Pathologies of Power Paul Farmer, 2004-11-22 *Pathologies of Power* uses harrowing stories of illness, of life—and death—in extreme situations to interrogate our understanding of human rights. Paul Farmer, a physician and anthropologist with twenty years of experience studying diseases in Haiti, Peru, and Russia, argues that promoting the social and economic rights of the world's poor is the most important human rights struggle of our times. A thoughtful memoir with passionate eyewitness accounts from the prisons of Russia and the beleaguered villages of Haiti and Chiapas, this book links the lived experiences of individual victims to a broader analysis of structural violence. Farmer challenges conventional thinking within human rights circles and exposes the relationships between political and economic injustice, on one hand, and the suffering and illness of the powerless, on the other. Farmer shows that the same social forces that give rise to epidemic diseases such as HIV and tuberculosis also sculpt risk for human rights violations. He illustrates the ways that racism and gender inequality in the United States are mirrored in pathology, plague, disease and death. Yet this doctor's autobiography is far from a hopeless inventory of human suffering. Farmer's disturbing examples are linked to a guarded optimism that new medical and social technologies will develop in tandem with a more informed sense of social justice. Otherwise, he concludes, we will be guilty of managing social inequality rather than addressing structural violence. Farmer's urgent plea to think about human rights in the context of global public health and to consider critical issues of quality and access for the world's poor should be of fundamental concern to pathologists, medical students, and humanitarians in a world characterized by the bizarre proximity of surfeit and suffering.

An Age of Progress? Walter G. Moss, 2008-05-03 'An Age of Progress?' is an advanced examination of major twentieth-century global developments regarding subjects as diverse as violence, capitalism, socialism and communism, imperialism, racism, nationalism, westernization, globalization, international finance, freedom and human rights, physical and mental environmental changes, culture, science, education, religion and social criticism. This momentous study also explores the ways in which the twentieth century made significant progress – and the ways in which it did not.

The Palgrave Handbook of Power, Gender, and Psychology Eileen L. Zurbriggen, Rose Capdevila, 2023-12-28 *The Palgrave Handbook of Power, Gender, and Psychology* takes an intersectional feminist approach to the exploration of psychology and gender through a lens of power. The invisibility of power in psychological research and theorizing has been critiqued by

scholars from many perspectives both within and outside the discipline. This volume addresses that gap. The handbook centers power in the analysis of gender, but does so specifically in relation to psychological theory, research, and praxis. Gathering the work of sixty authors from different geographies, career stages, psychological sub-disciplines, methodologies, and experiences, the handbook showcases creativity in approach, and diversity of perspective. The result is a work featuring a chorus of different voices, including diverse understandings of feminisms and power. Ultimately, the handbook presents a case for the importance of intersectionality and power for any feminist psychological endeavor.

Psychosis Under Discussion Michael Farrell, 2017-11-10 *Psychosis Under Discussion: How We Talk About Madness* examines the ways in which psychosis is discussed by considering the relationship between language and the perception of mental disorder. A wide range of perspectives is discussed – including historical terms, personal accounts, psychiatric terminology, psychoanalysis and later theoretical analyses, advocacy, anti-psychiatry, slang and humour, and media coverage – and each way of discussing psychosis is revealing. For example, psychiatric terminology and related research, in its efforts to understand and clarify can seem distancing, dispassionate, and too sure of its ground, whereas the language of advocacy, while being supportive and sensitive, can also seem euphemistic and evasive. In the discourse of mental disorder, both the content of views and the manner in which they are expressed are influential, making it important to take into account both. *Psychosis Under Discussion* puts these and other important issues under the microscope. International in range, the book's analysis draws on psychiatry, psychology, philosophy, linguistics and history. Written in Michael Farrell's well-known clear and direct style, the book is essential reading for all those interested in understanding mental disorder and the role of language.

