Some Descendants of John Thomas of Jamestown, Rhode Island Hollis A. Thomas, MD, 2013-01-24 In 1636, Roger Williams, recently banished from the Massachusetts Bay Colony because of his religious beliefs, established a settlement at the head of Narragansett Bay that he named "Providence." This small colony soon became a sanctuary for those seeking to escape religious persecution. Within a few years, a royal land patent and charter resulted in the formation of the "Colony of Rhode Island and Providence Plantations," which incorporated Williams' original settlement and espoused his tenets of freedom of religion and separation of church and state. During the ensuing decades, thousands of Baptists, Quakers, Jews, and Huguenots relocated to Rhode Island from other New England colonies, the British Islands, and Europe in search of religious freedom. One such individual, John Thomas, an immigrant from Wales, made significant contributions to early settlements at Jamestown on Conanicut Island and at Wickford on the nearby mainland of Rhode Island. He was the first town constable of Jamestown in 1679, and later owned hundreds of acres of land in the towns of North and South Kingstown. This fully indexed work traces and sketches the lives of his descendants, many of whom were at the forefront of the great American westward migration, and represents the most comprehensive compilation of them to date. It is the result of twenty years of extensive research and includes detailed information from military pension archives, will and estate records, agricultural data, county histories, and migration patterns that far exceeds the standard for genealogical works of this scope and magnitude. It is important for us to remember those who helped shape our nation. This work provides valuable information for those who are interested in this family and its evolution in America.

How She Did It Patricia Daly-Lipe, PhD, 2023-04-28 About the Book "The exuberance of facing a stark white canvas or beautifully hand-crafted watercolor sheets is pure joy. The approach I take is to let it come from within." This is precisely what Georgeanna Lipe wrote. As artists, we usually start with a preconceived idea which often morphs into something totally unexpected. Viola! A mixture of energetic movements of colors and shapes emerges. Both she and I have a background in professional work in anatomy. As she writes, study of color theory and illustration have given us the technological tools we

need. However, as Georgeanna points out, it is our inner voice that is in charge. Whether it is figurative or landscape work, as artists, we love bright colors and subtle emphasis of intertwining shapes. My inspiration is always harmony of nature and the spirit of mankind. I work from both my photographs or on location. Having traveled and lived in Europe, visiting museums and everyday life there left a huge impression on me and my work. We see the same in the life and paintings portrayed in this book of Georgeanna Lipe! About the Author Stephanie Pyren: A commercial and private fine artist who is a national and international exhibitor in France, Bangkok, Holland and throughout the United States. Stephanie has taught life drawing, as well as painting in all media. She worked in many major animation studios in Los Angeles as a character designer and background painter and in the licensing division of Warner Bros. In addition, she has illustrated four children's books. Stephanie and her husband recently relocated to Jacksonville, Florida where she continues to be active with the arts. www.stephaniepyren-finearts.com [Georgeanna] had a smile as quick as her wit and warm as her heart. Her personality was a triple shot of curiosity, creativity, and positivity blended with an adventurous spirit and spunk. Patti Keyes: Manager of The Artists Gallery, La Jolla, CA

Medical Practice in Rural Communities MUTE, 2013-11-11 Despite the urbanization of the United States, the rural population exceeds 60 million, and the provision of health services to these people remains a difficult problem. This volume addresses one crucial aspect of that problem-the task of attracting physicians to rural medical practice. It does this by carefully analyzing the special health problems and the general features of rural society in which the young doctor would be working. Rural health needs have been recognized in America for well over a century. In response, many organized health programs have, in fact, improved the situation. Compared to 1930, the present coverage of rural counties by public health agencies has been greatly extended. Thanks to the Hill-Burton Act of 1946, the availability of general hospital beds has

become virtually equalized among the states with varying degrees of rurality. Federally subsidized and locally organized health programs are serving migratory workers, American Indians, the people of Appalachia, and other rural groups. Voluntary health insurance covers millions of rural families, even though the extent of this economic protection is less than among urban families. Medicare helps to protect the rural aged, as it does the urban. Medicaid finances health services for the rural poor far more effectively than the purely local welfare programs of 1930. There is no question, then, about the improvement in rural health resources and services in America over the last 50 years.
