Exploring Romanesque Architecture in Catalonia ,

Romanesque and the Past John McNeill, Richard Plant, 2024-11-01 The nineteen papers collected in this volume explore a notable phenomenon, that of retrospection in the art and architecture of Romanesque Europe. They arise from a conference organized by the British Archaeological Association in 2010, and reflect its interest in how and why the past manifested itself in the visual culture of the 11th and 12th centuries. This took many forms, from the casual re-use of ancient material to a specific desire to re-present or emulate earlier objects and buildings. Central to it is a concern for the revival of Roman and early medieval forms, spolia, selective quotation, archaism and the construction of histories. The individual essays presented here cover a wide range of topics and media: the significance of consecration ceremonies in the creation of architectural memory, the rise of pictorial concepts in 12th-century chronicles, the creation of history in the Paris of Hugh of St-Victor, and the appeal of the works of Bernward of Hildesheim and of Hrabanus Maurus in the centuries after their deaths. There are studies of buildings and the ideological purpose behind them at Tarragona, Ripoll, Cluny, Pannonhalma (Hungary), La Roccelletta (Calabria), and Old St Peter's, comparative studies of Trier, Villenauve and Glastonbury, and of Bury St Edmunds, Rievaulx and Canterbury, and wide-ranging papers on the tantalizing evidence for an engagement with an overseas past in Ireland, an Anglo-Saxon past in England, and a Milanese past among the aisleless cruciform churches of Augustinian Europe. The volume concludes with an assessment of the very concept of Romanesque.

Physical Activity: a Promising Modifiable Behavior to Protect Brain, Cognition, and Mental Health Across the Lifespan María Rodríguez-Ayllón, Yaira Barranco-Ruiz, Jose Mora-Gonzalez, Dario Bellón, 2025-08-20 Physical activity: a promising modifiable behavior to protect brain, cognition, and mental health across the lifespan Levels of physical activity are alarmingly low around the world. This is an ominous trend as numerous studies support the importance of engaging in physical activity for improving and/or maintaining a good health status across the lifespan. An emerging field of research also highlights the positive effect of physical activity on brain health, in particular for the promotion of cognitive functioning across the lifespan and the prevention of mental disorders in later life. According to the World Health Organization (WHO), brain health can be defined as the state of brain functioning across cognitive, sensory, social-emotional, behavioral, and motor domains, allowing a person to realize their full potential over the life course, irrespective of the presence or absence of

disorders. Therefore, the concept of “brain health” includes not only measurements of biological markers of the brain (e.g., structural brain morphology) but also psychological ill-being (e.g., depressive symptoms), and well-being (e.g., self-esteem) indicators, perceptions of quality of life, and cognitive function (e.g., attention and memory).

Latin American and Iberian Entrepreneurship João Leitão, Vanessa Ratten, Vitor Braga, 2022-05-19 Latin American and Iberian entrepreneurship represents a special kind of innovation, risk-taking, and futuristic business activity based on a common cultural heritage. There has been an increased interest in entrepreneurship related to specific cultural groups, and this edited book will be among the first to provide a Latin American and Iberian perspective to the study of entrepreneurship, thereby acknowledging the role of the Spanish and Portuguese diaspora and language on the global economy. Each chapter will focus on a different aspect of entrepreneurship related to countries within Latin America and Iberia. By combining both geographical groups, the authors aim to provide a better understanding of how Latin culture permeates entrepreneurial business activities.

Multidisciplinary Perspectives on Immigrant Health Mikolaj Stanek, Sol P. Juárez, Miguel Requena, 2025-02-17 This open access book analyses the ever-complex relationship between immigration and health in contemporary societies using the Spanish society as a case study. It addresses some of the main dimensions of migrant health in Spain, including migrant-specific vulnerability factors, health changes associated with time spent at the migratory destination, and differentiated problems of certain subpopulations of migrants. The book also examines some of the factors associated with migrant health and explores the mechanisms that might explain this nexus, such as early childhood development, adult and older age health conditions, health practices and coping skills, health culture, social support, physical environment, and access to medical care and health services. While contributing to the effort to create a more comprehensive view of the health status and outcomes of immigrants in developed societies, the book will prove to be a valuable resource to academics, health professionals, various levels of stakeholders and decision-makers, representatives of civil society, and NGOs.

The Use of Coercive Measures in Forensic Psychiatric Care Birgit Völlm, Norbert Nedopil, 2016-05-02 This book presents the legal context and describes the ethical and practical challenges when using coercive measures in forensic psychiatric settings. A wide range of aspects relevant to the use of such measures, including environmental, patient-related, and staff-related factors, are explored, and the experience of coercive interventions is described from the staff and the patient perspective. Differences in jurisdictions and examples of good practice are highlighted. The authors are from a range of professional backgrounds, ensuring breadth as well as depth in discussion of the topic. The use of coercive measures, in particular restraint, seclusion, and involuntary medication, for the control of aggression in psychiatry remains controversial.

