The Telling and the Tale: an Introductory Guide to Short, Creative Prose ,

*Good Bones and Simple Murders* Margaret Atwood, 2011-06-08 In this collection of short works that defy easy categorization, Margaret Atwood displays, in condensed and crystallized form, the trademark wit and virtuosity of her best-selling novels, brilliant stories, and insightful poetry. Among the jewels gathered here are Gertrude offering Hamlet a piece of her mind, the real truth about the Little Red Hen, a reincarnated bat explaining how Bram Stoker got Dracula all wrong, and the five methods of making a man (such as the Traditional Method: Take some dust off the ground. Form. Breathe into the nostrils the breath of life. Simple, but effective!) There are parables, monologues, prose poems, condensed science fiction, reconfigured fairy tales, and other miniature masterpieces--punctuated with charming illustrations by the author. A must for her fans, and a wonderful gift for all who savor the art of exquisite prose, *Good Bones And Simple Murders* marks the first time these writings have been available in a trade edition in the United States.

My Life as a Bat [short Story] Margaret Atwood, 1939

*Are You a Machine?* Eliezer J. Sternberg, 2023-12-05 Right now, someone in an artificial intelligence lab is fusing silicon circuitry in an attempt to engineer the human mind. In a hospital, a neurosurgeon is attempting to influence a patient's emotions by firing electrical impulses into his brain. In a classroom, a teacher is explaining how neurons in the brain interact to generate thoughts, feelings, and decisions. The question of where consciousness comes from and how it works is likely the greatest mystery we face. Despite progress in our knowledge of the brain, we still don't know how it allows us to do things like enjoy a sunset, solve a math problem, or use our imagination. For those of us who have ever thought about issues of the mind or free will, these developments pose provocative questions. What would happen if those mysterious processes could be understood? Would a scientist be able to know everything about our minds just from studying the systems in our brains? Could he predict how we will think and act? After all, the brain is an organ just like the heart or stomach, and scientists can figure out when the heart will beat and when the stomach will release bile. If such a thing could be accomplished, would that make me a machine? There are those who approach this question from a technological perspective. Someday, an engineer might be able to build a robot with my memories, opinions, and behavior. Would that make me a machine? This concise, lucid

primer on neuroscience and philosophy of mind takes the reader to the very depths of the mystery of consciousness, exploring it through the eyes of key philosophers, neuroscientists, and technologists. Avoiding jargon and oversimplification, author Eliezer J. Sternberg illuminates baffling questions of the brain, mind, and what it means to be human.

**In Our Nature** Donna Seaman, 2002 Fourteen unforgettable short stories provoke, illuminate, and startle as they explore our perception of nature and the conflict between wildness and civilization within each of us. As we are recognizing the consequences of the destruction of forests and wetlands, the pillaging of the seas, and the toxicity of industry, we are experiencing profound uncertainty about our relationship with the earth. These stellar short stories by writers such as Barry Lopez, Rick Bass, Margaret Atwood, E. L. Doctorow, Chris Offutt, and others plumb the mystery--as only fiction can--of nature within us and the world of nature that surrounds us. We are nature, in spite of our machines, our plastics, and our artificial ingredients. Yet what do we make of our own nature? Our own wildness? And how do we explain the paradox of our urge to both exploit and protect wilderness? From E. L. Doctorow's shattering tale, *Willi*, in which a young boy witnesses adults transformed into animals by the frenzy of sexual lust, to Rick Bass's *Swamp Boy*, whose young hero is hounded by a pack of boys incensed by his solitary communion with the wild, to Margaret Atwood's wickedly funny story, *My Life as a Bat*, or Kent Meyers's soulful ballad of love regained, *The Heart of the Sky*, these memorable stories articulate our deep need for wilderness and the indelible role nature plays in our psychological and spiritual well-being.

**The Communicative Mind** Line Brandt, 2013-11-04 Integrating research in linguistics, philosophy, semiotics, neurophenomenology, and literary studies, *The Communicative Mind* presents a thought-provoking and multifaceted investigation into linguistic meaning construction. It explores the various ways in which the intersubjectivity of communicating interactants manifests itself in language structure and use and argues for the indispensability of dialogue as a semantic resource in cognition. The view of the mind as highly conditioned by the domain of interpersonal communication is supported by an extensive range of empirical linguistic data from fiction, poetry and written and spoken everyday language, including rhetorically "creative" metaphors and metonymies. The author introduces Cognitive Linguistics to the notion of enunciation, which refers to the situated act of language use, and demonstrates the centrality of subjectivity and turn-taking interaction in natural semantics. The theoretical framework presented takes contextual relevance, viewpoint shifts, dynamicity, and the introduction into discourse of elements with no real-world counterparts (subjective motion, fictivity and other forms of non-actuality) to be vital components in the construction of meaning. The book engages the reader in critical discussions of cognitive-linguistic approaches to semantic construal and addresses the philosophical implications of the identified strengths and limitations. Among the theoretical advances in what Brandt refers to as the cognitive humanities is Fauconnier and Turner's theory of conceptual integration of "mental spaces" which has proved widely influential in Cognitive Poetics and Linguistics, offering a philosophy of language bridging the gap between pragmatics and

