UFOs, Chemtrails, and Aliens Donald R. Prothero, Timothy D. Callahan, 2017-08-02 A wide-ranging survey offers “entertainment as well as wisdom for everyone who’s ever wondered what’s behind so many conspiracy theories and paranormal phenomena” (Publishers Weekly). UFOs. Aliens. Strange crop circles. Giant figures scratched in the desert surface along the coast of Peru. The amazing alignment of the pyramids. Strange lines of clouds in the sky. The paranormal is alive and well in the American cultural landscape. In *UFOs, Chemtrails, and Aliens*, Donald R. Prothero and Tim Callahan explore why such demonstrably false beliefs thrive despite decades of education and scientific debunking. Employing the ground rules of science and the standards of scientific evidence, Prothero and Callahan discuss a wide range of topics including the reliability of eyewitness testimony, psychological research into why people want to believe in aliens and UFOs, and the role conspiratorial thinking plays in UFO culture. They examine a variety of UFO sightings and describe the standards of evidence used to determine whether UFOs are actual alien spacecraft. Finally, they consider our views of aliens and the strong cultural signals that provide the shapes and behaviors of these beings. While their approach is firmly based in science, Prothero and Callahan also share their personal experiences of Area 51, Roswell, and other legendary sites, creating a narrative that is sure to engross both skeptics and believers.

Ancient Geopolymers in South America and Easter Island Joseph Davidovits, 2024-11-16 This book presents the study on Ancient Geopolymers in South America and Easter Island regions, exploring the artificial nature of the volcanic rocks used in the construction of Easter Island's statues. Contrary to the belief that the statues were carved and transported, Davidovits

suggests they were made on-site using geopolymer technology. He proposes that this knowledge came from Amerindians from the Andes, specifically the Tiahuanaco region near Lake Titicaca. The book is divided into two parts: the first examines geopolymeric artificial stone technologies in the Andes, and the second establishes a connection between these technologies and Easter Island, 3,700 km away. Davidovits' research includes geological expeditions, SEM analysis, petrography, and a comprehensive review of international literature. It is intriguing to observe that in both cases, Pumapunku /Tiwanku in the Andes and Easter Island, volcanic rocks are involved which contain biological carbon. These discoveries undeniably support the theory of geopolymeric artificial manufacturing, challenging traditional archaeological views.

Ancient Technology in Peru and Bolivia David Hatcher Childress, 2012-10-31 David Hatcher Childress, popular Lost Cities author and star of the History Channel's long-running show Ancient Aliens, takes us to the mysterious ruins in the mountains of Peru and Bolivia in search of ancient technology and the secrets of megalith building. In his new book, packed with photos and diagrams, Childress examines the amazing stonecutting at Puma Punku, a site neighboring the ancient ruins of Tiwanaku near Lake Titicaca in Bolivia. He looks at whether the so-called "Inca walls"-found in Cuzco and at other sites such as Sacsayhuaman, Ollantaytambo and Machu Picchu-were really made by the Incas. The evidence seems to support the idea that they were actually constructed by a far older culture. Childress examines the megalithic construction and underground chambers of Chavin in the Cordillera Blanca of Peru, possibly the oldest megalithic site in South America. He also speculates on the existence of a sunken city in Lake Titicaca and reveals new evidence that the Sumerians may have arrived in South America over 4,000 years ago. Childress demonstrates that the use of "keystone cuts" with metal clamps poured into them to secure megalithic construction was an advanced technology used all over the world, from the Andes to Egypt, Greece and Southeast Asia. He maintains that only power tools could have made the intricate articulation and drill holes found in extremely hard granite and basalt blocks in Bolivia and Peru, and that the megalith builders had to have had advanced methods for moving and stacking gigantic blocks of stone, some weighing over 100 tons. The incredible high-tech world of South America is illuminated in the informative and breezy style for which Childress has always been known. Chapters in the book include: The Lost World of South America; The Enigma of Ancient Technology; Ancient Technology at Tiwanaku and Puma Punku; The Sumerian Mining Complex at Tiwanaku; Mysteries of Lake Titicaca and the Towers; Ancient Technology in Cuzco; The Megaliths of Ollantaytambo; Did the Incas Build Machu Picchu?; and more!

