Guide to Psychological Assessment with Hispanics Lorraine T. Benuto, 2012-09-19 This book focuses on diversity, culture, and ethnicity as they relate to psychological assessment of Hispanics. It is a how-to guide for clinicians, researchers, and instructors working with Hispanic clients. Each chapter contains an overview of cultural considerations needed for assessing the Hispanic client followed by a specific exploration of the assessment measures available and the research that has been conducted on these measures with Hispanic participants. An exploration of the strengths and limitations of each assessment measure is included. Considering that ethnocultural minority individuals who are of Hispanic/Latino origin make up the largest ethnocultural minority group in the United States, guidelines for working with this population are a must. Given that a large subset of this percentage is composed of immigrants many of whom do not speak English or who have learned English as a second language, special considerations for effective psychological assessment are necessary. This book fills a gap in the scientific literature by consolidating the research on psychological assessment with Hispanic samples into one comprehensive volume and providing simple recommendations for the psychological assessment of Hispanic clients. An exploration of the general psychological assessment domains (e.g., personality, intelligence) is included with references to research on the major assessment measures used in the field. A more specific exploration of psychodiagnostic assessment measures follows, including the assessment of mood disorders, anxiety disorders, sexual dysfunction, psychosis, etc. Several chapters are dedicated to specialized assessment, including neuropsychological assessment, forensic assessment, and school-based assessment, overall creating the most comprehensive, up-to-date, research-based compendium of psychological assessment measures for use with Hispanic clients.

Handbook of Assessment and Treatment Planning for Psychological Disorders, Third Edition Martin M. Antony, David H. Barlow, 2020-08-18 This authoritative clinical reference and text--now revised and updated with 50% new content--presents the assessment tools and strategies that every evidence-based psychotherapy practitioner needs. Unlike most assessment texts, the volume is organized around specific clinical problems. It explains how to select and use the best measures to assess clients' symptoms, generate diagnoses, plan appropriate treatments, and monitor progress. Clinician- and student-friendly features include tables comparing and contrasting relevant measures, sample forms, and case examples. Every chapter addresses considerations for primary and managed care settings. New to This Edition *Chapters on new

topics: assessment of well-being and transdiagnostic assessment. *New chapters on core topics: eating disorders, personality disorders, and insomnia. *Updated throughout with DSM-5 diagnostic changes, new and updated instruments, current research, and increased attention to transdiagnostic concerns. *Expanded coverage of obsessive-compulsive and related disorders. See also Clinical Handbook of Psychological Disorders, Sixth Edition, edited by David H. Barlow, which presents evidence-based treatments step by step.

Ethnogeriatrics Lenise Cummings-Vaughn, Dulce M. Cruz-Oliver, 2016-10-05 This volume is divided into five parts and fifteen chapters that address these topics by examining ethnogeriatric foundations, research issues, clinical care in ethnogeriatrics, education and policy. Expertly written chapters, by practicing geriatricians, gerontologists, clinician researchers and clinician educators, present a systematic approach to recognizing, analyzing and addressing the challenges of meeting the healthcare needs of a diverse population and authors discuss ways in which to engage the community by increasing research participation and by investigating the most prevalent diseases found in ethnic minorities. *Ethnogeriatrics* discusses issues related to working with culturally diverse elders that tend not to be addressed in typical training curricula and is essential reading for geriatricians, hospitalists, advance practice nurses, social workers and others who are part of a multidisciplinary team that provides high quality care to older patients.

Neuropsychology Sandra Koffler, E. Mark Mahone, Bernice A. Marcopulos, Douglas E Johnson-Greene, Glenn Smith, 2018-12-17 Compiled reviews of the recent literature are a long established tradition in the laboratory and clinical sciences, and bring to their professions a useful and timely summary of the advances that have been made in the field. Neuropsychology has matured as a science and profession to support a like effort to summarize, across domains, the direction and momentum in the field. The authors are authorities in the subjects they review and provide for the investigator, practitioner and student an overview of the important developments in neuropsychology that cannot be realized from perusal of the journals alone. Interest in the reviews are likely to go beyond the discipline of neuropsychology, and will extend to all with an interest in science of brain-behavior relationships, in the study of disease and injury as they affect brain function, and in the rehabilitation of the individual who has suffered insult to brain. Chapters cover the pragmatic application of tests and test findings to improve our understanding of the behavior of individuals who present with neurocognitive disorders. Where there is interest in efficiently acquiring a sound perspective of the important advances and the future direction of neuropsychology, *Neuropsychology: A Review of Science and Practice* will provide the means for so doing as no other publication can offer.