semantics. With its constructive criticism of the “general mechanism” hypothesis, according to which “blending” can explain everything from the origin of language to binding in perception, Brandt’s book brings the scope and applicability of Conceptual Integration Theory into the arena of scientific debate. The book contains five main chapters entitled Enunciation: Aspects of Subjectivity in Meaning Construction, The Subjective Conceptualizer: Non-actuality in Construal, Conceptual Integration in Semiotic Meaning Construction, Meaning Construction in Literary Text, and Effects of Poetic Enunciation: Seven Types of Iconicity.

**Animals, Empathy, and Anthropomorphism** Carlo Salzani, 2025-05-05 This open access book explores the role of imagination in animal ethics and its constitutive links to empathy/sympathy and anthropomorphism. The book argues for the constitutive role of imagination in ethical deliberation, but acknowledges that there exist important limits to its use. However, “limit” is here understood not merely negatively as restriction and insufficiency, but rather positively as “condition of possibility,” so what the book explores and analyses are the conditions for a positive and fruitful use of the imagination in ethics. The book uses as a “frame” the questions and issues raised in J.M. Coetzee’s *The Lives of Animals* to explore some central and salient themes.

**Margaret Atwood** Shannon Hengen, Ashley Thomson, 2007-05-22 Authors Shannon Hengen and Ashley Thomson have assembled a reference guide that covers all of the works written by the acclaimed Canadian author Margaret Atwood since 1988, including her novels *Cat’s Eye*, *The Robber Bride*, *Alias Grace*, and the 2000 Booker Prize winner, *The Blind Assassin*. Rather than just including Atwood’s books, this guide includes all of Atwood’s works, including articles, short stories, letters, and individual poetry. Adaptations of Atwood’s works are also included, as are some of her more public quotations. Secondary entries (i.e. interviews, scholarly resources, and reviews) are first sorted by type, and then arranged alphabetically by author, to allow greater ease of navigation. The individual chapters are organized chronologically, with each subdivided into seven categories: Atwood’s Works, Adaptations, Quotations, Interviews, Scholarly Resources, Reviews of Atwood’s Works, and Reviews of Adaptations of Atwood’s Works. The book also includes a chapter entitled Atwood on the Web, as well as extensive author and subject indexes. This new bibliography significantly enhances access to Atwood material, a feature that will be welcomed by university, public, and school librarians. *Margaret Atwood: A Reference Guide 1988-2005* will appeal not only to Atwood scholars, but to students and fans of one of Canada’s greatest writers.

**Margaret Atwood’s fairy-tale sexual politics** Sharon Rose Wilson, 1993

**Vegetarianism and Science Fiction** Joshua Bulleid, 2023-10-06 *Vegetarianism and Science Fiction: A History of Utopian Animal Ethics* examines how vegetarian ideals promoted within science fiction and utopian literature have had a real-world impact on the awareness and spread of vegetarianism and animal advocacy, as well as how the genres’ engagements have been altered to reflect changes in ethical and environmental philosophy. Author Joshua Bulleid examines

the representation of vegetarianism in the works of major science fiction authors, including Mary Shelley, H. G. Wells, Arthur C. Clarke, Philip K. Dick, Ursula K. Le Guin, Ernest Callenbach, Marge Piercy, Octavia E. Butler, Kim Stanley Robinson and Margaret Atwood within their evolving social contexts, tracing the development of vegetarian trends and their science fictional representations from the early-nineteenth century to the present day.

Adventures of the Spirit Phyllis Sternberg Perrakis,2007 In *Adventures of the Spirit*, Phyllis Sternberg Perrakis brings together eleven American and Canadian literary gerontologists to examine a new kind of adventure for the older woman in literature. This volume of critical essays analyzes recent works by contemporary women writers whose characters' midlife and later life changes are mapped in their narratives. Rather than focusing on the painful losses undergone by women of a certain age, recent narratives explore a new kind of adventure of aging, one that is spiritual in nature, enabling new ways of being and becoming, but open-ended and capable of great variation in practice. In particular, these journeys of the spirit focus on the retrospective movement undergone by a midlife or older woman as she is led by inner or outer forces to assess where she has come from and decipher a shape or pattern to her journey. These journeys do not leave the body behind as they map new spiritual territory. Rather they honor spirit's embrace of the natural world and relationships as well as its aspirations for evolving development and eternal existence. The essays in *Adventures of the Spirit* employ a wide variety of critical lenses to chart these adventures, including archetypal, Sufi, post-colonial, and feminist analysis; archival research; aboriginal life writing; and trauma theory. These studies bring a new understanding to women's adventure of age in both literary texts and in life.
