**Banning 'Conversion Therapy'** Ilias Trispiotis, Craig Purshouse, 2023-11-30 This book looks at why and how states should legally ban LGBTQ+ 'conversion therapy'. Few states have legislated against the practice, with many currently considering its legal ban. Banning 'Conversion Therapy' brings together leading academics, legal and medical practitioners, policymakers, and activists to illuminate the legislative and non-legislative steps that are required to protect individuals from the harms of 'conversion therapy' in different contexts. The book considers how best to address this complex and interdisciplinary legal problem which cuts across human rights law, criminal law, family law, and socio-legal studies, and which represents one of the key contemporary problems of LGBTQ+ equality and national and international human rights activism.

*Bittersweet on the Autism Spectrum* Luke Beardon, Dean Worton, 2017-01-19 In this rich and diverse collection, 28 writers describe what positive experiences they have had as an autistic person, and show how the most unexpected subject areas can be a source of the positive. They demonstrate that individuals can, and do, experience life in positive ways, sometimes in the face of adversity. Sharing both dark and joyful moments with unreserved honesty, their insights are moving, often hilarious, creative, and highly intelligent, and usually surprising. From hair-raising travelling experiences to parenting with verve, volunteering to teaching, running a marathon to taking on a PhD, they show that autism need not limit life. Introduced by Luke Beardon and Dean Worton, their stories challenge stereotypes surrounding autism, empower, and entertain.

Writing without Teachers Peter Elbow,1998-06-25 In *Writing Without Teachers*, well-known advocate of innovative teaching methods Peter Elbow outlines a practical program for learning how to write. His approach is especially helpful to people who get stuck or blocked in their writing, and is equally useful for writing fiction, poetry, and essays, as well as reports, lectures, and memos. The core of Elbow's thinking is a challenge against traditional writing methods. Instead of editing and outlining material in the initial steps of the writing process, Elbow celebrates non-stop or free uncensored writing, without editorial checkpoints first, followed much later by the editorial process. This approach turns the focus towards encouraging ways of developing confidence and inspiration through free writing, multiple drafts, diaries, and notes. Elbow guides the reader through his metaphor of writing as cooking: his term for heating up the creative process where the subconscious bubbles up to the surface and the writing gets good. 1998 marks the twenty-fifth anniversary of *Writing Without Teachers*. In this edition, Elbow reexamines his program and the subsequent influence his techniques have had on writers, students, and teachers. This invaluable guide will benefit anyone, whether in the classroom, boardroom, or living room, who has ever had trouble writing.

*Becoming Good Ancestors* David Ehrenfeld,2008-11-04 A brilliant writer and gifted big picture thinker, David Ehrenfeld is one of America's leading conservation biologists. *Becoming Good Ancestors* unites in a single, up-to-date framework pieces written over two decades, spanning politics, ecology, and culture, and illuminating the forces in modern society that thwart our efforts to solve today's hard questions about society and the environment. The book focuses on our present-day retreat from reality, our alienation from nature, our unthinking acceptance of new technology and rejection of the old, the loss of our ability to discriminate between events we can control and those we cannot, the denial of non-economic values, and the decline of local communities. If we are aware of what we are losing and why we are losing it, the author notes, all of these

patterns are reversible. Through down-to-earth examples, ranging from a family canoe trip in the wilderness to the novels of Jane Austen to Chinese turtle and tiger farms, Ehrenfeld shows how we can use what we learn to move ourselves and our society towards a more stable, less frantic, and far more satisfying life, a life in which we are no longer compelled to damage ourselves and our environment, in which our children have a future, and in which fewer species are endangered and more rivers run clean. In the final chapter, he offers a dramatic view of the possibilities inherent in a fusion of the best elements of conservatism and liberalism. Our society has an inherent sense of what is right, says Ehrenfeld, and the creativity and persistence to make good things happen. It is now time to apply our intelligence, guided by our moral judgment, to the very large problems we all face. This book is an important first step.

