Autobiografia | La fine di Barth Salvatore Di Giacomo,2016-06-25 Autore molto apprezzato in Campania e quasi sconosciuto nel resto d'Italia (semmari più come poeta che come romanziere), Salvatore Di Giacomo doveva diventare medico. Nella prima parte dell'ebook, "Autobiografia", sarà lo stesso Di Giacomo a raccontarci le motivazioni del suo cambio di rotta. Nella seconda parte, con il racconto "La Fine Di Barth", capiremo perché ha fatto la scelta giusta.

Developments in Cardiac Implantable Electronic Device Therapy: How can we improve clinical implementation? Mate Vamos,Alexander Benz,Gabor Duray,Julia W. Erath,2023-06-27 The use of cardiac implantable electronic devices (CIEDs) has substantially increased in the last decades. They have a significant impact on reducing morbidity and mortality of patients suffering from cardiac arrhythmias and heart failure. Several developments of technical issues have appeared over recent years to improve safety and efficacy. However, their role in daily clinical practice is still unclear. For instance, different leadless technologies, such as leadless pacemakers, subcutaneous defibrillators or wearables are only partly or not included in the current guideline recommendations. There are also several attempts to improve clinical response to cardiac resynchronization therapy with multipoint or fusion optimized technologies, it is however not clear which patients really benefit from these. The same is true for novel conduction system pacing modalities: His-bundle pacing seems to be the most physiological but manually challenging compared to left bundle branch area pacing, which latter restores only the physiologic activation of the left ventricle but may be easier to perform. The classical indications for primary prophylactic ICD are also questioned based on some new study results, highlighting the need for an improved, more detailed and individual risk stratification for better patient selection. We have important but somehow controversial study results regarding preventive antibiotic therapy (incremental perioperative antibiotics vs antibiotic-eluting envelope) during CIED implantation. Lead extraction tools are also expanding but randomized controlled trials regarding the best approach are completely missing in this field. The importance of remote monitoring is also constantly growing, especially in the current pandemic times, the best way of patient selection needs however more research.

Oltre la Linea Bianca Ettore Zanca, Enrico è un calciatore a fine carriera che può dare una svolta alla sua vita, professionale e umana. Un amico che gli deve un favore e un compagno di squadra potrebbero essere decisivi per una scelta definitiva. Ma il piano che aveva preparato per il suo giro di boa si rivela un sentiero irto di ostacoli, e il salto oltre la linea

bianca sarà più complesso del previsto. UNISCITI AL GRUPPO FACEBOOK GLI AMICI DI URBAN APNEA EDIZIONI:

*Río La Venta* Giovanni Badino, 1999

La ragazza unicorno Giulia Sara Miori, 2024-04-03T00:00:00+02:00 Nel giorno del suo compleanno, il 27 gennaio 2022, alle 18.41, il signor Cattaneo esce dal suo ufficio, viene rapito da due loschi figuri e portato, bendato, in un luogo che, quando riapre gli occhi, scopre essere tutto bianco. Il signor Cattaneo medesimo ha avuto in consegna abiti che sono essi stessi tutti bianchi. I due rapitori hanno l'aspetto dei rapitori: cappello, occhiali da sole, sigaretta in bocca. Lo interrogano sul suo lavoro, sui suoi gusti, sulla moglie dalla quale ha divorziato e che non sente da cinque anni, sulle sue abitudini sentimentali, per non dire sessuali. Il signor Cattaneo risponde, in qualche modo non ha paura, in qualche modo capisce che i due che gli stanno di fronte somigliano a qualcuno che ha già visto e, soprattutto, sanno sul suo conto più cose di quante ne sappia lui stesso. Ma chi è la ragazza unicorno? E cos'ha a che fare con quest'uomo apparentemente anonimo e senza pretese? Con un racconto veloce e preciso, comico e tragico, Giulia Sara Miori, che con quest'opera esordisce nel romanzo, insegue - come i due rapitori - un uomo incapace di guardarsi dentro. Un uomo che rifiuta di capirsi, e che dopo essersi capito per caso e non per intenzione, ovviamente, rifiuta di assolversi. Sembrerebbe quest'uomo, il signor Cattaneo, un eroe contemporaneo, e in qualche modo lo è, questo suo rifiuto dell'introspezione è infantile e titanico. Al signor Cattaneo viene data l'occasione di vivere e osservare ciò che è, una nuova coscienza, ma decide che con questa chiarezza non ci farà niente di niente. Tra Kafka e Bulgakov, un esordio fulminante dove la realtà si confonde con la finzione. Il romanzo per tutti coloro che neanche quando vengono rapiti riescono a guardarsi dentro.

