Gas Age ,1895 Includes summaries of proceedings and addresses of annual meetings of various gas associations. L.C. set includes an index to these proceedings, 1884-1902, issued as a supplement to Progressive age, Feb. 15, 1910.

**Cambridge International AS and A Level Physics Coursebook with CD-ROM** David Sang,Graham Jones,Gurinder Chadha,Richard Woodside,2014-08-07 Fully revised and updated content matching the Cambridge International AS & A Level Physics syllabus (9702). Endorsed by Cambridge International Examinations, the Second edition of the AS/A Level Physics Coursebook comprehensively covers all the knowledge and skills students need for AS/A Level Physics 9702 (first examination 2016). Written by renowned experts in Physics, the text is written in an accessible style with international learners in mind. The Coursebook is easy to navigate with colour-coded sections to differentiate between AS and A Level content. Self-assessment questions allow learners to track their progression and exam-style questions help learners to prepare thoroughly for their examinations. Contemporary contexts are discussed throughout enhancing the relevance and interest for learners.

Physics and Technology of Hyperthermia S.B. Field,Cafiero Franconi,2012-12-06 In the 1960s a firm rationale was developed for using raised temperatures to treat malignant disease and there has been a continuous expansion of the field

ever since. However, a major limitation exists in our ability to heat human tumours, especially those sited deep in the body, with a reasonable degree of temperature uniformity. This problem has resulted in engineers and physicists collaborating closely with biologists and clinicians towards the common goal of developing and testing the clinical potential of this exciting treatment modality. The aim of the physicist and engineer is to develop acceptable methods of heating tumour masses in as many sites as possible to therapeutic temperatures avoiding excessive heating of normal structures and, at the same time, obtaining the temperature distribution throughout the heated volume. The problem is magnified by both the theoretical and technical limitations of heating methods and devices. Moreover, the modelling of external deposition of energy in tissue and knowledge of tissue perfusion are ill-defined. To this must be added the conceptual difficulty of defining a thermal dose. The NATO course was designed to provide a basis for the integration of physics and technology relevant to the development of hyperthermia. There were 48 lectures covering the theoretical and practical aspects of system design and assessment, including, as far as possible, all the techniques of current interest and importance in the field.

*Awareness and the Substructure of Knowledge* Paul Silva, Paul Silva Jr, 2023 We often talk about someone being aware of a fact, perhaps in order to criticize, excuse, admonish, or inform. Paul Silva presents a comprehensive case against the view that factual awareness is knowledge or even essentially related to knowledge, arguing that knowledge is just one species of factual awareness, which is a more basic type of state.
