The two boys' innocence is shattered one day and their friendship forever changes because of a random act of brutality against Hassan. As the boys grow apart and start their own lives, *The Kite Runner* follows the transformation of Afghanistan from a peaceful and isolated country to a living hell. Hosseini was a physician living in northern California at the time *The Kite Runner* was published. Hosseini's childhood memories of pre-Soviet Afghanistan, his own brief friendship with a Hazara servant and his family's immigrant experience in the United States inspired him to write the novel. Lessons from the Dying Ronald Hudkins, 2025-03-02 What does dying teach us about living? This book is a collection of powerful stories drawn from literature, philosophy, and ancient traditions, each offering a profound lesson on life, death, and

the moments in between. From tales of acceptance and regret to those of hope and sacrifice, these stories remind us that death is not the enemy—wasted time is. But death is understood differently across cultures. Beyond Western literary traditions, this book also explores Buddhist, Hindu, Japanese, Indigenous, and Latin American perspectives, where death is often viewed as a transition, a transformation, or a homecoming rather than an end. The Tibetan Book of the Dead teaches us that death is an opportunity for awakening, the Bhagavad Gita reminds us that the soul is eternal, and Indigenous oral traditions show how ancestors remain part of our lives long after they have passed. At its heart, *Lessons from the Dying* is not just a book about endings but about what we leave behind—love, forgiveness, and the stories that ensure we are never truly gone.

The fields of literature, exploration, business, sport, entertainment, and beyond abound with doctors whose interests lie outside medicine. This book, largely written by members of the medical profession, examines the efforts of doctors in non-medical fields. The doctors discussed here are those who are, or were, well-known to the public for their contributions to their non-medical fields of choice. In many cases, the public may have been unaware that a subject was medically qualified. This book provides wide-ranging and comprehensive biographical sketches of forty-two doctors who are best known to the public for their contributions to fields outside of medicine.