**Ships and Silver, Taxes and Tribute** Hans van Wees, 2013-09-04 Historians since Herodotus and Thucydides have claimed that the year 483 BCE marked a turning point in the history of Athens. For it was then that Themistocles mobilized the revenues from the city's highly productive silver mines to build an enormous war fleet. This income stream is thought to have become the basis of Athenian imperial power, the driving force behind its democracy and the centre of its system of public finance. But in his groundbreaking new book, Hans van Wees argues otherwise. He shows that Themistocles did not transform Athens, but merely expanded a navy-centred system of public finance that had already existed at least a generation before the general's own time, and had important precursors at least a century earlier. The author reconstructs the scattered evidence for all aspects of public finance, in archaic Greece at large and early Athens in particular, to reveal that a complex machinery of public funding and spending was in place as early as the reforms of Solon in 594 BCE. Public finance was in fact a key factor in the rise of the early Athenian state – long before Themistocles, the empire and democracy. 'With this important book Hans van Wees is the first historian systematically to approach ancient Greek economy and society along the lines of the new fiscal history. The results are highly rewarding, and go far beyond the area of public finance. In addition to a fresh perspective on key aspects of the archaic Greek world, the author provides numerous insights into the elusive process of state formation in Athens and elsewhere.' - Paul Millett, Senior Lecturer in Classics, University of Cambridge, author of *Lending and Borrowing in Ancient Athens*

*The Role of the Judge in International Trade Regulation* Thomas Cottier, Petros Constantinou Mavroidis, Patrick Blatter, 2009-12-22 The WTO is generally seen as a key actor of globalization and, as such, has been the point of convergence of popular irritation worldwide. Many of the reproaches addressed to the WTO show civil society's concern with what is perceived as a democratic deficit in the way the organization operates. The main fear is to see trade rise as the ultimate value, prevailing over concerns such as health and environment. *The Role of the Judge* offers insight into how disputes are

solved at the WTO level, into how the judicial branch interacts with the rest of the organization, and into the degree of sensitivity of the system to external input. The book sheds light on the judicial system governing the WTO and shows it to be the only truly multilateral system where disputes are solved by third-party adjudication. The book develops along three lines: the first a search for cases submitted to the WTO where the judge exceeded its authority; the second a comparison of the WTO with the operations of national judicial systems having different levels of integration, specifically the United States (federal level) and the EC (quasi-federal level); and the third an exploration of directions for the future of dispute settlement in the WTO. Reflecting the diversity of its contributors, this book addresses questions of economics, political science, and law, bringing an unusual level of multidisciplinary to this topic and context. It is designed for both academic readers and practitioners, who will find it full of practical insights as well as rich and detailed analysis. Thomas Cottier is Professor of European and International Economic Law, University of Bern, and Managing Director, World Trade Institute, University of Bern. Petros C. Mavroidis is Professor of Law, University of Neuchâtel. He formerly worked in the Legal Affairs Division of the World Trade Organization. Patrick Blatter is Mavroidis's scientific collaborator.

**Worth Saving** Anne Egelston, 2022-08-31 This textbook is intended to be used in an upper-level international environmental issues class as part of the American Environmental Studies and Sciences book series. This class is commonly taught at both the undergraduate and graduate level as part of either an environmental studies program, a political science program, or within a policy track of an environmental science program. Given the length of time that negotiations have occurred, a new generation of students and practitioners will need to understand the complex processes that produced many of our environmental treaties. The majority of the students in environmental studies do not have a background in political science. Moving from a political science approach to an interdisciplinary approach will benefit the students by making the material more accessible. As these fields continue to grow and develop, regulatory compliance becomes increasingly important. Thus, this book is aimed at adding a business and industry perspective to this field where appropriate.

**Avant Rock** Bill Martin, 2015-12-14 In *Avant Rock*, music writer Bill Martin explores how avant-garde rock emerged from the social and political upheaval of the sixties. He covers the music from its early stages, revealing its influences outside of rock, from musicians such as John Cage and Cecil Taylor, to those more closely related to rock like James Brown and Parliament/ Funkadelic. Martin follows the development of avant rock through the sixties, when it was accepted into the mainstream, with bands like the later Beatles, The Who, Jimi Hendrix, The Velvet Underground, King Crimson, and Brian Eno. His narration takes us into the present, with an analysis of contemporary artists who continue to innovate and push the boundaries of rock, such as Stereolab, Mouse on Mars, Sonic Youth, and Jim O'Rourke. Martin critiques the work of all important avant rock bands and individual artists, from the well-known to the more obscure, and provides an annotated discography.
