The History of Labour Intermediation Sigrid Wadauer, Thomas Buchner, Alexander Mejstrik, 2015-04-01 Searching for a job has been an everyday affair in both modern and past societies, and employment a concern for both individuals and institutions. The case studies in this volume investigate job search and placement practices in European countries, Australia, and India in the nineteenth and twentieth centuries. The contributors explore how looking for work becomes a means by which participants (individuals, placement agents, trade unions, municipalities, administrations, state authorities, and schools) articulated specific interests, perspectives, and agendas. Taking an exploratory approach, the chapters illustrate different approaches to the history of employment and job searching, ranging from organizational and regulatory histories to the analysis of practices and autobiographical accounts. In the process, they uncover the interrelations of search practices and attempts to arrange placement services.

**A History of Migration from Germany to Canada, 1850-1939** Jonathan Wagner, 2006 Human migration figures prominently in modern world history, and has played a pivotal role in shaping the Canadian national state. Yet while much has been written about Canada's multicultural heritage, little attention has been paid to German migrants although they compose Canada's third largest European ethnic minority. A History of Migration from Germany to Canada, 1850-1939 addresses that gap in the record. Jonathan Wagner considers why Germans left their home country, why they chose to settle in Canada, who assisted their passage, and how they crossed the ocean to their new home, as well as how the Canadian government perceived and solicited them as immigrants. He examines the German context as closely as developments in Canada, offering a new, more complete approach to German-Canadian immigration. This book will appeal to students of German Canadiana, as well as to those interested in Canadian ethnic history, and European and modern international migration.

*A History of the Berliner Ensemble* David Barnett,2015-03-19 The Berliner Ensemble was founded by Bertolt Brecht and his wife Helene Weigel in 1949. The company soon gained international prominence, and its productions and philosophy influenced the work of theatre-makers around the world. David Barnett's book is the first study of the company in any language. Based on extensive archival research, it uncovers Brecht's working methods and those of the company's most important directors after his death. The book considers the boon and burden of Brecht's legacy, and provides new insights into battles waged behind the scenes for the preservation of the Brechtian tradition. The Berliner Ensemble was also the German Democratic Republic's most prestigious cultural export, attracting attention from the highest circles of government, and from the Stasi, before it privatised itself after German reunification in 1990. Barnett pieces together a complex history that sheds light on both the company's groundbreaking productions and their turbulent times.

Musical Entanglements between Germany and East Asia Joanne Miyang Cho,2021-10-09 This edited volume explores musical encounters and entanglements between Germany and East Asian nations from 1900 to the present. In so doing, it speaks to their dynamic and multi-faceted musical relations in multiple ways. Despite East Asia and Germany being located at opposite ends of the globe, German music has found remarkably fertile soil in East Asia. East Asians have enthusiastically adopted it, while at the same time adding their own musical interpretations. These musical encounters have produced compositions that reflect this mutual influence, stimulating and enriching each other through their entanglement. After more than a century of entanglement, Germany and East Asia have become kindred musical spirits.

**Land Rights, Ethno-nationality and Sovereignty in History** Stanley Engerman,Jacob Metzger,2004-08-02 The complex relationships between ethno-nationality, rights to land, and territorial sovereignty have long fed disputes over territorial control and landed rights between different nations, ethnicities, and religions. These disputes raise a number of interesting issues related to the nature of land regimes and to their economic and political implications. The studies drawn together in this key volume explore these and related issues for a broad variety of countries and times. They illuminate the diverse causes of ethno-national land disputes, and the different forms of adjustment and accommodation to the power differences between the contesting groups. This is done within a framework outlined by the editors in their analytical overview, which offers contours for comparative examinations of such disputes, past and present. Providing conceptual and factual analyses of comparative nature and wealth of empirical material (both historical and contemporary), this book will appeal to economic historians, economists, political scientists, sociologists, anthropologists and all scholars interested in issues concerning ethno-nationality and land rights in historical perspective.

