Understanding Leadership Robert M. McManus, Gamaliel Perruci, 2019-12-09 Laozi, Marx, the Buddha, Ibsen, Machiavelli – these are just a few of the world's great thinkers who have weighed in on the subject of leadership over the centuries. Yet the contemporary student of leadership often overlooks many of these names in favor of more recent theorists hailing from the social sciences. *Understanding Leadership: An Arts and Humanities Perspective* takes a different angle, employing the works of the great philosophers, authors, and artists found in world civilization and presenting an arts and humanities perspective on the study of leadership. The authors build their conceptual framework using their Five Components of Leadership Model, which recognizes the leader, the followers, the goal, the context, and the cultural values and norms that make up the leadership process. Supporting the text are a wealth of case studies that reflect on works such as Ayn Rand's novella *Anthem*, Eugène Delacroix's painting *Liberty Leading the People*, Charlie Chaplin's film *Modern Times*, Athol Fugard's play *Master Harold . . . and the boys*, Laozi's poetic work *Dao De Jing*, and Antonín Dvořák's *New World Symphony*. The authors also introduce studies from various world cultures to emphasize the role that cultural values and norms play in leadership. This illuminating framework promotes the multidimensional thinking that is necessary for understanding and problem-solving in a complex world. *Understanding Leadership: An Arts and Humanities Perspective* will be a valuable resource for both undergraduate and postgraduate leadership students, while leadership professionals will also appreciate the book's unique liberal arts and cultural approach.

Cultural Factors Define Implementation Strategies Stanley Remple, 2025-07-14 Strong business leadership built on a value-based foundation has the power to drive profit while improving the lives of business leaders, employees, and even those in the community. But a business leadership model must also reflect cultural context, which is why author Stanley Remple argues that a cookie-cutter, individualistic Western approach doesn't serve the needs of Chinese business leaders. Enter *Leadership Wisdom for Businesses in China*, a powerful four-book series that examines value-based business leadership specifically within the Chinese cultural and social environment and offers a framework to promote individual and

collective potential while creating a successful and competitive business. In Book Four, Cultural Factors Define Implementation Strategies, Remple delves deeper into the historic and cultural influences that led to the Western business leadership model; why China's unique historic and cultural influences have created a need for its own business leadership strategy; and how this can be further developed. Factors explored include how the influence of Confucius, Daoism and Buddhism, Sun Yat-sen, and the Communist Party have impacted business leadership practice in China to prioritize collective interests, and the opportunities this presents. The book concludes with culturally supportable strategies for value-based leadership to ensure business success. Much more than a theoretical overview of business leadership, this series offers a roadmap and solid tools for developing both self-leadership and business leadership within a whole company. Supported by a Chinese project team consisting of researchers, educators, writers and editors, business leaders, and other stakeholders, this culturally relevant series has been written for both new and experienced business leaders and entrepreneurs, leadership consultants and trainers, and post-secondary leadership programs in China. However, stakeholders in the West will also find great value in this comprehensive exploration of value-based leadership. The other volumes in the Leadership Wisdom for Businesses in China* series are: • Book One I: Confronting the Business Leadership Crisis • Book Two: Developing a Value-Based Business • Book Three: Values Guide Decision-Making for Results A Mandarin version will soon be available from a Chinese Publisher *Also available in Mandarin

Confucius Michael Schuman, 2015-03-03 Confucius is perhaps the most important philosopher in history. Today, his teachings shape the daily lives of more than 1.6 billion people. Throughout East Asia, Confucius's influence can be seen in everything from business practices and family relationships to educational standards and government policies. Even as western ideas from Christianity to Communism have bombarded the region, Confucius's doctrine has endured as the foundation of East Asian culture. It is impossible to understand East Asia, journalist Michael Schuman demonstrates, without first engaging with Confucius and his vast legacy. Confucius created a worldview that is in many respects distinct from, and in conflict with, Western culture. As Schuman shows, the way that East Asian companies are managed, how family members interact with each other, and how governments see their role in society all differ from the norm in the West due to Confucius's lasting impact. Confucius has been credited with giving East Asia an advantage in today's world, by instilling its people with a devotion to learning, and propelling the region's economic progress. Still, the sage has also been highly controversial. For the past 100 years, East Asians have questioned if the region can become truly modern while Confucius remains so entrenched in society. He has been criticized for causing the inequality of women, promoting authoritarian regimes, and suppressing human rights. Despite these debates, East Asians today are turning to Confucius to help them solve the ills of modern life more than they have in a century. As a wealthy and increasingly powerful Asia rises on the world stage, Confucius, too, will command a more prominent place in global culture. Touching on philosophy, history, and current affairs,

Confucius tells the vivid, dramatic story of the enigmatic philosopher whose ideas remain at the heart of East Asian civilization.

Redefining Chinese Literature and Art Jixi Yuan, 2019-02-04 This Key Concepts pivot discusses the significance of the ancient Chinese concept of *xìng* or 'Association' in defining Chinese civilization and thought through the centuries. An approach unique to literary creation in China, *xìng* highlights the importance Chinese civilization sets by the integration of intellect, emotion and will into a highly consistent concept across its personal and public spheres. The book explores how the concept has been a widely used creative technique even in the earliest collections of Chinese poems, using metaphor and symbolism to set the scene and indicate thoughts and emotions invested in the vehicle of metaphor, as well as its impact on Chinese literature and philosophy as a domain of multiple meanings in classical Chinese aesthetics.

Conceptions of Justice from Earliest History to Islam Abbas Mirakhor,Hosseini Askari,2019-04-17 This book examines the conceptions of justice from Zarathustra to Islam. The text explores the conceptions of justice by Zarathustra, Ancient Egypt, India, Mesopotamia, Noah, Abraham, and Moses. During the Axial Age (800-200BCE), the focus of justice is in India, China, and Greece. In the post-Axial age, the focus is on Christianity. The authors then turn to Islam, where justice is conceived as a system, which emerges if the Qur'anic rules are followed. This work concludes with the views of early Muslim thinkers and on how these societies deteriorated after the death of the Prophet. The monograph is ideal for those interested in the conception of justice through the ages, Islamic studies, political Islam, and issues of peace and justice.

A Confucian Approach to Media Ethics Yayu Feng,2025-01-23 A Confucian Approach to Media Ethics offers a comprehensive theorization of an approach to media ethics based on the moral philosophy that originated from China and that profoundly influenced East Asian countries. This book engages with foundational concepts from Confucian ethics and explicates a new framework that can be used for guiding media practices, as well as media ethics research and teaching. It suggests that the Confucian ideals of He (harmony), Zhong (equilibrium), and the notion of Junzi can be applied to guide intercultural media practices, and sets out a fresh model for ethics education centered on Xiuji (self-cultivation) that is different from the training-based and decision-making-centered model prevalent in the Western classrooms. This is also a framework that emphasizes both individual moral growth and the moral character of the broader professional community. Filling a gap in the conversation between Eastern and Western approaches to media ethics, this innovative and important volume will offer new perspectives to students and scholars of media ethics, communication studies, and comparative philosophy.
