Handbook of Research on Management Techniques and Sustainability Strategies for Handling Disruptive Situations in Corporate Settings Perez-Uribe, Rafael, Ocampo-Guzman, David, Moreno-Monsalve, Nelson Antonio, Fajardo-Moreno, William Stive, 2021-06-25 Faced with chaotic environments, it is not possible to make totally efficient forecasts, especially when it is necessary to analyze events with multiple variables and micro, small, and medium enterprises (MSMEs) constantly face events that escape the laws of the market. The handling that has been given to the crisis caused by the coronavirus has been trial and error, and the economic, social, and environmental results remain to be seen. The markets and the world are chaotic. With the markets in chaos due to the COVID-19 pandemic, it is important to look at the methods used in these environments to promote business success. The Handbook of Research on Management Techniques and Sustainability Strategies for Handling Disruptive Situations in Corporate Settings elaborates on the skills, techniques, and tools that are more useful for these environments and identifies what makes companies that work well in organizational chaos and in chaotic economic environments perform better than companies that are well organized. Covering topics such as strategic management, multidimensional chaos approach, and the global unstable market, this book is essential for managers, executives, academicians, policymakers, entrepreneurs, researchers, undergraduate and graduate business students, and any person interested in state-of-the-art business issues.

Proceedings of the 3rd International Civil Engineering and Architecture Conference Marco Casini, 2024-02-05 This book collects the scientific proceedings presented during the 2023 The 3rd International Civil Engineering and Architecture Conference” held in Kyoto in March 2023 with the aim of showing the latest advancements in theoretical and applied research in the architecture, engineering, and construction (AEC) sector. Worldwide, the growing demand is for green and smart buildings that are perfectly integrated into the surrounding environment, have efficient energy and resource consumption, use environmentally friendly materials and renewable energies, favor recycling and reuse, and offer improved indoor comfort and air quality. The book provides readers with an overview of the ongoing transformation of the AEC

industry presenting a thorough investigation of the emerging trends and challenges in the fields of green building design, construction and operation. Its content caters to researchers, engineers and architects working in the field of theoretical, experimental and practical civil engineering and architecture.

Investigación en Salud y Desarrollo David Padilla Góngora, Rubén Trigueros Ramos, José María Aguilar Parra, Remedios López Liria, 2020-05-06 La adaptación es un tema central de muchas perspectivas contemporáneas sobre el desarrollo del niño y el adolescente. Estas perspectivas, que incluyen la ecología humana y los sistemas de desarrollo por nombrar sólo dos, destacan los procesos en curso por los que los jóvenes se sincronizan con los contextos y entornos en los que viven. Tales enfoques están bien representados en las páginas de Psicología del Desarrollo. Sin embargo, la investigación sobre otra forma importante de adaptación ha estado mucho menos representada en la revista: los mecanismos de adaptación condicional. El funcionamiento de esos mecanismos refleja la forma en que la selección natural ha configurado el cerebro en desarrollo para responder a los diferentes contextos ambientales -buenos y malos- de una manera evolutivamente adaptable. La teoría y las investigaciones sobre las adaptaciones condicionales son pertinentes para comprender las respuestas del desarrollo de los niños no sólo a los entornos de alto riesgo, como la exposición a la negligencia de los padres o a la pobreza, sino también a los entornos de gran apoyo. El paradigma científico dominante para explicar la adaptación de

