Who Were the Babylonians? Bill T. Arnold, 2004 This is a good question and one which most of us could offer some vague answer to, but the Babylonians were an important and fascinating people who deserve further study. Unlike many books of the Babylonians this one is not written for specialists but for the general reader and student.

On Reading Prophetic Texts Bob Becking, Meindert Dijkstra, 1996-01-01 This book is an important contribution to the debate on feminist views of the literature and religion of Ancient Israel. An international group of scholars has written 18 essays on prophetic texts digesting and evaluating the scholarly legacy of Fokkelen van Dijk-Hemmes.

Toward a Poetics of Genesis 1-11 Daniel D. Lowery, 2013-04-15 Daniel Lowery commences this work by suggesting that history is a subjective enterprise—it is controlled by those who record it. The power of the present decides what is counted as history, and how the rest of us are told about the past shapes our view of it and, concomitantly, our outlook for the future. In this sense, then, history fundamentally shapes the future. Few questions are more basic to human existence than Who am I? Where did I come from? What is my place in this world? The earliest chapters of Genesis have oriented hearers and readers for millennia in their attempts to address these concerns. And so, in several respects, Genesis shapes the future. In this study, Lowery sets out to understand more accurately ancient Near Eastern language and claims about origins,

specifically claims found in Gen 1-11. He uses Gen 4:17-22 as a test case representing the Hebrew tradition explaining how the world came to be civilized. Lowery observes that this passage serves a function within the larger narrative of Gen 1-11 akin to other ancient Near Eastern traditions of civilized beginnings. Moreover, it occupies a place in the overarching “narrative of beginnings” corresponding to what we find elsewhere throughout the ancient world. Lowery focuses mainly on Mesopotamia, leaving other cultures for later study. This study aims to demonstrate that much of the language of Gen 1-11 is similar in many ways to its Mesopotamian counterparts. More explicitly, here is an exploration of the nature of the language and terms of Gen 1-11 to ascertain what truths it communicates and how it communicates them. At its core, this is a study of the genre and generic claims of protohistory as found in Gen 1-11.

The Adventure of the Human Intellect Kurt A. Raaflaub, 2016-04-27 *The Adventure of the Human Intellect* presents the latest scholarship on the beginnings of intellectual history on a broad scope, encompassing ten eminent ancient or early civilizations from both the Old and New Worlds. Borrows themes from *The Intellectual Adventure of Ancient Man* (1946), updating an old topic with a new approach and up-to-date theoretical underpinning, evidence, and scholarship Provides a broad scope of studies, including discussion of highly developed ancient or early civilizations in China, India, West Asia, the Mediterranean, and the Americas Examines the world view of ten ancient or early societies, reconstructed from their own texts, concerning the place of human beings in society and state, in nature and cosmos, in space and time, in life and death, and in relation to those in power and the world of the divine Considers a diversity of sources representing a wide array of particular responses to differing environments, circumstances, and intellectual challenges Reflects a more inclusive and nuanced historiographical attitude with respect to non-elites, gender, and local variations Brings together leading specialists in the field, and is edited by an internationally renowned scholar

Scribes and Schools Philip R. Davies, 1998-01-01 *Scribes and Schools* is an examination of the processes which led to the canonization of the Hebrew Bible. Philip Davies sheds light on the social reasons for the development of the canon and in so doing presents a clear picture of how the Bible came into being. Volumes in the *Library of Ancient Israel* draw on multiple disciplines--such as archaeology, anthropology, sociology, linguistics, and literary criticism--to illuminate the everyday realities and social subtleties these ancient cultures experienced. This series employs sophisticated methods resulting in original contributions that depict the reality of the people behind the Hebrew Bible and interprets these insights for a wide variety of readers.

Spirit and Reason Dale Launderville, 2007 Ezekiel's symbolic thinking is an integrative rationality in which reason is regarded as operating within the heart through the empowerment and guidance of the Spirit.

Before Nature Francesca Rochberg, 2020-08-07 In the modern West, we take for granted that what we call the “natural world” confronts us all and always has—but *Before Nature* explores that almost unimaginable time when there was no such

conception of “nature”—no word, reference, or sense for it. Before the concept of nature formed over the long history of European philosophy and science, our ancestors in ancient Assyria and Babylonia developed an inquiry into the world in a way that is kindred to our modern science. With *Before Nature*, Francesca Rochberg explores that Assyro-Babylonian knowledge tradition and shows how it relates to the entire history of science. From a modern, Western perspective, a world not conceived somehow within the framework of physical nature is difficult—if not impossible—to imagine. Yet, as Rochberg lays out, ancient investigations of regularity and irregularity, norms and anomalies clearly established an axis of knowledge between the knower and an intelligible, ordered world. Rochberg is the first scholar to make a case for how exactly we can understand cuneiform knowledge, observation, prediction, and explanation in relation to science—without recourse to later ideas of nature. Systematically examining the whole of Mesopotamian science with a distinctive historical and methodological approach, *Before Nature* will open up surprising new pathways for studying the history of science.

