Classification of Algebraic Varieties Ciro Ciliberto,1994 This volume contains the proceedings of the Algebraic Geometry Conference on Classification of Algebraic Varieties, held in May 1992 at the University of L'Aquila in Italy. The papers

discuss a wide variety of problems that illustrate interactions between algebraic geometry and other branches of mathematics. Among the topics covered are algebraic curve theory, algebraic surface theory, the theory of minimal models, braid groups and the topology of algebraic varieties, toric varieties. In addition to algebraic geometers, theoretical physicists in some areas will find this book useful. The book is also suitable for an advanced graduate course in algebraic geometry, as it provides an overview of areas of current research.

Cinema and Art as Archive Aa. Vv., 2015-03-11 T00:00:00+01:00 As Jacques Derrida wrote in 1995, while considering Archive Fever, nothing is less reliable or less clear today than the word “archive”. Nevertheless, the historic-cultural dimension of the contemporary discursive practices in cinema and art develops in the semantic openness of the term, in the repositioning of the idea of archive. The individual disciplines involved in one such field – history of cinema and art, theory of cinema and art, aesthetics, semiotics, philology, etc. – begin to open up to questioning the notion of archive even ‘in negative’: in other words what – after Michel Foucault – the “archive” is not, or does not seem to be. The “archive” is not the ‘library of libraries’ or ‘encyclopedia’, it is not ‘memory’, it is not museum, it is not a ‘database’. In recent years, the attention focused on such ideas has not so much highlighted the ‘impulses’, ‘turns’ and specific forms of art (“art archive”) as it has revealed in many ways how the “archive” concerns us in the interrelation of aesthetic, political, ethical and legal levels among various disciplinary fields.

Handbook of Research on Visual Computing and Emerging Geometrical Design Tools Amoroso, Giuseppe, 2016-04-11 Visual computing and descriptive geometry are multidisciplinary fields addressing the handling of images, 3D models, and other computer graphics. These ideas are experiencing a revival due to emergent technologies and applications available to developers. Based in traditional forms of design and architecture, these fields are currently experiencing a bounty of new research based on old principles. The Handbook of Research on Visual Computing and Emerging Geometrical Design Tools seeks to add to this knowledge base by considering these technologies from a designer’s perspective rather than reiterating the principles of computer science. It combines aspects of geometry and representation with emerging tools for CAD, generation, and visualization while addressing the digital heritage of such fields. This book is

an invaluable resource for developers, students of both graphic and computer-generated design, researchers, and designers.

Annuario della Scuola Archeologica di Atene e delle Missioni Italiane in Oriente, Supplemento 13. Athens and Attica from the Late Bronze Age to the end of the Archaic period. The spatial roots of politics and society Alain Duploux, Nikolaos Arvanitis, 2024-12-27 This volume contains the proceedings of the international conference Attica from the Late Bronze Age to the End of the Archaic Period. The Spatial Roots of Politics and Society, organised by the Italian Archaeological School at Athens and the University Paris 1 Panthéon-Sorbonne on 10 and 11 June 2021. The venue was originally scheduled for 13 and 14 March 2020 in Athens, but the event fell victim to the global COVID19 crisis and was eventually reorganised as an online conference in June 2021. The conference was organised in connection with the research project Lands of Meaning. A GIS Study of Space and Social Praxis in Ancient Attica from the Mycenaean Age to the Birth of Democracy (1200-480 BC), which was carried out as a Marie Skłodowska-Curie Action (MSCA) between 2017 and 2019 at the University Paris 1 Panthéon-Sorbonne. The Lands of Meaning project aimed to re-examine the Athenian territory from the end of the Bronze Age to the beginning of the Classical period by considering Attica as a space that was socially constructed through a constant dialogue between the landscape and the communities that inhabited it. The aim of the project was to integrate the large amount of archaeological data collected throughout the 20th c. into a heuristic and hermeneutic framework that considers the spatial and ecological dimensions of historical, cultural, political and social phenomena. The Lands of Meaning project was originally conceived as a two-year pilot project to introduce new digital methods and heuristic social theories of space. The project will be further developed at the University Paris 1 Panthéon-Sorbonne as a long-term endeavour to incorporate space into archaeological thinking and to consider the material and territorial conditions of the emergence of the city-state in Athens and more broadly in ancient Greece. The conference programme can be found below. The presentations were not recorded to allow for a lively discussion. Most of the speeches given online were then converted into the contributions collected in this volume, supplemented by a chapter by Pavlos Karvonis on Roman Attica and a description of the Thorikos Archive by the Belgian team. Unfortunately, some of the lectures given at the conference could not be included in the volume. First of all, we would like to thank Emanuele Papi, Director of the Italian Archaeological School at Athens, who fully supported the project and proposed to host the conference, which was to take place in March 2020 at the School's premises in Athens. Our heartfelt thanks go to our Greek colleagues from the Hellenic Ministry of