Getting Beyond Better Roger L. Martin, Sally Osberg, 2015-09-15 Who drives transformation in society? How do they do it? In this compelling book, strategy guru Roger L. Martin and Skoll Foundation President and CEO Sally R. Osberg describe

how social entrepreneurs target systems that exist in a stable but unjust equilibrium and transform them into entirely new, superior, and sustainable equilibria. All of these leaders--call them disrupters, visionaries, or changemakers--develop, build, and scale their solutions in ways that bring about the truly revolutionary change that makes the world a fairer and better place. The book begins with a probing and useful theory of social entrepreneurship, moving through history to illuminate what it is, how it works, and the nature of its role in modern society. The authors then set out a framework for understanding how successful social entrepreneurs actually go about producing transformative change. There are four key stages: understanding the world; envisioning a new future; building a model for change; and scaling the solution. With both depth and nuance, Martin and Osberg offer rich examples and personal stories and share lessons and tools invaluable to anyone who aspires to drive positive change, whatever the context. *Getting Beyond Better* sets forth a bold new framework, demonstrating how and why meaningful change actually happens in the world and providing concrete lessons and a practical model for businesses, policymakers, civil society organizations, and individuals who seek to transform our world for good.

The Nature Principle Richard Louv, 2012-04-17 For many of us, thinking about the future conjures up images of Cormac McCarthy's *The Road*: a post-apocalyptic dystopia stripped of nature. Richard Louv, author of the landmark bestseller *Last Child in the Woods*, urges us to change our vision of the future, suggesting that if we reconceive environmentalism and sustainability, they will evolve into a larger movement that will touch every part of society. This New Nature Movement taps into the restorative powers of the natural world to boost mental acuity and creativity; promote health and wellness; build smarter and more sustainable businesses, communities, and economies; and ultimately strengthen human bonds. Supported by groundbreaking research, anecdotal evidence, and compelling personal stories, Louv offers renewed optimism while challenging us to rethink the way we live.

Trades, Quotes and Prices Jean-Philippe Bouchaud, Julius Bonart, Jonathan Donier, Martin Gould, 2018-03-22 The widespread availability of high-quality, high-frequency data has revolutionised the study of financial markets. By describing not only asset prices, but also market participants' actions and interactions, this wealth of information offers a new window into the inner workings of the financial ecosystem. In this original text, the authors discuss empirical facts of financial markets and introduce a wide range of models, from the micro-scale mechanics of individual order arrivals to the emergent, macro-scale issues of market stability. Throughout this journey, data is king. All discussions are firmly rooted in the empirical behaviour of real stocks, and all models are calibrated and evaluated using recent data from Nasdaq. By confronting theory with empirical facts, this book for practitioners, researchers and advanced students provides a fresh, new, and often surprising perspective on topics as diverse as optimal trading, price impact, the fragile nature of liquidity, and even the

reasons why people trade at all.

In the Company of the Poor Michael Griffin, Jennie Weiss Block, 2013 This book reflects intersection between the lives, commitments, and strategies of two highly respected figures Dr. Paul Farmer and Fr. Gustavo Gutierrez joined in their option for the poor, their defense of life, and their commitment to liberation. Farmer has credited liberation theology as the inspiration for his effort to do social justice medicine, while Gutierrez has recognized Farmer's work as particularly compelling example of the option for the poor, and the impact that theology can have outside the church. Draws on their respective writings, major addresses by both at Notre Dame, and a transcript of a dialogue between them.

Tertullian and Paul Todd D. Still, David E. Wilhite, 2012-12-20 How might late second/early third century readings of Paul illuminate our understanding of the first century texts? A close comparison of Tertullian and Paul reveals the former to be both a dubious and a profoundly insightful interpreter of the latter. With growing interest in the field of patristic exegesis, there is a need for examination of Tertullian's readings of Paul. Tertullian, the first among the significant Latin writers, shaped generations of Christians by providing both a vocabulary for and an exposition of elemental Christian doctrines, wherein he relied heavily on Pauline texts and appropriated them for his own use. This new collection of essays presents a collaborative attempt to understand, critique, and appreciate one of the earliest and most influential interpreters of Paul, and thereby better understand and appreciate both the dynamic event of early patristic exegesis and the Pauline texts themselves. Each chapter takes a two pronged approach, beginning with a patristic scholar considering the topic at hand, before a New Testament response. This results in a fast paced and illuminating interdisciplinary volume.

