H. G. Wells

Los primeros hombres en la luna H. G. Wells,2021-04-21 Mientras me siento a escribir aquí, en medio de las sombras de las hojas de parra bajo el cielo azul del sur de Italia, me doy cuenta, no sin cierto asombro, de que mi participación en estas asombrosas aventuras del señor Cavor fue, después de todo, el resultado del más puro accidente. Podría haber sido cualquiera. En esta novela, una de las más aclamadas del maestro de la ciencia ficción, H.G. Wells, encontramos el relato del viaje a la Luna que emprenden sus dos protagonistas, Bedford y Cavor. Siendo muy diferentes entre sí, (el señor Bedford es un empresario arruinado, un hombre pragmático que se ha retirado al campo con la intención de escribir una obra de teatro, mientras que el Dr. Cavor es un brillante a la par que excéntrico científico, un hombre siempre perdido en su mundo interior), juntos forman un dúo brillante para emprender una aventura. Deciden viajar a la Luna, gracias a que el Dr. Cavor logra inventar la favorita, una sustancia anti-gravitatoria compuesta de helio y metales fundidos, con la que consiguen recubrir la nave espacial que los llevará, una vez superadas las primeras dificultades y fracasos, hasta el hasta ahora inexplorado satélite terrestre. En su destino se encontrarán con una civilización extraterrestre, a los que bautizarán como selenitas, seres organizados en una férrea estructura jerárquica propia de un tiempo medieval, en la que cada habitante ha sido asignado de antemano una tarea a desempeñar. De esta forma, Wells, en vez de recurrir para su investigación a la hora de crear una historia creíble a los escasos y tampoco muy fiables datos técnicos y científicos que se conocían en la época acerca de la Luna, prefiere crear un escenario de fantasía más propicio para una novela de aventuras. Además de las aventuras de los humanos y selenitas, este relato contiene una de las reflexiones constantes en su literatura: hasta dónde el individualismo humano resulta tan peligroso como el colectivismo totalitario, tendencias y actitudes representadas con los distintos personajes y sus conflictos internos. H. G. Wells fue un reconocido escritor y biólogo inglés. Entre sus obras más reconocidas están La Máquina del Tiempo, La Guerra de los Mundos y la Isla del Dr. Moreau. Fue nominado cuatro veces al premio Nobel de Literatura, y predijo el descubrimiento de aviones, tanques, viaje espacial y la televisión satelital años antes de su existencia.

Los primeros hombres en la luna H G Wells,2021-02 Los primeros hombres en la Luna de H.G. WellsACERCA DE LOS PRIMEROS HOMBRES EN LA LUNA¿Por qué la gente lee ciencia ficción? Con la esperanza de recibir escritos como este: una visión deslumbrantemente precisa de las cosas que no se ven; una belleza absolutamente inesperada pero necesaria .

Eso dice Ursula K. Le Guin en su Introducción a Los primeros hombres en la Luna, la historia de viajes espaciales de 1901 de HG Wells. Muy criticado en su publicación por sus fantásticas ideas, ahora se considera con justicia un clásico de ciencia ficción. Cavor, un científico brillante que accidentalmente produce una sustancia que desafía la gravedad, construye una nave espacial y, junto con el materialista Bedford, viaja a la luna. El fríamente intelectual Cavor busca conocimiento, mientras Bedford busca fortuna. En lugar de la perspicacia y el oro, se encuentran con los selenitas, una raza horrible de criaturas diseñadas biológicamente que defienden su hogar con saña y con éxito.

Los primeros hombres en la Luna Herbert George Welles, 2017-02-09 Los primeros hombres en la luna (en inglés The First Men in the Moon) es una novela de romance científico de 1901 escrita por el británico H. G. Wells. Relata el viaje a la Luna por parte de los dos protagonistas principales: el empobrecido empresario Mr. Bedford, y el brillante pero excéntrico científico Dr. Cavor, el creador de una sustancia anti-gravitatoria (obtenida a base de Helio y metales fundidos) a la que bautiza como cavorita. Con ella recubren una rudimentaria nave espacial que, de este modo, asciende sin peso en dirección a la Luna; al llegar descubren que está habitada por una civilización extraterrestre, que habita las cavernas del subsuelo, que deciden llamar selenitas.