Culture and the Ephorates of Antiquities of Attica, Eleni Andrikou, Stella Chrysoulaki, Anastasia Gadolou and Christina Merkouri, who agreed to chair the conference sessions and led fascinating and disciplined discussions. We also invited four “titans” – as we amicably called them during the conference – to a final round of talks. Tonio Hölscher, Irene Lemos, Robin Osborne and François de Polignac took up the challenge and drew fascinating conclusions from the presentations, as well as some key ideas for the elaboration of ancient history from archaeological evidence. As it would have been difficult to render these lively thoughts into formal papers, we have decided to preserve them in our oral memory. Finally, we would like to thank the Italian Archaeological School at Athens for including the publication of the conference in its collections, as well as the two anonymous reviewers whose comments have given the authors food for thoughts. This book was published with the support of the Marie Skłodowska-Curie Action, the University Paris 1 Panthéon-Sorbonne and the research unit “Trajectoires” (UMR 8215). While Nikolaos Arvanitis was involved in the organisation of the conference as part of his MSCA scholarship, Alain Duplouy compiled and edited all the contributions on his own. We are also indebted to Mariana Silva Porto, who thoroughly re-read all contributions, especially those written by non-native speakers, and significantly improved the texts. As a doctoral student working on the Paris project, she deserves full credit for contributing to the edition of the volume.

Digging Up Jericho Rachel Thyrza Sparks, Bill Finlayson, Bart Wagemakers, Josef Mario Briffa SJ, 2020-01-23 21 papers present a holistic perspective on the research and public value of the site of Jericho – an iconic site with a long and impressive history stretching from the Epipalaeolithic to the present day. Covering all aspects of archaeological work from past to present and beyond, they re-evaluate and assess the legacy of this important site.

Annuario della Scuola Archeologica di Atene e delle Missioni Italiane in Oriente, Supplemento 8. Monetary and social aspects of Hellenistic Crete Renata Cantilena, Federico Carbone, 2020-11-20 Nel giugno del 2018 presso la Scuola Archeologica Italiana ad Atene si è svolto il convegno internazionale di studi Monetary and Social Aspects of Hellenistic Crete, al quale hanno partecipato numerosi studiosi di diversi ambiti disciplinari impegnati in ricerche su Creta in epoca ellenistica 1. L'idea di organizzare l'incontro scaturiva dalla volontà di avviare una discussione tra numismatici, archeologi, storici, epigrafisti su aspetti della società cretese tra la fine del IV e il I a.C., al fine di indagare l'incidenza che la moneta ha avuto nello sviluppo delle comunità locali, vuoi se emessa in risposta a esigenze di spesa per assetti urbanistici e difensivi, vuoi se connessa a pratiche di mercenariato o per mobilitazioni di carattere militare, vuoi se funzionale a relazioni commerciali o a scelte di politiche interne e/o esterne [...] Renata Cantilena

E Motion Bortolotto, Susanna,Cheli, Federico,2021-01-21 The aim of the EMotion project is to combine both technological aspects and respect for the territory and its history. The main axis considered in this project is the Asmara-Massawa road. The challenges of a new mobility in this part of Eritrea could be met and overcome by preserving the pre-existing historic infrastructure: an extraordinary and vulnerable cultural heritage, consisting of a unique road and a railway, crossing natural and cultural landscapes and connecting archaeological, historical-artistic and architectural sites; the road itself is a summation of artefacts and monuments to be protected and enhanced. A multidisciplinary team, including archaeologists, architects, geologists and engineers has contributed to the research. The vision of the project represents an ideal and real bridge to enhance the transferring of goods, ideas, knowledge and values and promote the connection of people.

Jerusalem. The Holy Sepulchre Grazia Tucci,2019-11-28 Jerusalem is situated in a highly seismic zone, and in the past has been the theatre of disastrous earthquakes. One of these was the 1927 quake, which seriously damaged the Basilica of the Holy Sepulchre. A study of the city of Jerusalem has revealed a cyclical pattern of repeated seismic events, every 100 years or so. The desire to avert a danger, foretold in advance, lay behind the project described in this volume. In 2006 the three Major Communities of the Holy Sepulchre invited a research team from Florence University. Architects, surveyors, geologists and structural engineers conducted the investigations, in a highly interdisciplinary collaboration. It was an extraordinary opportunity to draw up a complete survey, using new technology. This resulted in a three-dimensional digital model of the structural situation on that date: a powerful, exhaustive tool for the continuation of further research, and documentation, in the future.

RAMSETE Salvatore Nicosia,Bruno Siciliano,Antonio Bicchi,Paolo Valigi,2003-07-01 Robotics applications, initially developed for industrial and manufacturing contexts, are now strongly present in several elds. Besides well-known space and

high-technology applications, robotics for every day life and medical services is becoming more and more popular. As an example, robotic manipulators are particularly useful in surgery and radiation treatments, they could be employed for civil demining, for helping disabled people, and ultimately for domestic tasks, entertainment and education. Such a kind of robotic applications require the integration of many different skills. Autonomous vehicles and mobile robots in general must be integrated with articulated manipulators. Many robotic technologies (sensors, actuators and computing systems) must be properly used with specific technologies (localisation, planning and control technologies). The task of designing robots for these applications is a hard challenge: a specific competence in each area is demanded, in the effort of a truly integrated multidisciplinary design.