The Origin of the First Man and the Mysteries of History Agatino Mezzatesta, 2024-12-19 The modern age has generated a huge number of different opinions, creating great wealth of ideas but also great confusion and uncertainty. It becomes more and more difficult to discover the truth in a sea of possibilities. For example, there is still a clear contrast between the claims of science, now supported by molecular biology and genetics, and those of theology, which currently accepts also theistic evolutionary theory in human development. The aim of this essay is to seek truth from man's origin, in an attempt to recognize the Spirit of Truth amid the chaos caused today by a continuous proliferation of groundless

information. To do this it is necessary to understand the historical, philosophical and as much as possible also scientific context of the specific civilizations of the period being examined, in order to give the right value to certain events, especially if of a spiritual nature. On the other hand, it will be important not to insist yet on what some modern historians now call the history of short duration, that which has prevailed until now (made of battles, dates, wars and events that have had little importance in the long time, also putting above all their own nation always at the center of events). This is the history of successive civilizations, with its moments of splendor and decline: it is in the name of the authenticity of events therefore that, although Science and Faith have at their base different motivations and methods of investigation, both must contribute to the search for truth, hoping for a reconciliation that allows us to reconstruct better and better not only the true history of humanity, but also a meditated gospel and incarnate in the modern world.

The Word of Gnosis Tait Zinszer, 2012-05-16 Mysterious, thought-provoking, and intriguing, *The Word of Gnosis: A Light in the Darkness of Universal Forgetfulness* is Tait Zinszer's new book that compiles excerpts from various ancient manuscripts that were the foundation of much of the biblical creation and flood stories. His intentions are to write into history the truth that the gods of the ancient world once walked among man; and that the cities they built, can still be explored today. He also cross references several of these manuscripts to show the reader that the flood of Noah and the Hebrew exodus from Egypt may have been caused by a cosmic nemesis that roams our galaxy called the Destroyer the biblical Wormwood. His book primarily targets anyone interested in acquiring deeper knowledge of the Divine, as well as self-knowledge, and challenges the reader to embrace the ancient myths of the gods as historical fact! *The Word of Gnosis* gives the reader a lot to reflect upon long after they have turned its last pages.

If the Bible Is as Much Fable as Fact, Did God Create Man or Did Man Create God? Peter Seiler, 2015-07-10 *If the Bible is as Much Fable as Fact, Did God Create Man or Did Man Create God?* searches for a reasonable and reasoned foundation

upon which to speak of the relationship between God and humanity. The author, Peter Seiler, marshals his education in both science and history in his exploration of the Bible's claims of faith, shedding the light of scientific findings and historical analysis on the biblical texts. Spanning ten parts, the text begins with an extended introduction to the author and his method before conducting a four-part examination of the history of faith from the ancient past through the Enlightenment. Then the author examines, in three parts, the case for the involvement of alien life in human history. Finally, he turns to the future before summarizing his conclusions. If the Bible is as Much Fable as Fact, Did God Create Man or Did Man Create God? will satisfy the hunger of readers who desire to shed the light of reason, bolstered by verifiable facts, upon the claims of faith. It also will intrigue people with deeply held beliefs who desire to know the yearnings of their friends and family members who find those same claims of faith on the far side of a chasm they cannot traverse by a leap of faith. In either case, If the Bible is as Much Fable as Fact, Did God Create Man or Did Man Create God? makes a powerful case for its perspective on the titles question.

Lost Ancient Technology Of Peru And Bolivia Brien Foerster, 2012-11-30 Ancient Peru and Bolivia, like Egypt, contain

enigmas and mysteries, especially in stone which most conventional scholarship can't explain. Rather than simply being the exclusively the works of cultures such as the Inca, there are many megalithic wonders which defy both the conventional time lines and known levels of technology attributed to the ancient people of South America. The most glaring example is most likely Puma Punku, near the shore of Lake Titicaca in Bolivia, which hints at not only being several thousand years old, but also seems to have been achieved using what we would call high level machine technology. There are also many sites in Peru, and especially near the city of Cusco that also show the hall marks of having been made by cultures using technology supposedly not known by cultures such as the Inca. A massive collection of photographic and and detailed analysis is contained in this book, as well as on site observations by leading engineers.

From Adam to Omega A.R. Roberts,2020-09-24 Due to government secrecy, the public never learned of the numerous UFO incursions at strategic nuclear weapons installations where they disabled ICBM missiles and even activated their launch codes. They never heard about UFO encounters reported by police officers, civilian and military pilots and astronauts, and they were never told the real facts of the Roswell event. The volume of evidence suggesting we are not alone, and probably never have been, is overwhelming. It suggests an alien agenda to accelerate the evolution of the human race. To understand what is happening requires knowledge of what is going on today as well as the past, particularly during the biblical era. Much has been learned through the Freedom of Information Act, from whistleblowers, and government and military officials. This book connects the dots suggesting what aliens have been doing for the past several thousand years.
