freedoms detailed in the articles of the UDHR. The second half of the book offers practical recommendations for creating a human rights major or designing courses at the university level in the United States.
