Analyzing the Korean Alphabet Hye K. Pae, 2024-02-28 This book provides comprehensive coverage of the Korean alphabet, Hangul, and includes a synthesis of research findings relating to reading in the non-Roman alphabet. This, in turn, contributes to the science of reading through an understanding of reading mechanisms that are essential for all writing systems, and that are particular for a given writing system. Hangul has been recognized as “the world’s best alphabet,” “one of the great intellectual achievements of Mankind,” and “alphabet’s epitome, a star among alphabets” by international linguists and historians. It is known that writing systems have evolved based on the ecological principle that visual signs are culturally selected to match objects found in natural scenes through selection pressures for optimal visual processing. However, Hangul is an exception. It was purposely invented by King Sejong in the 15th century to combat the illiteracy prevalent at the time. The chapters excavate the historical background of Hangul, and the unique characteristics of Hangul that contribute to learnability for emergent readers and efficiency for skilled readers. The author presents empirical evidence of psycholinguistic research into reading Hangul, building theories and presenting implications for the science of reading (psycholinguistics) and the science of writing (grapholinguistics). This book is relevant to students, researchers, and practitioners in applied linguistics, psycholinguistics, language studies, reading studies, and grammatology, with a particular focus on the Korean alphabet.

The Korean Alphabet Young-Key Kim-Renaud, 2021-05-25 The Korean alphabet, commonly known as han'gul, has been called one of the greatest intellectual achievements of humankind. Experts agree that few writing systems can match its simplicity and efficiency, its elegance and intelligence. The only alphabet completely native to East Asia, han'gul distinguishes itself among writing systems of the world with its scientific qualities and unusual linguistic fit to the Korean language. Most strikingly, the theoretical underpinnings of the language, as well as the time and circumstances of its creation, are clearly known and recorded. Han'gul was invented in 1443 and promulgated in 1446 by King Sejong (1418-1450), sage ruler of the Yi dynasty (1392-1910). This volume, the first book-length work on han'gul in English by Korean-language specialists, is comprised of ten essays by the most active scholars of the Korean writing system. An instructive commentary by eminent linguist Samuel Martin follows, offering perceptive comments on the essays as well as a discussion on Martin's own research findings on the script.

Korean Language in Culture and Society Ho-min Sohn, 2005-12-31 Intended as a companion to the popular KLEAR Textbooks in Korean Language series and designed and edited by a leading Korean linguist, this is the first volume of its kind to treat specifically the critical role of language in Korean culture and society. An introductory chapter provides the framework of the volume, defining language, culture, and society and their interrelatedness and presenting an overview of the Korean language vis-à-vis its culture and society from evolutionary and dynamic perspectives. Early on, contributors examine the invention and use of the Korean alphabet, South Korea's standard language vs. North Korea's cultured language, and Korean in contact with Chinese and Japanese. Several topics representative of Korean socio-cultural vocabulary (sound symbolic words, proverbs, calendar-related terms, kinship terms, slang expressions) are discussed, followed by a consideration of Korean honorifics and other related issues. Two chapters on Korean media, one on advertisements and the other a comparative analysis of television ads in Korea, Japan, and the U.S., follow. Finally, contributors look at salient features of the language, narrative structure, and dialectal variation. All chapters are accompanied by a set of student questions and a useful bibliography. A beginning level of proficiency in Korean is sufficient to digest the Korean examples with facility, making this volume accessible to a wide range of students. Contributors: Andrew S. Byon, Sungdai Cho, Young-A Cho, Young-mee Y. Cho, Miho Choo, Shin Ja J. Hwang, Ross King, Haejin Elizabeth Koh, Jeyseon Lee, Douglas Ling, Duk-Soo Park, Yong-Yae Park, S. Robert Ramsey, Carol Schulz, Ho-min Sohn, Susan Strauss, Hye-Sook Wang, Jaehoon Yeon.

Robert Ramsey, 2001-01-11 This book describes the structure and history of the Korean language, ranging from its cultural and sociological setting, writing system, and modern dialects, to how Koreans themselves view their language and its role in society. The Korean Alphabet Young-Key Kim-Renaud, 1997 A collection of ten essays which cover topics such as: arguments for King Sejong's personal creation of the script; the Asian and domestic linguistic and socio-cultural background to its creation; the principles under which each symbol was created; and the structure of phonological units.

Hangeul Robert Koehler et al., 2015-05-13 Writing is a cornerstone of civilization, a crucial invention that better allows

peoples to accumulate and pass down knowledge and preserve cultures. There are currently some 6,909 living languages in the world, yet only a minority of these are written, and of these just a handful have their own unique writing systems. Hangeul, the indigenous writing system of Korea, is one of them. Promulgated in 1446, Hangeul is an ingenious system that utilizes forward-thinking and scientific linguistic theories and principles of Korean traditional culture to perfectly express the sounds of the Korean language. Invented by the brilliant King Sejong the Great, the alphabet has been widely lauded by scholars the world over for its advanced phonetic system and ease of use.

