A Chronology of Photography Paul Lowe, 2019-01-08 A rich and fresh perspective on the history of photography, tracing the complex links between technological innovation, social change, and artistic intervention. As a medium of documentation, social commentary, commercial marketing, artistic exploration, and self-expression over the last two centuries, photography has in many ways defined the way we view ourselves and the world around us. A Chronology of Photography traces the development of the medium from early experiments with optics by artists and scientists, through the birth of photography in 1839, with the innovations of Louis Daguerre and Henry Fox Talbot, right up to the present-day explosion of digital media, with Instagram and the selfie dominating visual discourse. Providing a unique timeline framework and in-depth commentary, this volume takes a purely chronological approach to present a fresh social, political, and cultural perspective on the subject. Tracing the complex links between technological innovation, social change, and artistic intervention, A Chronology of Photography is an invaluable and comprehensive overview of photography's history including deeper explorations of key themes and moments.

The Encyclopedia of Journalism covers all significant dimensions of journalism, such as print, broadcast, and Internet journalism; U.S. and international perspectives; and history, technology, legal issues and court cases, ownership, and economics. *Photography, Humanitarianism, Empire* Jane Lydon, 2020-09-13 With their power to create a sense of proximity and empathy, photographs have long been a crucial means of exchanging ideas between people across the globe; this book explores the role of photography in shaping ideas about race and difference from the 1840s to the 1948 Declaration of Human Rights. Focusing on Australian experience in a global context, a rich selection of case studies – drawing on a range of visual genres, from portraiture to ethnographic to scientific photographs – show how photographic encounters between Aboriginals, missionaries, scientists, photographers and writers fuelled international debates about morality, law, politics and human rights. Drawing on new archival research, *Photography, Humanitarianism, Empire* is essential reading for students and scholars of race, visuality and the histories of empire and human rights.

Exploring Color Photography Robert Hirsch, 2014-12-17 Robert Hirsch's *Exploring Color Photography* is the thinking photographer's guide to color imagemaking. Now in its sixth edition, this pioneering text clearly and concisely instructs students and intermediate photographers in the fundamental aesthetic and technical building blocks needed to create thought-provoking digital and analog color photographs. Taking both a conceptual and pragmatic approach, the book avoids getting bogged down in complex, ever-changing technological matters, allowing it to stay fresh and engaging. Known as the Bible of Color Photography, its stimulating assignments encourage students to be adventurous and to take responsibility for learning and working independently. The emphasis on design and postmodern theoretical concepts stresses the thought process behind the creation of intriguing images. It's extensive and inspiring collection of images and accompanying captions allow makers to provide insight into how photographic methodology was utilized to visualize and communicate their

objectives. The text continues to deliver inspiring leadership in the field of color photography with the latest accurate information, ideas, commentary, history, a diverse collection of contemporary images, and expanded cellphone photography coverage. A Problem Solving and Writing chapter offers methods and exercises that help one learn to be a visual problem solver and to discuss and write succinctly about the concepts at the foundation of one's work.

Exploringcolorphotography.com, the companion website, has been revamped and updated to feature more student and teacher resources, including a new web-based timeline: As It Happened: A Chronological History of Color Photography.

The Book: A Cover-to-Cover Exploration of the Most Powerful Object of Our Time Keith Houston, 2016-08-22 A masterful and overwhelmingly entertaining volume. —Clea Simon, Boston Globe In *The Book*, Keith Houston reveals that the paper, ink, thread, glue, and board from which a book is made tell as rich a story as the words on its pages. In an invitingly tactile history of this 2,000-year-old medium, Houston follows the development of writing, printing, the art of illustrations, and binding to show how we have moved from cuneiform tablets and papyrus scrolls to the hardcovers and paperbacks of today.

**How the Other Half Looks** Sara Blair, 2020-07-14 New York City's Lower East Side, long viewed as the space of what Jacob Riis notoriously called the other half, was also a crucible for experimentation in photography, film, literature, and visual technologies. This book takes an unprecedented look at the practices of observation that emerged from this critical site of encounter, showing how they have informed literary and everyday narratives of America, its citizens, and its possible futures. Taking readers from the mid-nineteenth century to the present, Sara Blair traces the career of the Lower East Side as a place where image-makers, writers, and social reformers tested new techniques for apprehending America--and their subjects looked back, confronting the means used to represent them. This dynamic shaped the birth of American photojournalism, the writings of Stephen Crane and Abraham Cahan, and the forms of early cinema. During the 1930s, the emptying ghetto opened contested views of the modern city, animating the work of such writers and photographers as Henry Roth, Walker Evans, and Ben Shahn. After World War II, the Lower East Side became a key resource for imagining poetic revolution, as in the work of Allen Ginsberg and LeRoi Jones, and exploring dystopian futures, from Cold War atomic strikes to the death of print culture and the threat of climate change. *How the Other Half Looks* reveals how the Lower East Side has inspired new ways of looking-and looking back-that have shaped literary and popular expression as well as American modernity.

*Database aesthetics [electronic resource]* Viktorija Vesna Bulajić, 2007 Database Aesthetics examines the database as cultural and aesthetic form, explaining how artists have participated in network culture by creating data art. The essays in

Here, the ways information is ordered and organized become artistic choices, and artists have an essential role in influencing and critiquing the digitization of daily life. **Photography's Last Century** Jeff L. Rosenheim, 2020-03-09 Beginning with Paul Strand's landmark *From the Viaduct* in 1916 and continuing through the present day, *Photography's Last Century* examines defining moments in the history of the medium. Featuring nearly 100 masterworks from one of the most important private holdings of photography, the book includes works by Diane Arbus, Richard Avedon, Walker Evans, László Moholy-Nagy, Man Ray, and Cindy Sherman, as well as a diverse group of important lesser-known practitioners. A fascinating interview with Ann Tenenbaum provides a personal account of the works, while the main text offers an essential history of photography that addresses the implications of calling this period the medium's "last" century.

American Photography Miles Orvell, 2003 150 years of American photography come alive in this exciting new book, placing it in its cultural context for the first time. Orvell examines this fascinating subject through a wide range of well known and less-well known images. He ranges from portraiture and landscape photography, family albums and memory, and analyses the particularly 'American' way in which American photographers have viewed the world around them. Orvell combines a clear overview of the changing nature of photographic thinking and practice in this period with an exploration of key concepts. The result is the first coherent history of American photography, which examines issues such as the nature of photographic exploitation, experimental techniques, the power of the photograph to shock, and whether we should subscribe to the notion of a visual history.
