 web a geotechnical investigation will  
 include surface exploration and  
 subsurface exploration of a site  
 sometimes geophysical methods are  
 used to obtain data about sites  
 subsurface exploration usually involves  
 soil sampling and laboratory tests of  
 the soil samples retrieved

introduction laboratory testing is part

of the physical survey as an integral  
part of site investigation the need for  
laboratory tests will often dictate the

type and frequency of sample to be  
taken and will therefore control the
