GEOGRAFÍA Y MEDIO AMBIENTE FERNÁNDEZ FERNÁNDEZ, Antonio ,FIDALGO HIJANO, Concepción ,GONZÁLEZ MARTÍN, Juan Antonio ,PELLITERO ONDICOL, Ramón ,GARCÍA HERNÁNDEZ, Cristina ,RUIZ FERNÁNDEZ, Jesús ,GONZÁLEZ AMUCHASTEGUI, María José ,2022-08-30 El diccionario de la RAE define medio ambiente como el conjunto de circunstancias exteriores a un ser vivo. Esta definición sencilla y genérica encierra una extremada complejidad. De hecho, medio ambiente se puede definir como el sistema de elementos abióticos que sirven, a través de complejas interrelaciones, como soporte a la biosfera, es decir, al conjunto de la vida del planeta. Esta definición nos lleva rápidamente a una asociación con la ecología y el término ecosistema, pues el objeto de estudio de esta ciencia es las relaciones que se establecen entre los seres vivos (biocenosis) entre sí y con su entorno (biotopo), dando lugar a un ecosistema de distintas escalas. En este libro se analiza el medio ambiente desde el punto de vista geográfico y no ecológico. La Geografía es una disciplina que se adapta perfectamente al estudio ambiental, puesto que, desde su origen ha tenido al medio natural como objeto prioritario de su estudio.

Identities Matter Angela Ju,2025-03-21 Grandchildren of immigrants belonging to groups that have achieved high socioeconomic status choose which identities to leverage in the host country's political arena. The scholarship about political incorporation often assumes that immigrant groups and their descendants find it in their best interest to pursue mainstream political incorporation. Those immigrants who belong to ethnic minority groups might choose to engage politically in a number of ways, depending on their racial or economic status; Identities Matter: The Politics of Immigration and Incorporation looks at how descendants of minoritized groups who have achieved, generally speaking, high socioeconomic status choose to identify politically in their adopted nations. Contrary to many expectations about political and social incorporation of immigrants, it finds that assimilation is not necessarily advantageous for groups who are from or associated with countries that are more economically developed than their host country. When this is the case, these immigrant communities may choose to strategically associate themselves with the heritage country over the one in which they reside. The book draws on original research among third-generation Japanese and Jewish Brazilians to determine the seemingly paradoxical ways in which the descendants of immigrants choose which identities to emphasize in the political arena. It shows that immigrant communities' strategies of political incorporation and social integration are framed within where they

fall in existing ethno-racial and socioeconomic hierarchies, and that perceptions of discrimination drive third-generation descendants to vote in line with their ethnic interests. One particularly interesting finding is that in Brazil, a country that suffers from high levels of political corruption, Japanese Brazilian politicians are often incentivized to emphasize their Japanese-ness over their Brazilian-ness to convey to voters that they are more honest as political candidates than their more Brazilian opponents. Finally, ethnic community-based organizations allow these groups to leverage their identities transnationally.

Enseñar y aprender geografía para un mundo sostenible Jesús Granados Sánchez,Rosa María Medir Huerta,2021-12-01
Este libro quiere ser una contribución al marco de la educación para el desarrollo sostenible (EDS) para el 2030. Su principal objetivo consiste en presentar reflexiones y propuestas innovadoras en el campo de la didáctica de la geografía y la EDS, con la finalidad de avanzar en la mejora de los contenidos y en la manera como aprenden nuestros alumnos competencias geográficas y de EDS, de modo que ayuden a la transformación de la realidad y a la creación de un mundo más sostenible. La obra se estructura a partir de tres grandes secciones. La primera parte aborda la sostenibilización curricular en diferentes niveles educativos, es decir, se reflexiona sobre cómo introducir los contenidos, los valores y las competencias propios de la EDS en la enseñanza de la geografía. La sección reúne experiencias y propuestas innovadoras en didáctica de la geografía que facilitan la consecución de los objetivos de desarrollo sostenible. La segunda parte del libro se centra en el papel de la geografía en la construcción de una ciudadanía global sostenible y en ella se esbozan las competencias y los principios básicos. La tercera y última parte trata la didáctica del paisaje sostenible. El paisaje es un concepto e instrumento didáctico interdisciplinar que permite visualizar la forma que adquiere la sostenibilidad en distintos contextos geográficos. La sección presenta propuestas didácticas centradas en el trabajo por proyectos, los itinerarios didácticos por espacios naturales y el análisis de problemáticas ambientales localizadas en lugares concretos. La educación en paisaje sostenible es una educación para el futuro que es integradora, propositiva y creativa, y que promueve la identificación, el análisis, la evaluación de alternativas y la creación de paisajes sostenibles.

