Social Technologies for Inclusive Development: Multilevel Policy and Practices Kleinsy Bonilla, Susana Arrechea, Luis Guillermo Velásquez Pérez, Efraín Bámaca-López, 2025-05-15 Social technologies fostering inclusion represent a contemporary research paradigm that has resurfaced. Broader discussions aim to expand the scope of science, technology, and innovation beyond purely economic considerations into the social domain. Hernán Thomas suggests that innovative solutions encompass a broad spectrum of approaches for conceiving, constructing, implementing, and overseeing technological interventions tailored to address pressing social and environmental challenges. These solutions strive to stimulate the emergence of socially inclusive and sustainable economic dynamics in various areas, including nutrition, housing, energy, clean water access, transportation, and communication. This multifaceted approach reflects a commitment to harnessing technology's potential for the betterment of society at large. This Research Topic focuses on showcasing experiences, strategies, and policies in science, technology, and innovation, primarily in the context of Latin America. Such experiences, strategies, and policies aim to reduce social disparities and stimulate development. This article collection welcomes multifaceted approaches, including comparative analysis, policy evaluations, community case studies, and more. Additionally, it engages with theoretical discussions on the influence of scientific and technological paradigms on public management, examining how these paradigms shape policy design, implementation, and technology integration. Furthermore, this Research Topic aims to explore recent technological advancements, particularly in the realms of digital transformation and data-driven decision-making, as tools to forge new avenues for social inclusivity. By delving into these innovations, the collection aims to facilitate knowledge on innovative solutions, improve governance practices, and foster greater citizen involvement. Overall, this research initiative aims to contribute to the burgeoning literature on social technologies for social inclusion. It will critically assess the strengths and limitations of multilevel interventions, offering paradigmatic case studies and pinpointing unexplored opportunities within this field, thereby advancing our understanding and enhancing discourse in this critical area of study. The scope of this Research Topic revolves around the burgeoning field of social technologies and their nascent integration with public management and community engagement, specifically focusing on Latin America. We welcome a diverse range of manuscript types, including original research articles, reviews, case studies, policy analyses, and theoretical perspectives. We aim to assemble a comprehensive collection of insights and

experiences that shed light on the evolving landscape of social technology in Latin America and its implications for addressing contemporary global challenges. We invite contributions that delve into this dynamic intersection (social technologies and public management in Latin America), exploring themes such as innovative approaches to social technology adoption, the impact of digital transformation on local communities, practical strategies for fostering inclusive development, and the role of scientific diasporas in advancing these initiatives. Subtopics include, but are not limited to, the following: • community-developed technologies • data production and data access • social technologies and health solutions • digital transformations • social technologies and inclusive development • the use of research metrics or analytics to understand social trends and networks in research • social technologies and climate change • nutrition and food security • gender perspectives in social technologies • Indigenous knowledge and social technologies for cultural survival • crisis management (COVID-19) • community resilience • science communication • education and digital inclusion • youth engagement and empowerment • urbanization and smart cities • human mobility and social mobility, including the use of metrics/indicators to look at researcher and scholarly mobility • social entrepreneurship • governance and policy implementation, using actionable research metrics and analytics in policy creation and decision making. collapse

Second International Handbook of Urban Education William T. Pink, George W. Noblit, 2017-01-06 This second handbook offers all new content in which readers will find a thoughtful and measured interrogation of significant contemporary thinking and practice in urban education. Each chapter reflects contemporary cutting-edge issues in urban education as defined by their local context. One important theme that runs throughout this handbook is how urban is defined, and under what conditions the marginalized are served by the schools they attend. Schooling continues to hold a special place both as a means to achieve social mobility and as a mechanism for supporting the economy of nations. This second handbook focuses on factors such as social stratification, segmentation, segregation, racialization, urbanization, class formation and maintenance, and patriarchy. The central concern is to explore how equity plays out for those traditionally marginalized in urban schools in different locations around the globe. Researchers will find an analysis framework that will make the current practice and outcomes of urban education, and their alternatives, more transparent, and in turn this will lead to solutions that can help improve the life-options for students historically underserved by urban schools.

Social Studies Education in Latin America Sebastián Plá, E. Wayne Ross, 2022-08-30 This book offers a path forward, for the growing collaboration in social studies education between Global North and South educators, practitioners, and researchers. In this volume, leading critical social studies education researchers from Latin America explore the constant presence of colonialism, capitalism, patriarchy, and state violence. Chapter contributors represent a large part of the continent and offer perspectives on a wide range of topics, including recent history and memory, cultural dimensions of social studies education, and comparative studies among Latin American countries. By bringing together this critical work in

one volume, the book fosters conversation across geographic regions to transcend the national contexts for which these analyses are generally produced. This collection provides insights into issues of curriculum, teaching, teacher education, and research in the region and will be of interest to readers both familiar with and new to research on social studies, history, citizenship, and geography education in Latin America.