los niños a entornos de alto riesgo podría denominarse modelo de desarrollo psicopatológico. El modelo central del modelo es la suposición implícita, si no explícita, de que los entornos de alto riesgo afectan negativamente al bienestar de los niños y promueven trastornos del desarrollo, aunque no sean trastornos clínicos propiamente dichos. Esto ha llevado a los investigadores a centrar su atención en los efectos deletéreos de los factores de estrés en el hogar, el vecindario y la escuela y sus alrededores sobre los resultados de la salud mental, y especialmente el riesgo de psicopatología. El comportamiento disfuncional en la infancia y la adolescencia se considera a menudo la consecuencia natural de la exposición a contextos socioecológicos duros, impredecibles o incontrolables. Por consiguiente, el modelo de psicopatología del desarrollo hace hincapié en los costos e ignora en gran medida los beneficios de las respuestas de los niños a los entornos de riesgo, lo que dificulta la explicación de los motivos de los niños y adolescentes para su comportamiento. Esto ha llevado a muchos psicólogos del desarrollo a considerar esas respuestas (por ejemplo, la externalización del comportamiento en la infancia, el comportamiento imprudente en la adolescencia) como problemas que necesitan una solución. Una perspectiva de desarrollo evolutivo desafía este punto de vista predominante. Dado que los entornos de crianzas estresantes y de apoyo siempre han formado parte de la experiencia humana, los sistemas de desarrollo han sido moldeados por la selección natural para responder de manera adaptable tanto a los contextos de desarrollo supuestamente positivos como a los negativos. Por consiguiente, cuando los niños se encuentran con entornos estresantes, no se perturba tanto su desarrollo como se dirige o regula hacia estrategias que son adaptables en condiciones estresantes, incluso si esas estrategias son actualmente perjudiciales para el bienestar a largo plazo del individuo o de la sociedad en su conjunto. Por el contrario, cuando los niños se encuentran con entornos bien dotados de recursos y de apoyo, dirige o regula el desarrollo hacia estrategias que son adaptables en esos contextos

Advances and New Perspectives in Higher Education Quality Maria Esteban, Ana B. Bernardo, Ellian Tuero Herrero, Joana R. Casanova, Antonio Cervero, 2024-04-22 The changes that have occurred in today's society require Higher Education to be highly efficient in the academic and professional preparation of young people who enter university. For that reason, universities around the globe have been advocating in recent years for an improvement in the quality of teaching-learning processes. As an example, the World University Consortium (2023) currently presents, among its most urgent and priority objectives, the identification of the best evaluative practices of the educational processes that are carried out at the University, as well as the recognition of the actions aimed at improving educational processes based on scientific evidence. In this way, it seeks to distinguish all those educational actions that are at the forefront; going from actions at the micro level, such as individual teaching practices in the classroom (such as the application of the flipped classroom or the use of augmented reality); up to actions taken at the macro level such as those proposed in the Horizon Europe 2020 strategy.

Human-Computer Interaction Vanessa Agredo-Delgado, Pablo H. Ruiz, Carlos Augusto Meneses Escobar, 2025-05-29 This book constitutes the refereed proceedings of the 10th Iberoamerican Conference on Human-Computer Interaction, HCI-COLLAB 2024, held in Pereira, Colombia, during June 4–7, 2024. The 26 full papers presented here were carefully selected

and reviewed from 85 submissions. Among the topics addressed in this edition were key areas such as accessibility, usability, video games and gamification, computational thinking, Internet of Things (IoT), software engineering, information and communication technologies (ICT) in education, virtual, augmented and mixed reality applied to education, artificial intelligence in HCI, industry 4.0, infotainment systems, collaborative work and learning, cognition and interaction. The diversity and topicality of these topics reflect the breadth of the discipline and its relevance to meet the technological and social challenges of today's world.

Handbook of Research on Organizational Sustainability in Turbulent Economies Perez-Uribe, Rafael Ignacio,Salcedo-Perez, Carlos,Carvajal-Contreras, Andres,2022-04-15 Organizational sustainability and uncertain economies are key topics for modern organizations. New, updated knowledge about such matters is necessary for companies to ensure they are sufficiently prepared for future crises. Additional research is required in this area as the overall amount of material available is below par. The Handbook of Research on Organizational Sustainability in Turbulent Economies provides theoretical and practical evidence that demonstrates how the integration, adaptation, construction, and application of strategic models, methods, and tools can promote organizational sustainability for economies in situations of uncertainty. Covering topics such as work engagement and sustainable development goals, this major reference work is ideal for academicians, practitioners, policymakers, entrepreneurs, business owners, researchers, instructors, and students.

Metodologías activas con TIC en la educación del siglo XXI . Olga Buzón García,Carmen Romero García,2021 El actual reto de la educación es hacer que el alumnado sea el verdadero protagonista de su proceso de aprendizaje y que adquiriera las suficientes habilidades y destrezas, además de una verdadera asimilación de conceptos, para poder enfrentarse a una sociedad en constante cambio. Esto implica que los docentes deben poner en marcha múltiples y diferentes estrategias didácticas y pedagógicas que sean de calidad y que se adapten a las necesidades de los estudiantes, promoviendo

realmente una educación personalizada.