**Meridiana 102: Solidarietà e lavoro** Autori Vari, 2022-03-08T17:27:00+01:00 Obiettivo di questo fascicolo di Meridiana è ribaltare il tradizionale percorso di riflessione promosso dagli studi sulle mobilitazioni dei lavoratori in ambito storico-sociale, il cui focus è stato spesso costituito da una interpretazione della lotta quale elemento accentratore delle pratiche di solidarietà. Nel nostro caso invece si è deciso di esplorare il tema della solidarietà del lavoro in contesti trasformativi, portando al centro dell'analisi non la lotta ma le relazioni interpersonali e le reti sociali che fanno da ponte tra gruppi di lavoratori altrimenti separati, culturalmente distinti o geograficamente distanti, ma anche tra quei lavoratori poco «inclini» al conflitto manifesto o professionalmente isolati. Il tema attorno al quale abbiamo scelto di inquadrare le questioni del lavoro riguarda la solidarietà, intesa quindi come disposizione a creare legami di supporto reciproco e pratiche di collaborazione. La solidarietà a lavoro dialoga costantemente con il tema delle mobilitazioni che abbiamo preferito declinare come «movimenti» per cogliere allo stesso tempo i mutamenti del lavoro, ovvero le sue trasformazioni in termini di organizzazione, condizioni e relazioni e le eventuali mobilitazioni che ne conseguono, coinvolgendo i lavoratori e le società nelle quali il lavoro viene caricato di senso. I saggi raccolti in questo numero esplorano in primo luogo le ragioni e i fattori

materiali e culturali che favoriscono o ostacolano l'unione dei lavoratori in contesti di mutamento: chi stabilisce relazioni solidali e per quali ragioni? Le solidarietà a lavoro sono state colte tra le maglie delle trasformazioni del lavoro, a dimostrazione del fatto che esse si concretizzano simultaneamente ai processi trasformativi e non a posteriori come risultato di un evento esclusivo o fatto improvviso quale può essere lo sciopero. Il tema della solidarietà, a sua volta, è servito a interrogare il contenuto e la funzione del secondo significato del concetto di movimenti, ovvero la capacità di azione dei lavoratori. La strada che abbiamo seguito per un'analisi sistematica della connessione tra i movimenti e le solidarietà del lavoro parte dalla constatazione che le relazioni solidali tra i lavoratori non possono essere dedotte a priori ma solo osservate empiricamente e ricostruite contestualmente, dal momento che gli attori interessati appartengono a gruppi sociali elastici e mutevoli. Intrecciando questi tre temi chiave - i movimenti, le solidarietà e il lavoro - questo numero di «Meridiana» vuole contribuire alla conoscenza scientifica sulle trasformazioni del lavoro, estendere gli scopi empirici e concettuali della letteratura esistente sulle mobilitazioni e alimentare il dibattito sociale sulla possibilità di fare rete. A tal fine, si sono scelti alcuni casi studio portati avanti negli ultimi anni sia in Italia che fuori da questa, comparando quindi i risultati di ricerche sui lavoratori della Fiat a Melfi così come sugli operai che occuparono ed autogestirono le fabbriche in Argentina ed in Francia; il lavoro volontario dei richiedenti asilo in Italia e la riappropriazione di spazi e pratiche rurali in Val Susa come conseguenza ai movimenti No Tav.

*Mekvle* Maurilio Mangano, 2017-10-26 Tblisi, Georgia, Natale. Ci sono luoghi del pianeta inesplorabili, inevitabilmente tagliati fuori dai circuiti canonici del turismo commerciale. In quest'ottica la narrazione in presa diretta diventa salvifica, vettore insostituibile di documentazione, conoscenza, alimentazione. Maurilio Mangano, con la naturalezza del veterano e l'occhio di una macchina da presa, ci conduce per mano nelle vesti di "Mekvle" ad una festa di Natale in cui il vuoto economico e sociale di un'umanità malconcia viene riempito dalla commozione dei piccoli gesti.

