

Regiones Geograficas De Argentina

Alberto A. Dassis

Las regiones geográficas en México Claude Bataillon, 1993 Un estudio económico de las regiones geográficas presupone el estudio de la población consumidora: producción y consumo necesitan que se establezcan relaciones de comercio, de información, de inversión, las cuales se localizan en lugares precisos. El autor hace una lectura crítica de los trabajos consagrados a la cuestión y trata de entresacar de ellos, así como de una observación directa, lo que significan las regiones y la vida de relación que se organiza en su interior.

Professor Joan Vilà Valentí Juan Vilá Valentí, 1999 El presente volumen recoge un total de 115 artículos, recopilados con motivo del homenaje al Dr. Joan Vilà Valentí, i que se dividen en tres apartados: uno dedicado a glosar la trayectoria académica y científica del Dr. Vilà, otro sobre pensamiento geográfico y el último sobre trabajos de geografía regional.

The Geography of South America Thomas A. Rumney, 2013-04-18 South America is an area of fascination and study for geographers and other scholars from around the world, and its land and people have played important roles in the discovery and distribution of civilizations, resources, and nations for millennia. The region has long stimulated a large amount of research across the many subdisciplines of geography, and Thomas A. Rumney collects, organizes, and presents as many scholarly publications as possible in *The Geography of South America: A Scholarly Guide and Bibliography*. Every South American nation is included: Argentina, Bolivia, Brazil, Chile, Colombia, Ecuador, French Guiana, Guyana, Paraguay, Peru, Surinam, Uruguay, and Venezuela. Beginning with an overview of the region as a whole, successive chapters, one per nation, are divided by specific subdisciplines of geography: cultural, social, economic, historical, physical and environmental, political, and urban. Each section is then divided by document type: atlases, books, book chapters, articles from scholarly journals, master's theses, and doctoral dissertations. Although the majority of entries focus on English-language works, selected entries written in Spanish, French, German, and other languages are also included (with the entry titles translated into English and noted accordingly).

Territorio, capital, sociedades y desigualdades en américa latina Fernando Negret Fernandez,2024-05-24 Este libro es resultado de una investigación sobre aspectos de la historia y la actualidad de América Latina y particularmente de los seis países analizados, los cuales constituyen las economías más desarrolladas. Ocupan 79,17% del territorio latinoamericano, representan 74,85% del total de los habitantes de la región y contienen 82,24% del PIB regional. La historia de la conquista y de la estructuración de la producción con base en las haciendas y las minas en la colonia fueron situaciones de explotación humana violenta y ambientalmente depredadora. La formación de los seis Estados Nacionales fue caótica y desordenada por la inexperiencia en la administración pública de esos inmensos territorios, sobre los cuales las clases dominantes mantuvieron y ampliaron la propiedad de la tierra después de la independencia. La situación actual muestra grandes desigualdades sociales y deficiencias en servicios básicos y equipamientos sociales, no obstante los esfuerzos realizados por algunos gobiernos progresistas en esos países. El empleo, especialmente para los jóvenes y mujeres es un desafío, es muy alta la informalidad laboral, los salarios son bajos, sin seguridad social y en condiciones deficientes para desarrollar las actividades propias del trabajo. En las grandes empresas los salarios son altamente desiguales, lo que muestra que el capital privado determina las desigualdades sociales, tanto por la concentración de sus capitales privados, bien como por la estructura estratificada de los salarios de sus trabajadores y funcionarios. Los principales grupos económicos de América Latina son, predominantemente, comerciantes y vendedores de servicios, muchos de capital extranjero, lo que demuestra que son poco productivos, y por tanto, poco contribuyen para la generación de valor y a la riqueza latinoamericana. Por el contrario, estos grupos de comerciantes substraen el valor generado en la producción nacional, mediante la venta de sus productos importados y la intermediación en las ventas de los propios productos nacionales en sus almacenes y exportan sus ganancias obtenidas con la especulación de los precios.
