Neuropsychological Interventions for Children - Volume 1 Caroline de Oliveira Cardoso, Natália Martins Dias, 2024-04-04

This book is the first of two volumes that aim to serve as a comprehensive guide for professionals working with neuropsychological interventions especially designed for children. This first volume presents the theoretical foundations, tips and guidelines for neuropsychologists to develop different interventions, such as stimulation and early intervention with a focus on promoting neuropsychological health; habilitation, appropriate for work with neurodevelopment disorders; and rehabilitation, in cases of structural alterations. In this sense, it reflects the editors' concern to provide material with practical tips, but theoretically grounded, and truly useful to professionals in clinical and also school contexts. This first volume is divided into two parts. The first addresses the theoretical and practical foundations of child neuropsychological assessment and intervention. Neuropsychological assessment is discussed, with a focus on its role in guiding intervention. Also, different types of interventions are presented, and a taxonomy is offered, according to its differential objectives of promotion or remediation and the target population (typical development, functional or structural alterations of the Nervous System), leading to the suggestion of three types of interventions in neuropsychology in both clinical and school contexts: 1) Early preventive Intervention; 2) Habilitation and 3) Rehabilitation. Cognitive stimulation in different contexts, such as school, family and clinical, is also discussed, exploring how teachers and parents can also collaborate in intervention processes, expanding the possibilities for action beyond the clinical context. A section concludes by addressing the importance of the feedback and the neuropsychological assessment report. The second part focuses specifically on stimulation and rehabilitation, offering chapters that target specific skills such as attention, memory, executive functions and academic skills, among others. The chapters summarize evidence, bring tips and illustrate existing materials and programs, in a continuous articulation between theory-evidence-practice. Originally published in Portuguese and now available in English, Neuropsychological Interventions for Children - Volumes 1 and 2 will be of interest to professionals working with

neuropsychology in clinical and school contexts. It will also be useful in neuropsychology teaching contexts (specialization courses in neuropsychology and related areas) and for students and professionals in interface areas, such as Psychology, Education, Speech Therapy, Occupational Therapy among others. The translation of the original Portuguese version of this book into English was done with the help of artificial intelligence. A subsequent human revision was done primarily in terms of content.

O plantão psicológico sob a óptica da Psicoterapia Breve-Focal Teresa Cristina Monteiro de Holanda,2023-06-27 O plantão psicológico é uma intervenção psicológica que atende à demanda urgente e emergente no exato momento de sua necessidade, durante a crise, ajudando o cliente a lidar com seus recursos e limites em períodos de tempo previamente determinados. Pode ser feito em diversos contextos, como instituições, empresas, clínicas, hospitalares, Unidades Básicas de Saúde ou comunidades. Este livro tem o objetivo de propiciar ao leitor uma maior proximidade com a técnica da Psicoterapia Breve-Focal, mediante teoria, aplicação e estudo de casos, dentro de vários contextos de plantão psicológico citados acima. A obra contempla dez capítulos. Os três iniciais compõem a primeira parte, onde expomos a teoria e as técnicas que fundamentam a Psicoterapia Breve. Os demais capítulos compõem a segunda parte do livro, recheada de atuação e casos atendidos nos diversos locais cabíveis de utilização da Psicoterapia Breve de Apoio. O nosso intuito aqui é falar com propriedade e fundamentação sobre este tema atual e relevante; além disso, comprovar nossa atuação dentro desta técnica tão vasta e pertinente. Penso que este livro poderá auxiliar os alunos da graduação nos estágios curriculares e extracurriculares da Psicologia, como também nos cursos de formação em PB-Focal. Este livro se dirige também aos colegas que necessitam de maior atualização e aprofundamento da temática, principalmente neste pós-pandemia. Teresa Cristina

Atualização em avaliação e tratamento das emoções Daniel Bartholomeu,José Maria Montiel,Fabiano Koich Miguel,Lucas de Francisco Carvalho,José Maurício Haas Bueno,2023-12-05 Esta obra é permeada por diferentes tópicos relacionados ao campo de estudo das emoções. Alguns capítulos se direcionam mais aos aspectos conceituais e teóricos das emoções, ao passo que outros se destinam aos aspectos empíricos. Logicamente, seria impossível esgotar todo assunto com apenas um livro, mas seu propósito está em trazer visões críticas e atualizadas, amparadas nas recentes pesquisas na área. Nesse sentido, espera-se que a contribuição desta coletânea se entenda tanto nos nichos mais conjecturais quanto na perspectiva baseada em evidências.

Bem-estar e qualidade de vida: prevenção, intervenção e inovações - Vol. 6 ,2024-07-29 É com prazer que apresentamos o Volume 6 do livro "Bem-estar e qualidade de vida: prevenção, intervenção e inovações". Este volume reúne pesquisas e estudos que abordam desde intervenções neurocomportamentais até inovações tecnológicas, oferecendo uma visão abrangente sobre a saúde e a qualidade de vida. Começamos com uma análise dos padrões comportamentais na aplicação de conceitos neurocomportamentais, seguida por um estudo inovador sobre a estimulação cerebral profunda talâmica no tratamento de lesões cerebrais traumáticas. A saúde mental é um tema importante, com investigações sobre os riscos de suicídio entre estudantes de medicina e a eficácia da cetamina no tratamento do transtorno depressivo maior. Temas como comportamentos autolesivos no Brasil e tendências da toxoplasmose congênita em Goiás fornecem dados importantes para políticas públicas. A revisão sobre hemorragia digestiva alta associada ao uso de AAS pós-infarto destaca riscos e benefícios do tratamento farmacológico. A promoção da saúde física é explorada através de comparações entre treinamento funcional e de força para idosos, e o impacto das tecnologias digitais na musculação. Estudos sobre qualidade de vida em condições como Esclerose Lateral Amiotrófica e intervenções como a fototerapia para alopecia areata mostraram diversas estratégias para melhorar o bem-estar. O atendimento humanizado em centros terapêuticos e práticas integrativas como o Reiki são abordados como apoio no tratamento de dependências e outras condições. A relação entre microrganismos e acne abre novas perspectivas para tratamentos estéticos. O uso de histórias em quadrinhos no tratamento de traumas em crianças e adolescentes é destacado como uma ferramenta criativa na psicoterapia. A construção de uma cultura organizacional voltada para o bem-estar acadêmico e a supervisão psicanalítica na formação prática em psicologia são essenciais para ambientes

educacionais saudáveis. Por fim, um relato clínico sobre acondroplasia e as implicações éticas das inteligências artificiais refletem a diversidade dos temas abordados. Esperamos que este volume inspire profissionais, pesquisadores e estudantes a explorar e implementar práticas que promovam a saúde e o bem-estar. Boa leitura!