The Rise and Fall of United Grain Growers Paul D. Earl, 2019-10-18 For much of the twentieth century, United Grain Growers was one of the major forces in Canadian agriculture. Founded in 1906, for much of its history UGG worked to give western farmers a "third way" between the competing poles of cooperatives like the Saskatchewan Wheat Pool and the private sector. At its peak, more than 800 UGG elevators dotted the Canadian prairies and the company had become a part of western Canada's cultural psyche. By 2001, then known as Agricore United, it was the largest grain company on the Prairies. The UGG's history illuminates many of the intense debates over policy and philosophy that dominated the grain industry.

After the Second World War, it would be a key player as the western Canadian grain industry expanded into new international markets. Through the rest of the century, it played an important role in resolving major disputes over regulation and grain transportation policy. Despite its many innovations, the company's final decade and eventual demise illustrated the tensions at the heart of the grain industry. In 1997, to finance the rebuilding of its grain elevator network, UGG went public and entered equity markets. While successful at first, this strategy also weakened the company's cooperative structure. In 2007, it was purchased by Saskatchewan Pool in a hostile takeover. The disappearance of Agricore United marked the end of a century of voluntary farmer-control of the grain business in western Canada. Paul Earl's history reveals UGG's central role in the growth and transformation of the western grain industry at a critical period. With meticulous research supplemented by interviews with many of the key players, he also delves into the details and the debates over the company's demise.

Caribbean Women Writers and Globalization Helen C. Scott, 2016-04-08 Caribbean Women Writers and Globalization offers a fresh reading of contemporary literature by Caribbean women in the context of global and local economic forces, providing a valuable corrective to much Caribbean feminist literary criticism. Departing from the trend towards thematic diasporic studies, Helen Scott considers each text in light of its national historical and cultural origins while also acknowledging regional and international patterns. Though the work of Caribbean women writers is apparently less political than the male-dominated literature of national liberation, Scott argues that these women nonetheless express the sociopolitical realities of the postindependent Caribbean, providing insight into the dynamics of imperialism that survive the demise of formal colonialism. In addition, she identifies the specific aesthetic qualities that reach beyond the confines of geography and history in the work of such writers as Oonya Kempadoo, Jamaica Kincaid, Edwidge Danticat, Pauline Melville, and Janice Shinebourne. Throughout, Scott's persuasive and accessible study sustains the dialectical principle that art is inseparable from social forces and yet always strains against the limits they impose. Her book will be an indispensable resource for literature and women's studies scholars, as well as for those interested in postcolonial, cultural, and globalization studies.

Deconstructing Health Inequity Timothy A. Carey, Sara J. Tai, Robert Griffiths, 2021-04-04 This book offers a radically different perspective on the topic of health inequity. Carey, Tai, and Griffiths use Perceptual Control Theory (PCT) to deconstruct current approaches to understanding, investigating, and addressing problems of health inequity. In the book, the authors propose that health inequity is not a problem per se. Disrupted control, they argue, is the problem that needs to be addressed. From this perspective, research, policy, and health practices directed at addressing health inequity in isolation will offer only partial solutions to the problems created by disrupted control. Addressing problems of disrupted control directly, however, has the potential to entirely resolve issues that are created by health inequity. The authors have extensive

clinical and research experience in a wide range of contexts, including: cross-cultural settings; rural, remote, and underserved communities; community mental health settings; prisons; schools; and psychiatric wards. Drawing on these diverse experiences, the authors describe how adopting a Perceptual Control Theory perspective might offer promising new directions for researchers and practitioners who have an interest in addressing issues of inequity and social justice. With a Foreword written by Professor Neil Gilbert this book will provide fresh insights for academics, practitioners, and policymakers in the fields of public health, psychology, social policy, and healthcare.

Evidence, Ethos and Experiment P. Wenzel Geissler, Catherine Molyneux, 2017-05 Medical research has been central to biomedicine in Africa for over a century, and Africa, along with other tropical areas, has been crucial to the development of medical science. At present, study populations in Africa participate in an increasing number of medical research projects and clinical trials, run by both public institutions and private companies. Global debates about the politics and ethics of this research are growing and local concerns are prompting calls for social studies of the “trial communities” produced by this scientific work. Drawing on rich, ethnographic and historiographic material, this volume represents the emergent field of anthropological inquiry that links Africanist ethnography to recent concerns with science, the state, and the culture of late capitalism in Africa.