Forensic mental health care deals with individuals who pose a risk to others and often present with significant management problems within institutions. The care of patients in these settings gives rise to debates about the balance between care and safety, and between the interests of the patients and those of the wider society to be protected. Despite these tensions, limited research has been conducted specifically on the use of coercive measures in forensic mental health care. This volume aims to fill the gap and will be of value to all professionals working in forensic psychiatric settings as well as to those working in general psychiatric and custodial settings, law professionals, and patients.

These multiple sensory modalities give us complementary sources of information about the environment. This book explores how we develop the ability to integrate our senses.

Long-Term Forensic Psychiatric Care Birgit Völlm, Peter Braun, 2019-05-16 This book provides an overview of forensic psychiatry, focusing on the provision of care in Europe as well as the legal and ethical challenges posed by long-term stays in forensic settings. Forensic psychiatric services provide care and treatment for mentally disordered offenders (MDOs) in secure in-patient facilities as well as in the community. These services are high-cost/low-volume services; they pose significant restrictions on patients and hence raise considerable ethical challenges. There is no agreed-upon standard for length of stay (LoS) in secure settings and patients' detainment periods vary considerably across countries and even within the same jurisdiction. Thus far, little research has been conducted to identify factors associated with length of stay; consequently, it remains unclear how services should be configured to meet the needs of this patient group. This volume fills some of those gaps. Furthermore, it presents new research on factors associated with length of stay, both patient-related and organisational. Various approaches to the provision of care for long-term patients in different countries are explored, including a few best practise examples in this specific area of psychiatry. The book also addresses the perspective of those working in forensic care by reviewing quality-of-life research and interviews with patients. The authors of this volume come from a range of professional backgrounds, ensuring a certain breadth and depth in the topic discussion, and even includes

patients themselves as (co-)authors.

Ageing and Nutrition through Lifespan Stefanos Tyrovolas,2020-12-29 Population is ageing at an unprecedented speed globally. As concept, ageing is considered a continuous process starting from birth and is accompanied by various physiological changes and a number of chronic diseases that affect health and quality of life. Ageing as a continuous process is depending on life course exposures to health risks, lifestyle and nutrition, socioeconomic background, and other factors. There is considerable interest among scientists regarding the direct and indirect effect of nutrition in optimal ageing. Nutrition has a beneficial effect in a variety of chronic disease that impact the process of ageing. Given the importance of this issue, the journal Nutrients is planning a Special Issue on "Ageing and Nutrition through Lifespan" with the aim of providing a source for accurate, up-to-date scientific information on this topic. We invite you and your co-workers to consider submission of your original research findings or a review article on the topic. Manuscripts should focus on the direct impact of specific food components, dietary patterns, energy intake, macro-, micro- nutrients, alcohol intake, food insecurity as well as malnourishment and appetite to the ageing process (healthy, active, successful ageing, frailty and other similar indices) across lifespan. In a similar way, we also welcome manuscripts that focus on the indirect effect of nutrition to the ageing process throughout the pathway of chronic disease (i.e., obesity, diabetes, depression and mental diseases).

Barcelona Felipe Fernández-Armesto,1992 Barcelona, like Spain itself, has in recent years attracted the gaze and fascination of the world. Chosen as the host city for the 1992 Summer Olympic Games, the international spotlight will soon focus on this beautiful, two thousand year-old city, furthering Barcelona's hopes for a lasting place on the world stage. But success has never come easily to this Spanish metropolis. Not blessed with a natural port, and checked throughout history by a series of natural disasters and military defeats, Barcelona has struggled hard to become the industrial and commercial first city of Spain, and the biggest urban center on the Mediterranean seaboard. And Barcelona's relationship with the rest of

Spain has always been strained by its status as the capital of the separatist Catalonian state. As this comprehensive and vividly written history makes clear, all of Barcelona's fluctuating fortunes are mapped out in its remarkably rich architectural and artistic heritage. While many associate the city with the distinctive, fin-de-siecle signature of the architect Gaudi, Fernandez-Armesto reveals Barcelona's many other faces. Tracing the legacies of the Roman occupation, the Middle Ages, the Renaissance, and the modern age, he illuminates the inherent tension that makes Barcelona one of the most vibrant, beautiful, and misunderstood cities of Western Europe.

Well-Being and Education: Current Indications and Emerging Perspectives Eirini Karakasidou,George Tsitsas ,Michael Galanakis,2024-10-16 School, apart from being a place of education and transmission of new knowledge, should also be a place of personal development and enhancement of students' well-being and mental resilience, while protecting mental health and preventing teacher burnout. The current covid-19 pandemic has made the need for psychological support for students and teachers more urgent than ever. The science of positive psychology has offered many tools and methods that

New tools, methods, and practices are needed to enhance the well-being and psychological resilience of students, teachers, and parents in a time of challenges such as the current pandemic and inflation that cause stress, uncertainty, and an increase in psychopathology.