**Volcanism in the Campania Plain**, 2006-08-24 The book deals with the study of three important volcanisms in the Campania Plain: Vesuvius, Campi Flegrei and Ignimbrites. The knowledge of the volcanic evolution of Vesuvius and Campi Flegrei has a particular relevance because of the hazards that these volcanoes pose to the about 1.5 million people living in the Neapolitan area. The contributors to the volume bring new data (experiments on volatile solubility, fluid-melt inclusions, tectonic, geophysical, isotope, geochronology), which are helpful in the creation of new models for a better understanding of the behaviour of the volcanic systems. In particular a hydrothermal model is used to explain the ground movements (bradyseism) at Campi Flegrei. To develop such a model, the authors use an analogue for the evolving Campi Flegrei sub-volcanic system, the model of the porphyry mineralized systems. For Campanian Ignimbrite the authors highlight the impact crystal-liquid separation has on melt compositional evolution and particularly focus on trace element and Th isotope evidence for open-system processes in the magma body associated with the Campanian Ignimbrite. The authors, for their

interpretations, utilize thermodynamic and quantitative mass balance modelling of major and trace element data and semi-quantitative limits on Th and Sr isotopes to evaluate the role of crystal-melt separation, magma-fluid interaction, and assimilation of wallrock on the geochemical evolution of the Campamian Ignimbrite.

Vesuvius, Campi Flegrei, and Campanian Volcanism Benedetto De Vivo, Harvey E. Belkin, Giuseppe Rolandi, 2019-10-11

Vesuvius, Campi Flegrei, and Campanian Volcanism communicates the state-of-the-art scientific knowledge on past and active volcanism in an area characterized by elevated risk due to high-density population. Eruptions, lahars and poisonous gas clouds have killed many thousands of people over recorded history, but volcanoes have given people some of the most fertile soil known in agriculture. The research presented in this book is useful for policymakers and researchers from these and other countries who are looking for risk assessment and volcanic evolution models they can apply to similar situations around the world. Naples and its surrounding area, in particular, the area situated between Vesuvius and the Campi Flegrei volcanic area has a population in excess of 4 million people. The volcanic areas that have similarly large populations in proximity to dormant, but hazardous volcanoes, i.e., Indonesia and Central America can also benefit from this work. - Covers the fundamental science of volcanoes, including new developments in the last decade relating to the use of crystals and melt inclusions to model the nature and evolution of volatiles - Includes the latest research on volcanism in Southern Italy that is presented as a case study for active and inactive volcanoes across the globe - Presents research that is applicable around the world, for people, scientists and policymakers living on, or near, active volcanoes

**Greek Medical Papyri** Nicola Reggiani, 2019-09-23 The volume collects papers presented at the International

Conference Greek Medical Papyri - Text, Context, Hypertext held at the University of Parma on November 2-4, 2016, as the final event of the ERC project DIGMEDTEXT, aimed primarily at creating an online textual database of the Greek papyri dealing with medicine. The contributions, authored by outstanding papyrologists and historians of the ancient medicine, deal with a variety of topics focused on the papyrological evidence of ancient medical texts and contexts. The first part, devoted to

medical texts, contains some new reflections on important sources such as the *Anonymus Londinensis* and the Hippocratic corpus, as well as on specific themes like the pharmacological vocabulary, the official medical reports, the medical care in the Roman army. The second part collects papers about the doctors' context, providing highlights from broader viewpoints like the analysis of the writing supports, the study of the ostraka from the Eastern Desert, the evidence of inscriptions and philosophical texts. The third part is entirely focused on the DIGMEDTEXT project itself: the team members present some relevant key issues raised by the digitisation of the medical papyri.

**Papers on Quintilian and Ancient Declamation** Michael Winterbottom,2019-04-04 Declamation - the practice of training young men to speak in public by setting them to compose and deliver speeches on fictional legal cases - was central to the Greek and Roman educational systems over many centuries and has been the subject of a recent explosion of scholarly interest. The work of Michael Winterbottom has been seminal in this regard, and the present volume brings together a broad selection of his scholarly articles and reviews published since 1964, creating an authoritative and accessible resource for this burgeoning field of study. The assembled papers focus on two related topics: the rhetorician Quintilian and ancient declamation in practice. Quintilian, who taught rhetoric at Rome in the second half of the first century AD, was the author of the *Institutio Oratoria*, a key text for Roman educational practice, rhetoric, and literary criticism. Subjects explored in the present collection range widely over not only the establishment and interpretation of the text and its literary and historical context, but also Quintilian's views on inspiration, morality, philosophy, and declamation, of which he was a practitioner. While the volume also offers detailed examinations of the texts and interpretations of a wide range of Latin and Greek authors of declamations, such as Seneca the Elder, Sopatros, and Ennodius, there is a particular focus on two collections wrongly attributed to Quintilian, the so-called 'Minor' and 'Major Declamations'. A major re-assessment of the manuscript tradition of the latter collection is published here for the first time.