Handbook on the Neuropsychology of Aging and Dementia Lisa D. Ravdin, Heather L. Katzen, 2019-02-14 This comprehensive update offers practical advice for professionals working in neuropsychology with older adults. Focusing on fundamentals, common issues, special considerations, and late-life cognitive disorders, respected names in this critical

specialty address a wide range of presenting problems and assessment, diagnostic, and treatment concerns. Throughout, coverage pays keen attention to detail, bringing real-world nuance to large-scale concepts and breaking down complex processes into digestible steps. And like its predecessor, the new Handbook features recommendations for test batteries and ends each chapter by extracting its “clinical pearls.” A sampling of the topics covered: • Assessment of depression and anxiety in older adults. • The assessment of change: serial assessments in dementia evaluations. • Elder abuse identification in older adults. • Clinical assessment of postoperative cognitive decline. • Cognitive training and rehabilitation in aging and dementia. • Differentiating mild cognitive impairment and cognitive changes of normal aging. • Evaluating cognition in patients with chronic obstructive pulmonary disease. This Second Edition of the Handbook on the Neuropsychology of Aging and Dementia offers a wealth of expert knowledge and hands-on guidance for neuropsychologists, gerontologists, social workers, and other clinicians interested in aging. This can be a valuable reference for those studying for board certification in neuropsychology as well as a resource for veteran practitioners brushing up on key concepts in neuropsychology of age-related disorders.

Cognitive Screening Instruments A. J. Larner, 2016-11-30 This revised and updated second edition provides a practical and structured overview of some of the most commonly used and easily available cognitive screening instruments applicable in the outpatient clinic and bedside setting. It now includes additional chapters on AD8 and also methodological aspects of systematic cognitive screening instrument assessment from the Cochrane Dementia and Cognitive Improvement Group. Expert authors from around the world equip the reader with clear instructions on the usage of each screening instrument, its strengths and weaknesses, and the time required for administration. Rules on scoring are also provided, such as how to correct for variations in the patient’s age or education, and suggested cut-off scores. *Cognitive Screening Instruments: A Practical Approach, Second Edition* is aimed at both clinicians and professionals in disciplines allied to medicine who are called upon to assess patients with possible cognitive disorders, including neurologists, old age psychiatrists, neuropsychologists, primary care physicians, dementia support workers, and members of memory assessment teams.

Dementia, An Issue of Neurologic Clinics John M. Ringman, 2017-04-19 This issue of *Neurologic Clinics*, edited by Dr. John Ringman, will cover a wider variety of topics and the latest updated on Dementia. Topics covered in this issue include, but are not limited to Updates on the basic science of AD; The role of neuropsychology in the assessment of the cognitively impaired elderly; Assessment of the Spanish-speaking cognitively impaired elderly; Early-Onset Alzheimer's disease; Vascular dementia and vascular contributions to Alzheimer's disease; Frontotemporal Degenerations; and Current and Experimental Treatments, among others.

Clinical Assessment of Malingering and Deception Richard Rogers, Scott D. Bender, 2020-05-28 Widely used by practitioners, researchers, and students--and now thoroughly revised with 70% new material--this is the most authoritative,

comprehensive book on malingering and related response styles. Leading experts translate state-of-the-art research into clear, usable strategies for detecting deception in a wide range of psychological and psychiatric assessment contexts, including forensic settings. The book examines dissimulation across multiple domains: mental disorders, cognitive impairments, and medical complaints. It describes and critically evaluates evidence-based applications of multiscale inventories, other psychological measures, and specialized methods. Applications are discussed for specific populations, such as sex offenders, children and adolescents, and law enforcement personnel. Key Words/Subject Areas: malingering, deception, deceptive, feigning, dissimulation, feigned cognitive impairment, feigned conditions, defensiveness, response styles, response bias, impression management, false memories, forensic psychological assessments, forensic assessments, clinical assessments, forensic mental health, forensic psychological evaluations, forensic psychologists, forensic psychiatrists, psychological testing and assessment, detection strategies, expert testimony, expert witnesses, family law, child custody disputes, child protection, child welfare Audience: Forensic psychologists and psychiatrists; other mental health practitioners involved in interviewing and assessment, including clinical psychologists, social workers, psychiatrists, and counselors. Also of interest to legal professionals--

VII Latin American Congress on Biomedical Engineering CLAIB 2016, Bucaramanga, Santander, Colombia, October 26th -28th, 2016 Isnardo Torres, John Bustamante, Daniel A. Sierra, 2017-04-05 This volume presents the proceedings of the CLAIB 2016, held in Bucaramanga, Santander, Colombia, 26, 27 & 28 October 2016. The proceedings, presented by the Regional Council of Biomedical Engineering for Latin America (CORAL), offer research findings, experiences and activities between institutions and universities to develop Bioengineering, Biomedical Engineering and related sciences. The conferences of the American Congress of Biomedical Engineering are sponsored by the International Federation for Medical and Biological Engineering (IFMBE), Society for Engineering in Biology and Medicine (EMBS) and the Pan American Health Organization (PAHO), among other organizations and international agencies to bring together scientists, academics and biomedical engineers in Latin America and other continents in an environment conducive to exchange and professional growth.