Municipios en Japón: breve descripción y contrastes con municipios mexicanos Jaime Villasana Dávila,2022-02-01 Este documento pretende generar un interés por los gobiernos municipales japoneses, quienes poseen numerosas capacidades y, aunque no se crea, también debilidades, según he podido constatar durante mis estancias en este país, siendo una de las más importantes el saber lidiar con el despoblamiento de sus zonas urbanas medias y rurales, debido al decrecimiento poblacional del país y a la muy alta atracción que representa la gran metrópoli de Tokio para la población joven. Se describe de manera breve la estructura del gobierno municipal en Japón, su operación y el perfil financiero.

GEOGRAFÍA DE LOS PAISAJES CULTURALES AZCÁRATE LUXÁN Blanca ,FERNÁNDEZ FERNÁNDEZ Antonio

,2017-09-14 El Paisaje Cultural es definido en el Plan Nacional de Paisaje Cultural como el resultado de la interacción en el tiempo de las personas y el medio natural, cuya expresión es un territorio percibido y valorado por sus cualidades culturales, producto de un proceso y soporte de la identidad de una comunidad. El paisaje cultural es una realidad dinámica y compleja que se gesta desde un paisaje natural por la intervención de un grupo humano: la cultura es el agente, y el área natural es el medio. El paisaje cultural es el resultado de esa transformación (Sauer, Carl O.). Así, el paisaje ha pasado a formar parte del patrimonio de los Estados y se ha convertido en un bien cultural que hay que fomentar, preservar, proteger y gestionar. En esta obra se abordan tres grandes grupos de paisajes: agrarios, urbanos e industriales, desde una perspectiva geográfica.

Atlas mundial de cocina y gastronomía Gilles Fumey,Olivier Etcheverria,2008-10 En la mesa, la sucesión de platos y bebidas, la paleta de sabores y texturas forman una unidad con una larga historia. Con frecuencia, llevan la marca de la civilización a la que pertenecen. Alrededor de la comida, cada sociedad inventa sus códigos y rituales, sorteá sus fobias y adopta determinados productos con los que luego se identifica. El Atlas mundial de cocina y gastronomía aborda, en primer lugar, los orígenes de la cocina, para pasar luego a describir la forma de cocinar y comer en los distintos continentes. A continuación, recoge los ingredientes que se utilizan para confeccionar los platos, los productos valiosos como la sal, el azúcar o el chocolate, así como las plantas emblemáticas de cada cultura como el trigo, el arroz o el maíz. Esta vuelta al mundo termina con un análisis de los best-sellers del gusto planetario. El Atlas aborda también los desafíos del siglo XXI: aunar el progreso tecnológico a la calidad, para evitar que, en aras de la globalización, hipotequemos un patrimonio milenario de prácticas, recetas, platos y gastronomía. Con más de cien mapas e infografías inéditas, el Atlas nos invita a recorrer toda una geografía gastronómica.