*Land, Mobility, and Belonging in West Africa* Carola Lentz,2013-07-05 An ethnographic study of issues of land rights, property regimes, and ethnicity in West Africa. Focusing on an area of the savannah in northern Ghana and southwestern

Burkina Faso, Land, Mobility, and Belonging in West Africa explores how rural populations have secured, contested, and negotiated access to land and how they have organized their communities despite being constantly on the move as farmers or migrant laborers. Carola Lentz seeks to understand how those who claim native status hold sway over others who are perceived to have come later. As conflicts over land, agriculture, and labor have multiplied in Africa, Lentz shows how politics and power play decisive roles in determining access to scarce resources and in changing notions of who belongs and who is a stranger. "Illuminates the distinctive historical trajectory of land claims, authority, and belonging among the Dagara and Sisala peoples of the Black Volta region, and locates this specific case history within broader debates over transformation in access, use, and control over land in colonial and postcolonial Africa." —Sara Berry, Johns Hopkins University "Important in the sense that it constitutes a detailed historical study of how complex narratives of belonging and notions of property interlock. . . . It is academic work of the first order." —Christian Lund, Roskilde University

A Social History of Germany, 1648-1914 Eda Sagarra, 2017-07-12 This volume is a pioneering effort to examine the social, demographic, and economic changes that befell the Jewish communities of Central Europe after the dissolution of the Habsburg Empire. It consists of studies researched and written especially for this volume by historians, sociologists, and economists, all specialists in modern Central European Jewish affairs. The era of national rivalry, economic crises, and political confusion between the two World Wars has been preceded by a pre-World War I epoch of Jewish emancipation and assimilation. During that period, Jewish minorities had been harbored from violent anti-Semitism by the Empire, and they became torchbearers of industrialization and modernization. This common destiny encouraged certain common characteristics in the three major components of the Empire, Austria, Hungary, and the Czech territories, despite the very different origins of the well over one million Jews in those three lands. The disintegration of the Habsburg Empire created three small, economically marginal national states, inimical to each other and at liberty to create their own policies toward Jews in accord with the preferences of their respective ruling classes. Active and openly discriminatory anti-Semitic measures resulted in Austria and Hungary. The only liberal heir country of the Empire was Czechoslovakia, although simmering anti-Semitism and below surface discrimination were widespread in Slovakia. While one might have expected Jewish communities to return to their pre-World War I tendencies to go their independent ways after the introduction of these policies, social and economic patterns which had evolved in the Habsburg era persisted until the Anschluss in Austria, German occupation in Czechoslovakia, and World War II in Hungary. Studies in this volume attest to continuing similarities among the three Jewish communities, testifying to the depth of the Empire's long lasting impact on the behavior of Jews in Central Euro

**Patterns in the History of Polycentric Governance in European Cities** Cédric Brélaz, Thomas Lau, Hans-Joachim Schmidt, Siegfried Weichlein, 2024-03-18 The autonomy granted to local communities (such as towns, municipalities, and city-states) by larger, central powers (such as empires, kings, lords, and central states) is a recurrent feature of European history over time, from Antiquity to the contemporary period. This volume explores the political, social, and cultural aspects of this feature in a diachronic and comparative perspective, from the Roman Empire to today's city partnerships. To this end, it uses the concept of polycentric governance. Originally developed by political economist Vincent Ostrom in the 1960s and then expanded by the 2009 winner of the Nobel Prize in Economics, political scientist Elinor Ostrom, this concept characterises the interdependent system of relations between different actors involved in a process and, for that reason, it is frequently used in policy studies. This volume applies the concept of polycentric governance to historical studies as a heuristic device to analyse the multilayer systems into which cities were integrated at various points in European history, as well as the implications of the coexistence of different political structures. Fourteen chapters examine the structures, the dynamics, and the discourse of polycentric governance through various case studies from the Roman Empire, from medieval towns, from early modern Europe, and from contemporary cities. The volume suggests that for extended periods of time throughout European history, polycentric governance has played a pivotal role in the organisation and distribution of political power.