Cultural Diversity in Neuropsychological Assessment Farzin Irani, 2022-02-27 Cultural Diversity in Neuropsychological Assessment provides a platform for clinical neuropsychologists, psychologists, and trainees to bridge cultures and speak to each other about the ethnically diverse communities they serve throughout the world. It allows readers to peek into their clinical filing cabinets and examine how they worked with diverse individuals from indigenous and migrant communities of Arab, Asian, European, Israeli, Latin American and Caribbean, Persian, Russian, Sub-Saharan African, and North American origin. The book first reviews important foundations for working with diverse communities that include key knowledge, awareness, skills, and action orientation. It then provides a collection of cases for each cultural geographic

region. Each section begins with an introductory chapter to provide a bird's eye view of the historical and current state of clinical and research practice of neuropsychology in that region. Then, each chapter focuses on a specific community by providing surface and deep-level cultural background knowledge from the authors' unique perspectives. A case study is then covered in depth to practically showcase an evaluation with someone from that community. This is followed by a summary of key strategic points, lessons learned, references, further readings, and a glossary of culture specific terminology used throughout the chapter. In the end, the appendix provides a list of culturally relevant tests and norms for some communities. This ground-breaking peer-reviewed handbook provides an invaluable clinical resource for neuropsychologists, psychologists, and trainees. It increases self-reflection about multicultural awareness and knowledge, highlights practical ways to increase cultural understanding in neuropsychological and psychological assessments, and sparks further discussion for professional and personal growth in this area.

Neuropsychological Assessment of Neuropsychiatric and Neuromedical Disorders Igor Grant, Kenneth M. Adams, 2009-03-10 This is a major revision of a standard reference work for neuropsychologists, psychiatrists, and neurologists. About one-half of the book contains entirely new work by new contributors. New topics not covered in the previous editions include consideration of common sources of neurocognitive morbidity, such as multiple sclerosis, diabetes, and exposure to heavy metals; psychiatric and behavioral disorders associated with traumatic brain injury; neuropsychology in relation to everyday functioning; the effects of cognitive impairment on driving skills, and adherence to medical treatments. The Third Edition aims to reflect the enormous developments in neuropsychology in terms of research, clinical applications, and growth of new talent during the past decade. At one time focused on mapping the cognitive and related consequences of brain injuries, research in neuropsychology has now expanded to much broader considerations of the effects of systemic disease, infection, medications, and inflammatory processes on neurocognition and emotion. The Third Edition attempts to capture these developments while continuing to adhere to the objective of presenting them in a concise manner in a single volume.

Ethnicity and the Dementias Gwen Yeo, Linda A. Gerdner, Dolores Gallagher-Thompson, 2018-09-03 In recent years, the literature on the topic of ethnic and racial issues in Alzheimer's disease and other dementias has increased dramatically. At the same time, the need for cultural competence in all of geriatric care, including dementia care, is increasingly being acknowledged. Dementia is a large societal problem affecting all communities, regardless of race or ethnicity, and understanding dementia for specific groups is tremendously important for both clinical knowledge and for health planning as a nation. This third edition of *Ethnicity and the Dementias* offers invaluable background information in this area, while also examining how those suffering from dementia and their family members respond or adapt to the challenges that follow. Thoroughly updated and revised throughout, the book features contributions from leading clinicians and researchers in the

field, with particular attention given to genetic and cultural factors related to dementia, effective prevention and treatment strategies, and issues in caregiving and family support. Chapters offer specific recommendations for dementia care in eleven ethnic/racial groups, as well as suggestions for working effectively with LGBTQ families. Providing a truly comprehensive resource on ethnicity and dementia, and including reflections on emerging trends and the future of caregiving, this new edition is ideal reading for clinicians, educators, researchers, policy makers, and families, in search of the most current ethnogeriatric findings.