natural no es un fenómeno aislado, pese a tratarse de un hecho de cultura que ha conservado su individualidad en el transcurso de los siglos desde su implantación en Japón procedente de China. Más bien al contrario, la necesidad de comprenderlo comparativamente desde diferentes perspectivas y culturas parece haberse intensificado con el giro geográfico experimentado en las ciencias sociales durante las dos últimas décadas. El jardín japonés se entiende popularmente como una obra de arte, cuya representatividad contribuye a la construcción de una identidad cultural propia, por medio de la cual se escenifica una proyección social del sujeto o individuo perteneciente a la cultura que lo ha creado. La resonancia polisémica que sugiere su nombre lo convierte en una especie de arquetipo local y universal, que no puede abordarse separadamente sin tener en cuenta sus antecedentes y su finalidad, por ser la expresión de un enjambre de manifestaciones que define o identifica la complejidad de una cultura como la nipona. El arte de los jardines es indisociable de la idea de representación, tanto por el valor simbólico de sus elementos compositivos como por el carácter parlante que por lo general se les atribuye, sea cual sea la esencia de su decir y lo que éstos pueden llegar a comunicar. Por un lado, es una construcción espacial y geográfica que responde a una manera de entender el mundo o cosmología; y, por otro, la representación abreviada de un cosmos que es la expresión de una sociedad humana que construye una imagen de sí misma en un mundo de identidades movedizas y migrantes, reivindicando lo que está más allá de su carácter efímero para trascender su impermanencia.

Séptimo centenario de los estudios orientales en Salamanca A. AGUD... [et al.],2013-10-01 En el concilio celebrado en Vienne (Francia) en 1311, el papa Clemente V decretó un Canon en el que se autorizaba y ordenaba a las universidades de Salamanca, Oxford, París y Bolonia la enseñanza de lenguas orientales, en concreto, de «árabe, hebreo y caldeo». El canon conciliar de Clemente V no cayó en papel mojado y tuvo como consecuencia el comienzo inmediato en Salamanca de la enseñanza de lenguas orientales entre las que ocupó un lugar preferente el hebreo. De hecho, el hebreo permaneció en el elenco de enseñanzas de la Universidad de Salamanca desde esa fecha hasta la desamortización de Mendizábal (1836). Doscientos años más tarde (1521) se introdujeron las enseñanzas de hebreo en la Universidad de Alcalá que corrieron la misma suerte que los estudios de Salamanca con la mencionada desamortización. A mediados del s. XIX hubo un nuevo impulso de los estudio de hebreo que se introdujeron en las Universidades de Madrid, Barcelona y, una vez más, Salamanca. En nuestra Universidad, sin embargo, se vieron dramáticamente interrumpidos en 1936 y no se restauraron hasta 1990, si bien en Salamanca la Universidad Pontificia de Salamanca los había introducido ya en los años 70 del siglo pasado.

An Economic and Demographic History of São Paulo, 1850-1950 Francisco Vidal Luna,Herbert S. Klein,2018-06-12 São Paulo, by far the most populated state in Brazil, has an economy to rival that of Colombia or Venezuela. Its capital city is the fourth largest metropolitan area in the world. How did São Paulo, once a frontier province of little importance, become one of the most vital agricultural and industrial regions of the world? This volume explores the transformation of São Paulo through

an economic lens. Francisco Vidal Luna and Herbert S. Klein provide a synthetic overview of the growth of São Paulo from 1850 to 1950, analyzing statistical data on demographics, agriculture, finance, trade, and infrastructure. Quantitative analysis of primary sources, including almanacs, censuses, newspapers, state and ministerial-level government documents, and annual government reports offers granular insight into state building, federalism, the coffee economy, early industrialization, urbanization, and demographic shifts. Luna and Klein compare São Paulo's transformation to other regions from the same period, making this an essential reference for understanding the impact of early periods of economic growth.

