Construcción del estado chileno Gabriel Salazar Vergara, 2021-09-01 El libro que desmitifica cómo se construyó la narrativa portaliana sobre nuestro país. En Chile, la memoria política de la nación está enferma. Está saturada de estatuas y

héroes que, en estricto rigor histórico y cívico, no han sido ni son ejemplares. En ningún rincón de ella aparece el pueblo y/o la masa ciudadana como el principal actor de su destino o el único héroe que debió y debe ser. Nunca el orden portaliano (en cualquiera de sus tres o cuatro avatares) ha dado paso libre al poder soberano de la ciudadanía. Razón por la que ésta no sólo no tiene recuerdos de sí misma (como no sea el de sus mártires y deudos) sino tampoco conciencia clara de su soberanía (sólo tiene recuerdos variopintos de la omnipresente clase política). La memoria política de los chilenos debe ser, por tanto, revisada e intervenida. Reestructurada según criterios cívicos y democráticos, a objeto de rescatar y reconstruir el gran capital humano que ha perdido. Este libro pretende reconstruir la historia del tiempo-madre mediante el trabajo con la documentación y las crónicas de ese período (1760-1837) teniendo como objetivo detectar qué es lo que estaba desarrollando la ciudadanía de entonces que tanto molestó al patriciado de Santiago al punto de que, encabezado por Prieto y Portales, rompió todas las tradiciones coloniales y poscoloniales para perpetrar el inédito cuanto sangriento golpe de Estado de 1830 y constituir luego un orden político librecambista, centralizado y, en esencia, antidemocrático. Parece llegado el tiempo de que se intente rescatar lo que allí y entonces crecía por sí mismo #democráticamente# y fue cercenado.

Water Resources of Chile Bonifacio Fernández,Jorge Gironás,2020-12-03 Chile is a privileged country in terms of water resources, with an average annual runoff of approximately 50,000 m³/person. However, water availability varies enormously in space, as less than 1,000 m³/person are available for more than 50% of the population. The temporal and spatial distribution of water resources is driven by processes highly variables across a country with different climates explained not only by a large range of latitudes (from 17° to 56° south), but also the presence of the Pacific Ocean and the Andes with peaks up to 7000 m. This geography makes of Chile a true natural laboratory in which water is essential for the society and

the economy of the country. The relevance of water resources for the country has become even more significant in the context of a mega-drought that has affected practically the entire territory in recent years, although large floods such as those in Atacama 2015 and 2017 also take place periodically. This unique book brings together the state-of-art knowledge about the hydrology of Chile and its water resources, with a particular focus on quantitative aspects. The chapters are prepared by many of the most relevant researchers and practitioners working in water resources in the country. High-quality research contributions on climate and meteorology, surface and subsurface hydrology, water quality, water monitoring, water resource and global change, among other issues, are presented in this unique book, which offers a useful guide for academicians, researchers, practitioners and managers dealing with diverse water-related issues in Chile and other regions with similar characteristics

Futureproofing Engineering Education for Global Responsibility Michael E. Auer,Tiia Rüütmann,2025-03-20 This book contains papers in the fields of: Collaborative learning. Digital transition in education. AI and learning analytics in engineering education. Diversity in engineering education. The authors are currently witnessing a significant transformation in the development of education on all levels and especially in post-secondary and higher education. To face these challenges, higher education must find innovative and effective ways to respond in a proper way. Changes have been made in the way we teach and learn, including the massive use of new means of communication, such as videoconferencing and other technological tools. Moreover, the current explosion of artificial intelligence tools is challenging teaching practices maintained for centuries. Scientifically based statements as well as excellent best practice examples are necessary for effective teaching and learning engineering. The 27th International Conference on Interactive Collaborative Learning (ICL2024) and 53rd Conference of International Society for Engineering Pedagogy (IGIP), which took place in Tallinn, Estonia, between 24 and 27 September 2024, was the perfect place where current trends in higher education were presented and discussed. IGIP conferences have been held since 1972 on research results and best practices in teaching and learning from the point of view of engineering pedagogy science. ICL conferences have been held since 1998 being devoted to new approaches in learning with a focus on collaborative learning in Higher Education. Nowadays, the ICL conferences are a forum of the exchange of relevant trends and research results as well as the presentation of practical experiences in learning and Engineering Pedagogy. In this way, the authors try to bridge the gap between 'pure' scientific research and the everyday work of educators. Interested readership includes policymakers, academics, educators, researchers in pedagogy and learning theory, schoolteachers, learning industry, further and continuing education lecturers, etc.

Expanding Peace Ecology: Peace, Security, Sustainability, Equity and Gender Úrsula Oswald Spring,Hans Günter Brauch,Keith G. Tidball,2013-11-29 This book has peer-reviewed chapters by scholars from Australia, Canada, Germany, Japan, Mexico and the USA that were presented to the Ecology and Peace Commission (EPC) of the International Peace

Research Association (IPRA) in November 2012 in Japan. The chapters address these themes: Expanding Peace Ecology - Peace, Security, Sustainability, Equity and Gender; Two Discourses on Global Climate Change Impacts: From Climate Change and Security to Sustainability Transition; Peace Research and Greening in the Red Zone: Community-based Ecological Restoration to Enhance Resilience and Transitions Toward Peace; Social and Environmental Vulnerability in a River Basin of Mexico; Mobile Learning, Rebuilding Community Through Building Communities, Supporting Community Capacities: Post Natural Disaster Experience; Transforming Consciousness through Peace Environmental Education; Building Peace by Rebuilding Community; Ability Expectations and Peace and on Satoyama Sustainability and Peace.

Comics Beyond the Page in Latin America James Scorer, 2020-02-17 Comics Beyond the Page in Latin America is a cutting-edge study of the expanding worlds of Latin American comics. Despite lack of funding and institutional support, not since the mid-twentieth century have comics in the region been so dynamic, so diverse and so engaged with pressing social and cultural issues. Comics are being used as essential tools in debates about, for example, digital cultures, gender identities and political disenfranchisement.

El reencuentro Constanza Sagasti, 2021-01-26 Los personajes de El reencuentro comparten reflexiones al volver a verse o al conocerse por primera vez en situaciones totalmente diferentes. Individuos de distintas edades, culturas, nacionalidades y religiones dialogan sobre temas diversos, con el fin de buscar soluciones. En un mundo cambiante en el que las relaciones de poder son cada vez más igualitarias y menos abusivas, los personajes de este libro, con prólogo de Sébastien LHôte, logran construir colectiva e individualmente una sociedad más justa. Una sociedad más avanzada que recupera valores morales que lamentablemente se habían dado por perdidos, a la vez que se crean nuevos principios éticos para mejorar la convivencia entre los ciudadanos, gracias a sus iniciativas y a su sentido de la responsabilidad y del compromiso. Una sociedad madura que ya no está marcada por el odio ni por el rencor, sino por el respeto mutuo.
