Modernism Revisited Viorica Pâtea,Paul Scott Derrick,2007 Offering essays from some of the leading academic writers

and younger scholars in the field of American studies from both the United States and Europe, this volume constitutes a rich and varied reconsideration of Modernist American poetry. Its contributions fall into two general categories: new and original discussions of many of the principal figures of the movement (Frost, Pound, Eliot, Williams, Cummings and Stevens) and reflections on the phenomenon of Modernism within a broader cultural context (the influence of Haiku, parallels and connections with Surrealism, responses to the Modernist accomplishment by later American poets). Because of its mixture of European and American perspectives, *Modernism Revisited* will be of vital interest to students and scholars of American literature and Modernism in general and of twentieth-century comparative literature and art.