Unknown Conflicts of the Second World War Chris Murray, 2019-01-10 Unknown Conflicts of the Second World War: Forgotten Fronts is a collection of chapters dealing with various overlooked aspects of the Second World War. The aim is to give greater depth and context to the war by introducing new stories about regions of the world and elements of the war rarely considered. These chapters represent new discussions on previously undeveloped narratives that help to expand our understanding of the interconnectedness of the war. It also provides an expanded view of the war as a mosaic of overlapping conflicts rather than a two-sided affair between massive alliance structures. The Second World War saw revolutions, civil wars, social upheaval, subversion, and major geopolitical policy shifts that do not fit neatly into the Allied vs. Axis 1939–1945 paradigm. This aim is to connect the unseen dots from around the globe that influenced the big turning points we think we know well but have really only a superficial understanding of and in so doing shed new light on the scope and influence of the war.

La Innovación Territorial como perspectiva dinámica de la Vida Territorial Sostenible Julio César Caro

Moreno, 2023-11-01 Esta propuesta —que representa una mirada alternativa— interpreta una visión geográfica que da prioridad a los procesos y efectos multidimensionales de la innovación en pro del buen vivir. El principal objetivo de esta investigación ha sido el de establecer una metodología y su respectiva aplicación, para determinar el nivel de innovación territorial, desde la perspectiva de la Vida Territorial Sostenible (en adelante VTS) para los departamentos que conforman el territorio de la República de Colombia. La perspectiva de la VTS propone que los actores territoriales sean quienes decidan y ejecuten el manejo de lo propio de manera ordenada y participativa, con el desarrollo de actividades en función de su potencial y su vocación, planificada, sostenible, aprovechando las oportunidades dadas por su localización y patrimonio territorial (físico, ambiental, cultural, simbólico y relacional), integradora de todos los elementos enunciados en función del equilibrio entre las dimensiones del sistema territorial. La innovación territorial (en adelante IT), se define como un proceso convergente y creador de nuevos o mejorados valores territoriales (socioculturales, ambientales, económicos y políticos) que generan ciertas dinámicas e integraciones dimensionales con grupos y sectores sociales que interactúan y modifican su entorno, que valoran el ambiente y apuntan sus esfuerzos hacia una vida más justa en los aspectos sociales, económicos y

políticos, todo bajo la perspectiva de la VTS. En tal sentido, se ha aplicado el método inductivo sistematizado en cuatro fases principales: en la primera, de tinte teórico-conceptual, se lleva a cabo el procedimiento analítico-descriptivo que desarrolla los conocimientos teóricos y cognitivos, formulando una teoría basada en la IT y en la VTS. La segunda fase, metodológico-técnica, determina los indicadores, pilares, variables y clústeres departamentales, que evidencien el nivel de IT-VTS. Por su parte, la fase tres, de validación y elaboración, evalúa el IT a través de su aplicación a nivel departamental. Finalmente, la cuarta fase de transferencia presenta las principales conclusiones a las que se ha arribado.

Innovation with Spatial Impact: Sustainable Development of the Brazilian Cerrado Akio Hosono,Nobuaki Hamaguchi,Alan Bojanic,2019-07-23 This book is unique and original, constituting a pioneering study in the use of spatial economics and related analytical approaches to Brazil's Cerrado agricultural development and the formation of agro-industrial value chains. This methodology is appropriate because Cerrado agriculture has been developed from scratch in a vast, previously barren area (204.7 million ha.) in which a spatial transformation has taken place. Until 40 years ago, this region, with its huge expanse of tropical savanna was believed to be unsuited to agriculture. Now, however, it has been transformed into an immense breadbasket, contributing to the mitigation of global food shortages. It also has contributed to the inland development of Brazil, promoting urbanization with a higher living standard and modern production techniques. This book identifies critical factors that enabled the transformation of the Cerrado. To understand the process of agricultural development and the formation of agro-industrial value chains, spatial economics and related approaches are essential because the process involves spatial interactions such as transportation, supply chains, knowledge spillovers, environmental constraints, migration, and urbanization. The book demonstrates that the initial development of Cerrado agriculture was a genuine spatial transformation with contributions from pioneering producers, agribusinesses, and central and local governments, as well as through international cooperation. It also discusses agriculture and agro-industrial value chains focusing on inclusive and sustainable development, a major concern of the international community particularly in terms of the Sustainable Development Goals.