Los primeros hombres sobre la luna suponen una de las obras más conocidas de su autor, el pionero de la ciencia ficción H. G. Wells. Biografía de H. G. Wells Escritor y filósofo británico, H. G. Wells fue uno de los primeros escritores de ciencia ficción, género con el que consiguió convertirse en un clásico de la literatura de anticipación. Nacido en 1866, tuvo varios trabajos y comenzó a formarse en Biología. Debido a su falta de recursos económicos, tardó varios años en licenciarse. Poco después, debido a problemas físicos, decidió dedicarse a la escritura de manera constante. Su obra es prolífica, con más de cien libros y multitud de cuentos, y en ella podemos encontrar tanto obras de ciencia ficción, como La guerra de los mundos (1898) o La máquina del tiempo (1895) -ambas llevadas al cine en más de una ocasión-, como obras de corte social, Tono Bungay (1909), o centradas en el estudio de la historia. De fuertes convicciones políticas, H.G. Wells defendió la posibilidad de una sociedad utópica, y criticó duramente a políticos y mandatarios, sobre todo en relación a los conflictos

armados y las guerras mundiales. Wells murió en Londres el 13 de agosto de 1946.

Los Primeros Hombres en la Luna H G Wells Wells,2024-10-16 El señor Bedford, un joven empresario en bancarrota, encuentra una inesperada oportunidad cuando conoce al doctor Cavor, un científico excéntrico que está a punto de descubrir un material capaz de bloquear la gravedad: la cavorita. Este hallazgo revolucionario les permite construir una esfera que puede viajar a la Luna. Motivados por el deseo de riqueza y conocimiento, ambos se embarcan en una aventura sin precedentes. Sin embargo, al llegar al satélite, descubren un mundo desconocido con noches gélidas, días abrasadores y una enigmática civilización lunar llamada los selenitas. ¿Podrán enfrentar los peligros de este nuevo mundo y regresar a la Tierra? Publicado en 1901, Los Primeros Hombres en la Luna de H.G. Wells es una obra pionera de la ciencia ficción que combina los conocimientos científicos de su época con una imaginación desbordante. La novela explora temas como la exploración espacial, el encuentro con formas de vida extraterrestre y las consecuencias éticas de la ambición humana. Con elementos emocionantes como viajes interplanetarios y sociedades alienígenas, Wells nos ofrece una aventura que invita a reflexionar sobre nuestra propia sociedad y el rumbo del progreso. La traducción de este libro fue realizada por Joaquín de la Sierra, quien se especializa en la traducción de textos clásicos al español. De la Sierra no es ajeno a los trabajos de H.G. Wells; ya ha traducido La Guerra de los Mundos y numerosos relatos cortos del autor, otorgándole una gran experiencia para asegurar que esta traducción sea fiel al original.

The Reception of H.G. Wells in Europe Patrick Parrinder,John S. Partington,2013-02-14 H.G. Wells was described by one of his European critics as a 'seismograph of his age'. He is one of the founding fathers of modern science fiction, and as a novelist, essayist, educationalist and political propagandist his influence has been felt in every European country. This collection of essays by scholarly experts shows the varied and dramatic nature of Wells's reception, including translations, critical appraisals, novels and films on Wellsian themes, and responses to his own well-publicized visits to Russia and elsewhere. The authors chart the intense ideological debate that his writings occasioned, particularly in the inter-war years, and the censorship of his books in Nazi Germany and Francoist Spain. This book offers pioneering insights into Wells's contribution to 20th century European literature and to modern political ideas, including the idea of European union.
