Sociologia, professioni e mondo del lavoro Annamaria Perino, 2015-09-28T00:00:00+02:00 Obiettivo del presente volume è quello di proporre una riflessione sullo stato dei laureati in Sociologia, sulle professioni e sulle opportunità occupazionali del sociologo, alla luce delle trasformazioni che hanno investito la società contemporanea e il mercato del lavoro. Il testo approfondisce l'ampio spettro delle questioni prese in esame attraverso quattro gruppi di contributi. Nel primo, La professione sociologica, si affrontano gli aspetti critici che caratterizzano la professione del sociologo. Nel secondo, L'evoluzione della formazione sociologica, si esaminano le ragioni che hanno portato a far evolvere la formazione sociologica dai suoi inizi fino ai nostri giorni. Nel terzo gruppo, La professione del sociologo tra percezione, aspirazioni e applicazioni concrete, si analizzano le percezioni che studenti, docenti e "pubblico" hanno della disciplina. Infine, nella quarta e ultima parte, La spendibilità del sapere sociologico, si illustrano alcune specifiche aree di "competenza" della Sociologia: la ricerca, la comunicazione, l'industria e il terziario, la gestione del territorio e dell'ambiente, il terzo settore, la salute e i servizi sociali. In una società sempre più complessa, in cui la molteplicità e la diversità dei problemi affrontati dalle discipline sociologiche risultano rilevanti, non ha senso parlare della professione del sociologo, ma piuttosto delle professioni dei sociologi. Il volume si concentra su tale complessità proponendo un'analisi dello scenario e alcune prospettive possibili.

National Health Services of Western Europe Guido Giarelli, Mike Saks, 2023-08-14 This book draws on research within neo-Weberian and neo-institutionalist perspectives to critically analyse National Health Services (NHSs) in Western Europe. Exploring the challenges posed by neo-liberal policies, it also looks at the impact of the role of the state, the medical profession, the public and the medical-industrial complex in their development. Bringing together a top-line range of expert

international contributors, this book includes national studies from three European macro-regions: Britain, Scandinavia and the Mediterranean. In the first part, the NHSs of each country considered are examined historically and in a contemporary context in face of emerging challenges – from cost containment to governance. The second part looks across the macro-regions at the influence of the main actors involved in their evolution and sustainability. Comparing and contrasting the NHSs of Western Europe, the book ends with a discussion of future directions. This book makes a vital contribution at a time when health services globally have been under great pressure in the wake of the COVID-19 pandemic. It is written for academics and advanced students of healthcare, management, public policy, social policy and sociology – in addition to health professionals and policymakers.
