Plunkett's Energy Industry Almanac 2006 Jack W. Plunkett,2005 The energy industry is boiling over with changes.

Deregulation, new opportunities in foreign fields and markets and environmental challenges are rushing together head-on to shape the energy and utilities business of the future. Extremely deep offshore wells in the Gulf of Mexico and offshore of West Africa are being drilled at immense cost. Meanwhile China has become a major energy importer and Russia has become a major exporter. In the U.S., Europe and Japan, renewable and alternative energy sources are developing quickly, including big breakthroughs in wind power and fuel cells. This exciting new reference book covers everything from major oil companies to electric and gas utilities, plus pipelines, refiners, retailers, oil field services and engineering. Petroleum topics include upstream and downstream. Additional topics include coal, natural gas and LNG. More than a dozen statistical tables cover everything from energy consumption, production and reserves to imports, exports and prices. Next, our unique profiles of the Energy 500 Firms are also included, with such vital details as executive contacts by title, revenues, profits, types of business, web sites, competitive advantage, growth plans and more. Purchasers of either the book or PDF version can receive a free copy of the company profiles database on CD-ROM, enabling key word search and export of key information, addresses, phone numbers and executive names with titles for every company profiled.

*Climate Change Policy* Stephen H. Schneider, Armin Rosencranz, John O. Niles, 2002-08-01 Questions surrounding the issue of climate change are evolving from Is it happening? to What can be done about it? The primary obstacles to addressing it at this point are not scientific but political and economic; nonetheless a quick resolution is unlikely. Ignorance and confusion surrounding the issue -- including a lack of understanding of climate science, its implications for the environment and society, and the range of policy options available -- contributes to the political morass over dealing with climate change in which we find ourselves. *Climate Change Policy* addresses that situation by bringing together a wide range of new writings from leading experts that examine the many dimensions of the topics most important in understanding climate change and policies to combat it. Chapters consider: climate science in historical perspective analysis of uncertainties in climate science and policy the economics of climate policy North-South and intergenerational equity issues the role of business and industry in climate solutions policy mechanisms including joint implementation, emissions trading, and the so-called clean development mechanism Regardless of the fate of the Kyoto Protocol, the issues raised in that debate will persist as new climate protection regimes emerge; this volume treats most of those topics. Tying the chapters together is a shared conclusion that climate change is a real and serious problem, and that we as a society have an obligation not merely to adapt to it but to mitigate it in whatever intelligent ways we can develop. Cost-effectiveness is not disdained, but neither is the imperative for valuing species threatened by rapid climate change.

**Constructive Engagement** Nicholas Beale, 2017-11-28 The relationships between investors, directors and companies have never been so vital, or so confusing. Gone are the days when being a non-executive director (NED) meant an agreeable lunch and when CEOs wanted them to meet investors 'over my dead body'. Even the most admired companies can be engulfed in scandal and the NEDs find themselves having to drive through fundamental changes. The corporate environment is full of pitfalls for unwary boards. And there are plenty of headline stories of directors who have failed to measure up. Equally, a high quality board which has the confidence of the investors is a major strategic asset: making better decisions, attracting better people and allowing bolder strategies to succeed with investor backing. Nicholas Beale uses research gathered from leading FTSE 100 chairmen, directors, non-executive directors and investors to explore their changing roles. What emerges is a fascinating and instructive picture of constructive engagement; an approach that sees these companies (and the people behind them), each in their own way, address the challenges that are at the heart of global capitalism, and that have led to the Higgs Review, Sarbanes-Oxley and other regulatory attempts to address corporate mismanagement. From discussions with over 100 leading practitioners, detailed studies of three leading companies, three leading investors and an extended case study on investor engagement at Royal Dutch Shell, the author draws a series of ideas and guidance for all of the parties involved. Sadly this book has come too late for the directors and investors of those companies that have crashed and burned, but all others who are, or aspire to be, directors or significant investors in listed companies should read this book, learn the lessons it has to offer and start adopting them in the organization(s) with which you work and in the portfolios you develop.