Geriatric Psychiatry Ana Hategan, James A. Bourgeois, Calvin H. Hirsch, Caroline Giroux, 2024-03-29
This textbook presents real-world cases and discussions that introduce the various psychiatric syndromes found in the aging population before delving into the core concepts covered by geriatric psychiatry curricula. The text follows each case study with the vital information necessary for physicians in training, including key features of each disorder and its presentation, practical guidelines for diagnosis and treatment, clinical pearls, and other devices that are essential to trainees in geriatric psychiatry. With the latest DSM-5-TR guidelines and with rich learning tools that include key points, review questions, tables, and

illustrations, this text is the only resource that is specifically designed to train both US and Canadian candidates for specialty and subspecialty certification or recertification in geriatric psychiatry. It will also appeal to audiences worldwide as a state-of-the-art resource for practice guidance. The text meets the needs of the future head on with its straightforward coverage of the most frequently encountered challenges, including neuropsychiatric syndromes, psychopharmacology, elder care and the law, substance use disorders, psychiatric comorbidities in systemic medical illness, consultation-liaison psychiatry, palliative care, climate change and health, and equity/diversity/inclusion matters in the care of older adults. Written by experts in the field, *Geriatric Psychiatry: A Case-Based Textbook*, 2nd edition will be the ultimate resource for graduate and undergraduate medical students and certificate candidates providing mental health care for aging adults, including psychiatrists, psychologists, geriatricians, primary care and family practice doctors, neurologists, social workers, nurses, and others.

Molecular Mechanism of Alzheimer's Disease Ian Macreadie, 2019-10-25 Alzheimer's disease (AD) is an age-related neurological disease that affects tens of millions of people, in addition to their carers. Hallmark features of AD include plaques composed of amyloid beta, as well as neurofibrillary tangles of tau protein. However, despite more than a century of study, the cause of Alzheimer's disease remains unresolved. The roles of amyloid beta and tau are being questioned and other causes of AD are now under consideration. The contributions of researchers, model organisms, and various hypotheses will be examined in this Special Issue.

Minority and Cross-Cultural Aspects of Neuropsychological Assessment F. Richard Ferraro, 2015-07-16 Minority and cross-cultural psychology is more relevant now than ever in our diverse world. Given the dramatic local and global changes occurring daily with regard to demographics, population changes, and immigration issues, minority and cross-cultural psychology is fast becoming a respected and critical area of scientific study. Pair that with the fact that people of all cultures and racial groups are living longer and experiencing age-related diseases and disorders, one can easily see the need for additional work on issues related to neuropsychological assessment. This new edition brings to the forefront recent developments by seasoned experts in the field. They offer up their newest projects in minority and cross-cultural aspects of neuropsychological assessment and are joined by new, up-and-coming professionals across a wide array of disciplines including psychology, medicine, and neuropsychology. Like the first edition, this updated collection sheds light on the ever-growing need for adequate neuropsychological assessment to a wider subset of individuals, crossing many cultural and minority barriers in the process. Continuously pushing the boundaries of neuropsychological assessment, this collection is essential reading for cognitive and clinical psychologists, and neuropsychologists, and a model text for advanced courses dealing with minority and cross-cultural issues.

Handbook of Research on Neurocognitive Development of Executive Functions and Implications for Intervention Alcantud-Marín, Francisco, López-Ramón, María Fernanda, Navarro-Pardo, Esperanza, Moreno-Campos, Veronica, Alonso-Esteban, Yurena, 2022-03-18 Executive functions develop during the first years of life and determine future learning and personal development. Executive dysfunction is related to various neurodevelopmental disorders, so its study is of great interest for intervention in children with neurotypical development and in those who have suffered a neurodevelopmental disorder. The Handbook of Research on Neurocognitive Development of Executive Functions and Implications for Intervention offers updated research on executive functions and their implication in psychoeducational intervention. It establishes a multidisciplinary context to discuss both intervention experience and research results in different areas of knowledge. Covering topics such as childhood inhibitory processing, mindfulness interventions, and language development, this major reference work is an excellent resource for psychologists, medical professionals, researchers, academicians, educators, and students.

(Pushing) the Limits of Neuroplasticity Induced by Adult Language Acquisition Jurriaan Witteman, Leticia Pablos-Robles, Maria Carmen Parafita Couto, Niels Schiller, Yiya Chen, Patrick Wong, 2018-11-08 Most adults attempt to learn a second or even third language at some point in their life. Since language exposure is one of the most intense cognitive training regimes one can encounter, it is not surprising that previous research has shown that multilingualism can induce profound change in the brain or 'neuroplasticity'. What remains unclear is the scope of such adult language learning induced neuroplasticity. In other words, much is yet to be investigated about the factors that limit or promote adult language learning induced neuroplasticity. On the one hand, the present research topic discusses research that sheds light on neural

mechanisms that limit adult language learning induced neuroplasticity such as: neural mechanisms of first language interference in the acquisition of a second language and reduced opportunity for language induced neuroplasticity due to aging. On the other hand, the Research Topic discusses factors that could enhance non-native language learning (and underlying neuroplastic mechanisms), such as the duration of the training regime, language aptitude, and meta-linguistic awareness. Therefore, the goal of the present Research Topic is to examine both the limits of neuroplasticity in adult language learning and the ways to push beyond those limits. Understanding of such limits and frontiers to push beyond the limits is not only theoretically fundamental but could also have practical implications for enhancing language training programmes.