New Geographies of Global Policy-Making Carolina Milhorance,2018-09-17 International institutions and agencies from the Global North are no longer the sole initiators of development norms and best practices. The proliferation of exports and imports of social, economic and policy management models have called for a rethinking of South-South relations. To date, most studies have focused on the drivers and strategies of international initiatives made by emerging powers; none have analysed the impact of these initiatives on the receiving country's institutions, and on the structures of international organisations. In this book, Carolina Milhorance examines the content, process and consequences of the internationalisation of Brazil's rural public policy instruments. Brazil earned wide international recognition in the early 2000s for its agricultural

modernisation and social policies; its increasing influence illustrated the specific political interests of coalitions that are embedded in domestic and international struggles. Drawing on extensive field research – including more than 280 interviews – conducted in Brazil, Mozambique, South Africa, Malawi, France and Italy, Milhorance analyses the effects of the internationalisation of Brazilian policy solutions on national and local political systems in recipient countries, highlighting specifically the case of Mozambique. Relying on a new theoretical approach to International Relations – one based on public policy analysis and international political sociology – she moves beyond a debate about conventional notions of international power. New Geographies of Global Policy-Making will be of interest to scholars and researchers of international relations, public policy analysis, political sociology, comparative politics, and Latin American studies.

Humanidades e pensamento crítico Reinaldo Silva Pimentel Santos,Rafael Alem Mello Ferreira,Naiara de Moraes e Silva,2022-08-30 Se realmente vivemos em uma pós-modernidade, uma das suas principais características é a dificuldade de separação absoluta das áreas do saber. Não há, desde a Era das Revoluções, condições para uma separação absoluta entre o campo político, econômico, social, geográfico, histórico ou cultural. Os capítulos apresentam discussões sobre a migração religiosa japonesa no Brasil, as contribuições de Karl Marx em seus Manuscritos econômicos e filosóficos de 1844 e discutem a performance das drag queens no município de Vitória, capital do Espírito Santo. Além disso, há uma análise do ambiente aeroespacial, em uma perspectiva geográfica e, por fim, reflexões sobre o desenvolvimento regional através da obra de Francisco de Oliveira e a desigualdade e a invisibilidade de relações de trabalho marcadas pela raça, gênero, classe e poder.

Growing Old in an Older Brazil Ole Hagen Jorgensen,Romero Rocha,Anna Fruttero,2011-09-07 Brazil is in the middle of a profound socioeconomic transformation driven by demographic change. Because of profound changes in mortality and, especially, fertility over the past four decades the population at older ages then begun to increase, a trend that will become more and more rapid as time progresses. While it took more than a century for France's population, aged 65 and above, to increase from 7 to 14 percent of the total population, the same demographic change will occur in the next two decades in Brazil (between 2011 and 2031). The elderly population will more than triple within the next four decades, from less than 20 million in 2010 to approximately 65 million in 2050. On the one side, these shifts in population age structure will lead to substantial additional fiscal pressures on publicly financed health care and pensions, along with substantial reductions in fiscal pressures for publicly financed education. Public transfers in Brazil have been very effective in reducing poverty among the elderly in both urban and rural areas. However, without substantial changes, the aging of the population will put a strain on the current system that will result in some critical trade-offs with consequence for poverty among other vulnerable groups and for the growth prospects of the country. One the other side, given the strong association between people's economic behavior and the life cycle, changes in the population age structure have a major impact on economic development. This book investigates the impact of demographic changes on several dimensions of the Brazilian economy and society. It does so

in a comprehensive and systematic way that captures the broad complexity of issues, from economic growth to poverty, from public financing of social services and transfers to savings, from employment to health and long-term care, and their interrelations.
