Law, Ethics and Professional Issues for Nursing Herman Wheeler, 2013-06-17 This comprehensive new textbook

covers core ethical and legal content for pre-registration nursing students. It provides readers with a sound understanding of the interrelationships between the NMC's code of conduct, standards and competencies, ethics and relevant sections of the English legal system. The only truly integrated text in the field, it opens with overviews of law and nursing, and ethical theories and nursing. It goes on to explore key areas of contention – such as negligence, confidentiality and consent – from legal and ethical perspectives, mapping the discussion onto the NMC code of conduct. The chapters include objectives, patient-focused case scenarios, key points, activities, questions, areas for reflection, further reading and a summary. Case law and statutes and ethical theories are presented where appropriate. Written by an experienced nurse-lecturer with a law and ethics teaching background, *Law, Ethics and Professional Issues for Nursing* is essential reading for all pre-registration nursing students, as well as students of other healthcare professions.

Moving Target Defense II Sushil Jajodia, Anup K. Ghosh, V.S. Subrahmanian, Vipin Swarup, Cliff Wang, X. Sean Wang, 2012-09-18 Our cyber defenses are static and are governed by lengthy processes, e.g., for testing and security patch deployment. Adversaries could plan their attacks carefully over time and launch attacks at cyber speeds at any given moment. We need a new class of defensive strategies that would force adversaries to continually engage in reconnaissance and re-planning of their cyber operations. One such strategy is to present adversaries with a moving target where the attack surface of a system keeps changing. *Moving Target Defense II: Application of Game Theory and Adversarial Modeling* includes contributions from world experts in the cyber security field. In the first volume of MTD, we presented MTD approaches based on software transformations, and MTD approaches based on network and software stack configurations. In this second volume of MTD, a group of leading researchers describe game theoretic, cyber maneuver, and software transformation approaches for constructing and analyzing MTD systems. Designed as a professional book for practitioners and researchers working in the cyber security field, advanced -level students and researchers focused on computer science will also find this book valuable as a secondary text book or reference.

Strengthening the Military Family Readiness System for a Changing American Society National Academies of Sciences, Engineering, and Medicine, Division of Behavioral and Social Sciences and Education, Board on Children, Youth, and Families, Committee on the Well-Being of Military Families, 2019-10-25 The U.S. military has been continuously engaged in foreign conflicts for over two decades. The strains that these deployments, the associated increases in operational tempo, and the general challenges of military life affect not only service members but also the people who depend on them and who support them as they support the nation – their families. Family members provide support to service members while they serve or when they have difficulties; family problems can interfere with the ability of service members to deploy or remain in

theater; and family members are central influences on whether members continue to serve. In addition, rising family diversity and complexity will likely increase the difficulty of creating military policies, programs and practices that adequately support families in the performance of military duties. Strengthening the Military Family Readiness System for a Changing American Society examines the challenges and opportunities facing military families and what is known about effective strategies for supporting and protecting military children and families, as well as lessons to be learned from these experiences. This report offers recommendations regarding what is needed to strengthen the support system for military families.

Implementing Diversity, Equity, Inclusion, and Belonging in Educational Management Practices El-Amin, Abeni, 2022-06-24 The social and political changes of this era have created a fundamental shift in how businesses view the impact of diversity, equity, inclusion, and belonging (DEIB) in the workplace. Successful businesses are now achieved by incorporating DEIB initiatives and managing inclusive workforces. Thus, it is imperative to understand how leaders implement DEIB educational change initiatives as well as how they make significant, sustainable changes by utilizing communication abilities, conflict management skills, and servant leadership. Simultaneously, educational stakeholders must vet essential change management processes and principles. *Implementing Diversity, Equity, Inclusion, and Belonging in Educational Management Practices* is an indispensable reference source that provides an interdisciplinary perspective of how issues and challenges pertaining to DEIB affect organizational performance and educational management practices. It shares the experiences of leaders when DEIB issues arise and seeks areas of improvement. Covering topics such as diversity and inclusion leadership, culturally relevant mentoring, and STEM education, this premier reference source is a critical resource for directors, executives, managers, human resource officers, faculty and administrators of education, government officials, libraries, students of higher education, pre-service educators, researchers, and academicians.

Complexity in Entrepreneurship, Innovation and Technology Research Elisabeth S.C. Berger, Andreas Kuckertz, 2016-02-25 This volume discusses the challenge of dealing with complexity in entrepreneurship, innovation and technology research. Businesses as well as entire economies are increasingly being confronted by widespread complex systems. Fields such as entrepreneurship and innovation cannot ignore this reality, especially with their inherent links to diverse research fields and interdisciplinary methods. However, most methods that allow more detailed analyses of complex problems are either neglected in mainstream research or are, at best, still emerging. Against this backdrop, this book provides a forum for the discussion of emergent and neglected methods in the context of complexity in entrepreneurship, innovation and technology research, and also acts as an inspiration for academics across related disciplines to engage more in complexity research.

Spatial Variability in Environmental Science John P. Tiefenbacher, Davod Poreh, 2020-10-21 *Spatial Variability in*

Environmental Science - Patterns, Processes, and Analyses includes eight studies that examine the issue of spatial variability in four areas of the environmental sciences – atmospheric science, geological science, biological science, and landscape science. The topics range from monitoring of wind, the urban heat island, and atmospheric pollution, to coastal geomorphology, landscape planning and forest ecology, the problem of introduced species to regional ecologies, and a technique to improve the identification of human constructions in semi-natural landscapes. A small volume can only offer a small glimpse at the activities of scientists and insights into environmental science, but the array of papers herein offers a unique view of the current scholarship.

International Conference on Advanced Intelligent Systems for Sustainable Development (AI2SD 2024) Mostafa Ezziyyani, Janusz Kacprzyk, Valentina Emilia Balas, 2025-07-19 This book provides a dynamic platform for exploring groundbreaking advancements in intelligent systems for sustainable development. It offers readers' access to the latest technologies and innovative solutions that address global challenges. Bringing together leading academics, pioneering researchers, and industry leaders fosters knowledge exchange across various fields such as health, education, agriculture, energy, and security. It enables readers to gain valuable insights, build strategic partnerships, and contribute to shaping a more sustainable future. This book bridges scientific research with practical applications and is ideal for researchers, practitioners, and decision-makers, driving progress across multiple disciplines.

Algal Biorefinery Ajay K. Dalai, Vaibhav V. Goud, Sonil Nanda, Venu Babu Borugadda, 2021-07-08 This book enables readers to understand the theoretical aspects, key steps and scientific techniques with a detailed mechanism to produce biofuels from algae. Each chapter provides the latest developments and recent advancements starting from algal cultivation techniques to the production of value-added green fuels, chemicals and products with wide applications. The volume brings together a broad range of international and interdisciplinary experts, including chemical and biological engineers, biotechnologists, process engineers, environmentalists, pharmacists and nutritionists, to one platform to explore the beneficial aspects and challenges for an algal-based biorefinery. Chapters address cutting-edge issues surrounding algal cultivation, including genetic modification of algal strains, design and optimization of photobioreactors and open-pond systems, algal oil extraction techniques and algal-derived fuel products (biodiesel, bio-gasoline, jet fuels and bio-oil). Finally, the book considers the potential environmental impacts for establishing a sustainable algal biorefinery through lifecycle analysis, techno-economic assessment and supply chain management. This book will be an important resource for students, academics and professionals interested in algal cultivation, biofuels and agricultural engineering, and renewable energy and sustainable development more broadly.