Rhetoric before and beyond the Greeks Carol S. Lipson, Roberta A. Binkley, 2012-02-01 Focusing on ancient rhetoric outside of the dominant Western tradition, this collection examines rhetorical practices in Egypt, Mesopotamia, Israel, and China. The book uncovers alternate ways of understanding human behavior and explores how these rhetorical practices both reflected and influenced their cultures. The essays address issues of historiography and raise questions about the application of Western rhetorical concepts to these very different ancient cultures. A chapter on suggestions for teaching each of these ancient rhetorics is included.

Boundaries of the Ancient Near Eastern World Meir Lubetski, Claire Gottlieb, Sharon Keller, 1997-01-01 For over threescore years Cyrus H. Gordon's scholarship and teaching have provided new directions to the study of the ancient Near East. This collection of 34 essays in honour of his 90th birthday, edited by three of his former pupils, celebrates his fascinating and remarkable achievements and reflects his broad command of ancient studies. The global impact of his research can be seen from the geographical dispersion of the outstanding scholars who have written here on the following topics: archaeology, Bible studies, Ugaritic, Aramaic, Arabic, Egypto-Semitic, the cuneiform world, Indo-European, Samaritan, the Graeco-Roman world, mediaeval studies. The inclusion of a complete bibliography of Gordon's works is of singular value.

Gilgamesh Sophus Helle, 2021-10-26 A poem for the ages, freshly and accessibly translated by an international rising star, bringing together scholarly precision and poetic grace *Gilgamesh* is a Babylonian epic from three thousand years ago, which tells of King Gilgamesh's deep love for the wild man Enkidu and his pursuit of immortality when Enkidu dies. It is a story about love between men, loss and grief, the confrontation with death, the destruction of nature, insomnia and restlessness, finding peace in one's community, the voice of women, the folly of gods, heroes, and monsters—and more. Millennia after its composition, *Gilgamesh* continues to speak to us in myriad ways. Translating directly from the Akkadian, Sophus Helle offers

a literary translation that reproduces the original epic's poetic effects, including its succinct clarity and enchanting cadence. An introduction and five accompanying essays unpack the history and main themes of the epic, guiding readers to a deeper appreciation of this ancient masterpiece.

Becoming Diaspora Jews Karel van der Toorn, 2019-09-24 Based on a previously unexplored source, this book transforms the way we think about the formation of Jewish identity. This book tells the story of the earliest Jewish diaspora in Egypt in a way it has never been told before. In the fifth century BCE there was a Jewish community on Elephantine Island. Why they spoke Aramaic, venerated Aramean gods besides Yaho, and identified as Arameans is a mystery, but a previously little explored papyrus from Egypt sheds new light on their history. The papyrus shows that the ancestors of the Elephantine Jews came originally from Samaria. Due to political circumstances, they left Israel and lived for a century in an Aramean environment. Around 600 BCE, they moved to Egypt. These migrants to Egypt did not claim a Jewish identity when they arrived, but after the destruction of their temple on the island they chose to deploy their Jewish identity to raise sympathy for their cause. Their story—a typical diaspora tale—is not about remaining Jews in the diaspora, but rather about becoming Jews through the diaspora.

Scribal Culture and the Making of the Hebrew Bible Karel van der Toorn, 2009-04-15 The scribes of ancient Israel are the main figures behind the Hebrew Bible, and this book tells their story for the first time. Drawing comparisons with the scribal practices of ancient Egypt and Mesopotamia, van der Toorn details the methods, assumptions, and material means that gave rise to biblical texts.

Children in Ancient Israel Shawn W. Flynn, 2018-08-29 Flynn contributes to the emerging field of childhood studies in the Hebrew Bible by isolating stages of a child's life, and through a comparative perspective, studies the place of children in the domestic cult and their relationship to the deity in that cult. The study gathers data relevant to different stages of a child's life from a plethora of Mesopotamian materials (prayers, myths, medical texts, rituals), and uses that data as an interpretive lens for Israelite texts about children at similar stages such as: pre-born children, the birth stage, breast feeding, adoption, slavery, children's death and burial rituals, childhood delinquency. This analysis presses the questions of value and violence, the importance of the domestic cult for expressing the child's value beyond economic value, and how children were valued in cultures with high infant mortality rates. From the earliest stages to the moments when children die, and to the children's responsibilities in the domestic cult later in life, this study demonstrates that a child is uniquely wrapped up in the domestic cult, and in particular, is connected with the deity. The domestic-cultic value of children forms the much broader understanding of children in the ancient world, through which other more problematic representations can be tested. Throughout the study, it becomes apparent that children's value in the domestic cult is an intentional catalyst for the social promotion of YHWHism.
