**Cadaver Dissection with Clinical Applications** Seth Gardner, 2024-06-07 Cadaver Dissection with Clinical Applications is written for students in a professional program that have been given the privilege of dissecting their own cadaver. It discusses dissection techniques, what structures to look for in a particular region and various pitfalls to avoid in the process. The Manual also relates regional anatomical structures with clinical relevance by listing various syndromes, relevant orthopaedic tests, selected X-ray findings and associated pathologies that relate to the region being dissected. It is a terrific resource for all students who will one day see patients in a clinical setting, by first learning anatomical relevance on a cadaver.

**Peripheral Nerve Entrapments** Andrea M Trescot, MD, ABIPP, FIPP, 2016-05-10 Featured as a single volume, this is a comprehensive guide to possible nerve entrapment syndromes and their management. Each chapter covers a single nerve, or group of closely related nerves, and goes over the clinical presentation, anatomy, physical exam, differential diagnosis, contributing factors, injection techniques, neurolytic/surgical techniques, treatments of perpetuating factors, and complications. Nerve entrapments can occur throughout the body and cause headaches, chest pain, abdominal pain, pelvic pain, low back pain, and upper and lower extremity pain. As an example, one of the most common forms of nerve entrapment syndrome, Carpal Tunnel Syndrome, affects roughly 1 in 20 people in the United States, and is only one of several types of entrapment syndromes possible for the median nerve. Chapters are also extensively illustrated and include 3D anatomical images. The additional online material enhances the book with more than 50 videos - at least 2 for each nerve. This enables readers to easily navigate the book. In addition to a conventional index it includes a "Pain Problems Index" for searching by symptom. Peripheral Nerve Entrapments: Clinical Diagnosis and Management is a long-needed resource for pain physicians, emergency room physicians, and neurologists.