Licenciatura em Educação do Campo: Diálogo Intercultural com Povos e Comunidades Tradicionais Alessandra Reinholz Velten, 2023-03-29
Licenciatura em Educação do Campo: diálogo intercultural com povos e comunidades tradicionais provoca a pensar sobre outras pedagogias no ensino superior protagonizado nas vozes dos estudantes da Educação do Campo. Escrito com uma metodologia participativa, denuncia o descaso do atual governo bolsonarista com a educação superior pública e anuncia um projeto de educação contra-hegemônico que possibilita a entrada dos povos e comunidades tradicionais na universidade. Ainda, apresenta os tensionamentos e as resistências contra vozes de outros sujeitos invisibilizados historicamente nos processos educativos, que potencializam culturas e saberes populares na universidade. E desvela a práxis intercultural na formação de professores militantes descrevendo os desafios enfrentados na percepção de superação no processo de construção da auto-organização do curso, trazendo a experiência da pedagogia da alternância no ensino superior. Com isso, estudantes, professores, militantes da Educação do Campo, em especial secretários(as) de Educação, governadores(as) e prefeitos(as), podem conhecer um pouco mais sobre a formação do docente multidisciplinar no curso de licenciatura em Educação do Campo e simultaneamente garantir o conhecimento necessário para o reconhecimento do curso nos editais de seleção de docentes e na batalha em defesa da Educação do Campo.

Pedagogia ubuntuísta: Soraia Lima Ribeiro de Sousa, 2023-08-02 Este livro Pedagogia Ubuntuísta: formação inicial com afrodocência é resultado de pesquisa sobre a formação inicial docente no Brasil com objetivo de analisar os lugares de apropriação dos saberes ubuntu na formação inicial docente, considerando a Educação das Relações Étnico-Raciais (ERER). Para tanto, fundamentada na afrocronicidade e na decolonialidade, desenvolvemos a metodologia da Travessia do SER,

construída a partir da metáfora da barca de Amen-em-ope, alinhada a sociopoética e os estudos com/do/no cotidiano. Problematicamos a epistemologia, as ciências e a formação docente hegemônica que vem sendo consubstanciada no Brasil, ao promovermos uma discussão acerca de saberes decoloniais e afrocentrados, a partir da filosofia africana do ubuntu. Queremos olhar e perceber o mundo com outros e múltiplos olhares que não sejam apenas a visão eurocêntrica, ocidental, branca, cristã, cis, masculina, que muitas vezes foi/é tida como referência única de ser/estar no mundo.

A Escrita de Casos como Ferramenta de Ensino e de Gestão do Conhecimento - Aspectos Teóricos e Práticos para a Construção de Casos em Direito Alessandra de Souza Santos, 2021-09-06 O Método de Casos, metodologia pedagógica difundida para o ensino da Administração e do Direito, tem potencial uso organizacional como ferramenta de gestão de conhecimento e aprendizagem organizacional, por meio da documentação de experiências e práticas relevantes. O projeto deste livro surgiu da necessidade de se abordar com maior detalhamento a escrita e a construção de casos próprios de uma organização, levando-se em conta que há pouca disponibilidade de materiais a respeito do tema em português, principalmente na área do Direito. A possibilidade de aplicação do Método de Casos para a formação, o treinamento e o

aprimoramento profissionais, por meio da valorização da coleta e curadoria dos conhecimentos e das experiências pessoais gerados na e pela atuação profissional, fez surgir este livro. Dessa forma, busca-se preencher essa lacuna de como se dá a construção e escrita de casos e apontar o seu uso pedagógico para emprego organizacional nos setores público e privado. O presente manual buscou oferecer um panorama amplo para o Método de Casos, passando pelo seu potencial uso como ferramenta de Gestão de Conhecimento, o seu uso pedagógico na formação, capacitação e aperfeiçoamento no serviço público, além de abordar os principais aspectos da construção e escrita de casos, principalmente na área do Direito.

Medievalismo: A Idade Média nos Imaginários Moderno e Contemporâneo Lorena da Silva Vargas, 2022-01-31 O que foi a Idade Média? Temos acompanhado, nas últimas décadas, a forte contribuição das mídias na construção e na difusão de um imaginário sobre aquele período histórico que ressurge, predominantemente à parte de contextualização, em discursos,

memes e revistas. Em um âmbito internacional, a imagem contemporaneamente criada do medievo aparece também em jogos, filmes, livros e séries de amplo consumo, imagem que se adere à cultura e passa a compor a memória histórica. Acompanhando tais manifestações do passado no tempo presente, pesquisas científicas e grupos de estudos vêm se dedicando cada vez mais a esse debate. O termo medievalismo, assim, pode ser definido como a Idade Média fora da Idade Média, construída a partir dos imaginários das sociedades moderna e contemporânea. Diante disso, esta coletânea, a cargo de historiadores de diversas instituições de ensino superior do Brasil e da Espanha, propõe discutir de forma crítica e aberta ao público extra-acadêmico acerca dos medievalismos e neomedievalismos, compreendendo suas formas, usos e propósitos político-culturais nas diversas partes do mundo nos últimos séculos.
