The Glycemic Index Elena Philippou, 2016-09-19 In 1981, David Jenkins, Thomas Wolever, and colleagues introduced the concept of the glycemic index (GI) to differentiate carbohydrates based on the rate of blood glucose rise following their consumption. Although GI was first used in diet therapy for diabetes, research evidence has accumulated since then to thousands of publications from all over the world with applications for prevention and/or management of many diseases, as well as effects on physiological states and exercise. The Glycemic Index: Applications in Practice has gathered together, in an unbiased and critical way, all the evidence and research on GI, including diabetes, cardiovascular disease, cancer, obesity, polycystic ovary syndrome, pregnancy outcomes, sports performance, eye health, and cognitive functioning. It provides a detailed explanation on how to correctly measure a food's GI, how the GI of food products can be altered, as well as the use and misuse of GI labelling around the globe. The contributors are either pioneers or experts in the area of GI from all around the globe, including Australia, Canada, Europe, and the United States. The book is a valuable source of information for healthcare professionals of various disciplines, nutritionists, dietitians, food scientists, medical doctors, sports scientists, psychologists, public health (nutrition) policy makers, and students in these fields, as well as an important addition to university libraries.

The Glycemic Index Diet Guide Kate Bush, Do you want to lose weight and keep it off? Increase your energy levels? The claim: You'll lose (or maintain) weight while cutting your risk of heart disease and Type 2 diabetes. The theory: Eating "good" carbs - bran cereal and many fruits and veggies, such as apples and carrots, for example - controls appetite and delays hunger, promoting weight loss. "Bad" carbs, such as white bread and instant mashed potatoes, are quickly digested and released into the bloodstream, spiking blood sugar and making you hungry sooner. The glycemic index (GI) is a measure of a carb's effect on blood sugar. Good carbs are lower on the glycemic index. They are digested slowly, so you feel fuller longer, and your blood sugar and metabolism don't go out of whack. Why Low GI Not all carbohydrate foods are created equal, in fact they behave quite differently in our bodies. The glycemic index or GI describes this difference by ranking carbohydrates according to their effect on our blood glucose levels. The low GI diet is the secret to long-term health reducing your risk of heart disease and diabetes and is the key to sustainable weight loss. Why Vegetarian? The Science/Scripture Connection R.W. Noble,2010-05 Dr. Noble has practiced medicine for 45 years. He has been relentless in searching for expanded answers to health and healing, starting over 60 years ago and has continued in this pursuit since retiring 3 years ago. He will soon be 84 years of age. His focus has been on natural methods without abandoning his basic medical knowledge, but has maintained an open mind to more integrative therapies. In 1960, he graduated from Southwestern Medical School and practiced medicine till retirement. All through those years he researched nutrition, acupuncture, antiaging medicine, allergy, chiropractic and now, Mind/Body Medicine. He also studied in France, Holland and Vienna. It is his current opinion that a new science has uncovered a previously hidden major cause of illness for which Biblical scripture can provide for both healing and prevention and frequently be combined with modern medicine for greatly improved results. He realizes that most disciplines of modern medicine are necessary to establish the best preventive approach by embracing those already mentioned, but that Mind/Body Medicine must always be included. Ideal health requires both scientific and scriptural application. He noticed a pattern, a template, a paradigm between science and scripture. A parallel between the response of the immune system as it monitors and controls the separate effects, whether from positive or negative emotions compared to the positive or negative outcomes when scriptural directives are either followed or denied. This new science is Psychoneuroimmunology. Dr. Noble would like to provide you with knowledge gained through research and many years of experience so you can enjoy better personal health while building God's Healthy Temple.

He is a graduate of the University of Texas Southwestern Medical School at Dallas. He has been certified in Family Practice A Diplomate in the American Board of Family Practice A Diplomate in the American Board of Antiaging Medicine A Fellow in the American Academy of Family Physicians.