Selected Readings in Korean Ho-min Sohn, Heisoon Yang, 2003-11-30 The first advanced Korean reading text for non-native speakers, *Selected Readings in Korean* consists of eighteen lessons on diverse, stimulating topics such as Korean traditions, culture, and society. It is designed for use by students who have completed the fourth-year level in Korean (approximately five hundred class hours) or the equivalent. Each lesson consists of six sections: prereading group activities, which not only serve as a schema for efficient comprehension of the reading text to follow, but also help students broaden their relevant knowledge; an authentic main reading text on an informative and interesting topic; explanations in Korean and English of words that may be unfamiliar to students, including words indicating abstract or culture-specific concepts; explanations of idiomatic expressions; extensive exercises intended to help students master the contents of the text, new vocabulary, and grammar while improving their composition and oral presentation skills; and post-reading activities designed to further thinking and group discussion on subjects related to the main topic of the lesson. Appended are translations of the main reading texts of all eighteen lessons and a Korean-English glossary. The Use of the International Phonetic Alphabet in the Choral Rehearsal Duane Richard Karna,2012-09-13 “The fusion of text with music is one of the most powerful methods by which a composer can express emotion to an audience, yet, all too often, the diction of choral groups is lacking to such a degree as to make the text unintelligible.” So argues Duane R. Karna, who in *The Use of the International Phonetic Alphabet in the Choral Rehearsal* brings together 30 essays by experts from around the world to describe how the character symbols of the International Phonetic Alphabet (IPA) can be used by singers in the choral rehearsal. In an effort to conquer one of the greatest challenges facing choral directors and their choirs, contributors explore the use of the IPA system in a vast range of languages. Readers will find essays devoted to the use of IPA on matters of lyric diction for the following tongues: Baltic Languages, Basque, Brazilian Portuguese, Chinese, Dutch, Ecclesiastical Latin, English, Finnish, French, Georgian, German, Germanic Latin, Greek, Hawaiian, Hebrew, Hungarian, Italian, Japanese, Korean, Norwegian, Polish, Romanian, Russian, Spanish, Swahili, and Swedish. Holding firmly to the belief that basic instruction in IPA character is part of a choir's training, Karna and his contributors see enormous potential for choirs to expand considerably their foreign-language repertoire and save considerable rehearsal time. *The Use of the International Phonetic Alphabet in the Choral Rehearsal* is the ideal primer for choral directors and choirmasters as well as choir members.

Writing and Literacy in Chinese, Korean and Japanese Insup Taylor, M. Martin Taylor, 2014-12-15 The book describes how the three East Asian writing systems-Chinese, Korean, and Japanese- originated, developed, and are used today. Uniquely, this book: (1) examines the three East Asian scripts (and English) together in relation to each other, and (2) discusses how these scripts are, and historically have been, used in literacy and how they are learned, written, read, and processed by the eyes, the brain, and the mind. In this second edition, the authors have included recent research findings on the uses of the scripts, added several new sections, and rewritten several other sections. They have also added a new Part IV to deal with issues that similarly involve all the four languages/scripts of their interest. The book is intended both for the general public and for interested scholars. Technical terms (listed in a glossary) are used only when absolutely necessary.

Invented Traditions in North and South Korea Andrew David Jackson, Codruța Sîntionean, Remco E. Breuker, Cedar Bough Saeji, 2021-11-30 Almost forty years after the publication of Hobsbawm and Ranger's *The Invention of Tradition*, the subject of invented traditions—cultural and historical practices that claim a continuity with a distant past but which are in fact of relatively recent origin—is still relevant, important, and highly contentious. *Invented Traditions in North and South Korea* examines the ways in which compressed modernity, Cold War conflict, and ideological opposition has impacted the revival of traditional forms in both Koreas. The volume is divided thematically into sections covering: (1) history, religions, (2) language, (3) music, food, crafts, and finally, (4) space. It includes chapters on pseudo-histories, new religions, linguistic

politeness, literary Chinese, p'ansori, heritage, North Korean food, architecture, and the invention of children's pilgrimages in the DPRK. As the first comparative study of invented traditions in North and South Korea, the book takes the reader on a journey through Korea's epic twentieth century, examining the revival of culture in the context of colonialism, decolonization, national division, dictatorship, and modernization. The book investigates what it describes as "monumental" invented traditions formulated to maintain order, loyalty, and national identity during periods of political upheaval as well as cultural revivals less explicitly connected to political power. *Invented Traditions in North and South Korea* demonstrates that invented traditions can teach us a great deal about the twentieth-century political and cultural trajectories of the two Koreas. With contributions from historians, sociologists, folklorists, scholars of performance, and anthropologists, this volume will prove invaluable to Koreanists, as well as teachers and students of Korean and Asian studies undergraduate courses.
