The Night Sky, Updated and Expanded Edition Richard Grossinger, 2014-09-30 Ever since Homo sapiens first looked up at the stars, we as a species have been looking for meaning in the mysteries of the night sky. Over the millennia, as our knowledge, science, and technology developed, the stories we told ourselves about the universe and our place in it developed as well. In *The Night Sky*, Richard Grossinger traces those developments, covering multiple aspects of humanity's complex relationship to the cosmos. Covering not only astronomy but also cosmology, cosmogony, astrology, and science fiction, he offers us a revelatory look at the firmament through his own telescope, fitted with an anthropological lens. Throughout his explorations, Grossinger continually reflects on the deeper meaning of our changing concepts about the universe and creation, offering insight into how each new discovery causes us to redefine the values, moralities, and aesthetics by which we live. He also calls into question the self-aggrandizing notion that humanity can and will conquer all, and injects our strident confidence in science with a healthy dose of humility and wonder. Filled with poetic observation and profound questions, *The Night Sky* is a brilliant reflection of humanity's relationship with the cosmos--a relationship fed by longing,

doubt, and awe.

The Synchronicity Key David Wilcock, 2014-07-29 Unlock the key to a universal life-force in this astonishing book from the New York Times bestselling author of *The Source Field Investigations* and *Awakening in the Dream*. *The Source Field Investigations* was a New York Times, Wall Street Journal, and USA Today bestseller that uncovered hidden science and lost prophecies to illuminate an entirely new understanding of our world today. Now, in *The Synchronicity Key*, David Wilcock embarks on an astonishing investigation into what lies beyond—finding proof that everything in our lives is not only connected, but it also influences everything else. Using history, astrology, and synchronicity theory among other concepts, Wilcock shows that there is hidden architecture within time, guiding individuals and nations through a system of enlightenment Joseph Campbell called the Hero's Journey. Historical events occur in shockingly precise, repeating cycles of time as a result. Once we understand and identify the hidden laws of this seemingly random “synchronicity,” we are left with a remarkable blueprint of how best to lead our lives in this uncertain and confusing world.

**The Traveller in the Evening - The Last Works of William Blake** Morton D. Paley, 2007-11-08 There has never been a book about Blake's last period, from his meeting with John Linnell in 1818 to his death in 1827, although it includes some of his greatest works. In *The Traveller in the Evening*, Morton Paley argues that this late phase involves attitudes, themes, and ideas that are either distinctively new or different in emphasis from what preceded them. After an introduction on Blake and his milieu during this period, Paley begins with a chapter on Blake's illustrations to Thornton's edition of Virgil. Paley relates these to Blake's complex view of pastoral, before proceeding to a history of the project, its near-abortion, and its fulfillment as Blake's one of greatest accomplishments as an illustrator. In *Yah and His Two Sons* the presentation of the divine, except where it is associated with art, is ambiguous where it is not negative. Paley takes up this separate plate in the context of artists's representations of the Laocoön that would have been known to Blake, and also of what Blake would have known of its history from classical antiquity to his own time. Blake's Dante water colours and engravings are the most ambitious accomplishment of the last years of his life, and Paley shows that the problematic nature of some of these pictures, with *Beatrice Addressing Dante from the Car* as a main example, arises from Blake's own divided and sharply polarized attitude toward Dante's Comedy. The closing chapter, called 'Blake's Bible', is on the Bible-related designs and writings of Blake's last years. Paley discusses *The Death of Abel* (addressed to Lord Byron 'in the Wilderness') as a response to its literary forerunners, especially Gessner's *Death of Abel* and Byron's *Cain*. For the *Job* engravings Paley shows how the border designs and the marginal texts set up a dialogue with the main illustrations unlike anything in Blake's *Job* water colours on the same subjects. Also included here are Blake's last pictorial work on a Biblical subject, *The Genesis* manuscript, and Blake's last writing on a Biblical text, his vitriolic comments on Thornton's translations of the Lord's Prayer.

**Semiotics and City Poetics** Mary Coghill, 2022-12-05 Roman Jakobson stands alone in his semiotic theory of poetic analysis which combines semiotics, linguistics and structuralist poetics. This groundbreaking book proposes methods for developing Jakobson's theories of communication and poetic function. It provides an extensive range of examples of the kinds of Formalist praxis that have been neglected in recent years, developing them for the analysis of all poetry but, especially, the poetry of our urban future. Throughout the book the parameters of a city poetic genre are proposed and established; the book also develops the theory of the function of shifters and deixis with special reference to women as narrators. It also instantiates an experimental poetic praxis based on the work of one of Jakobson's great influences, Charles Sanders Peirce. Steadfastly adhering to the text in itself, this volume reveals the often surprising, hitherto unconsidered structural and semiotic patterns within poems as a whole.

*Astronomy for Cloudy Nights* David Clarke, 2024-12-23 Comprising 8 essays, the present book provides respite reading

for astronomers when skies are cloudy. Dealing with the science behind selected celestial topics in a semi-random way, it is educational, sometimes in humorous fashion. Anecdotes, poems and references to the general arts of literature, the law, paintings, and classical and pop music are included. Links of astronomy to the everyday spoken word are presented. All these can be appreciated by more general readers with an interest in making connections between science and the arts. The author became a Professional Practical Astronomer, following the discovery, at an early age, of a brass telescope under his grandmother's bed. Stories of telescope observing around the world are given, one being breathtaking—in two senses—at high altitude in the Bolivian Andes. Autobiographical in places, descriptions are given of experiences that astronomy has provided beyond the telescope.
