**Marcelo Fraile**

**Para pensar el poscapitalismo** Moisés Ezequiel Zepeda Moreno, 2021-07-01 Si algo han mostrado las ciencias sociales y las humanidades del siglo XX es que el lugar desde donde se describe y se proyecta todo argumento y presupuesto epistemológico es un espacio de subjetividades construidas y definidas por sus circunstancias espacio/temporales, es decir, es la experiencia la que da sentido al contenido de toda forma de conocimiento, tanto filosófica, científica o tecnológica. Este texto se da en una coyuntura muy particular; aunque escrito en la cuarentena del Covid-19, no pertenece a ella sino a una década de trasformaciones y procesos sociales que han permitido replantear muchos elementos de lo que aquí se analiza. Al comienzo de la pandemia los intelectuales más reconocidos a nivel global se pronunciaron y propusieron diversas interpretaciones de este nuevo reto planetario llamado Covid-19, en medio de todo este mar de opiniones, había una constante referencia al desgaste planetario, a la situación del sistema productivo actual y a las modificaciones de las coordenadas geopolíticas. Pero al mismo tiempo estas opiniones reflejaban una gran incertidumbre acerca de lo que vendría, es decir, de la época "post-Covid": ¿qué será?, ¿cómo será?, ¿cuáles serán las consecuencias reales en términos materiales?, ¿cuáles transformaciones sucederán en el orden sistémico actual? La pandemia fue acompañada de una diversidad de análisis y opiniones; algunos periodistas o intelectuales con una reputación histórica construida por un trabajo veraz y congruente respaldada por décadas de informaciones críticas y fidedignas, mostraban también otra posible naturaleza o manera de comprender la problemática. ¿Es el Covid-19 apenas el comienzo de una transformación profunda del mundo ecológico frente al sistema productivo actual?, ¿cómo debe ser evaluada esta transformación?

Pensar la ciencia desde la biología. Una visión evolutiva del conocimiento biológico María José Prieto Villanueva, 2017-05-16 En la actualidad, la ciencia sigue practicándose e interpretándose mayoritariamente desde el paradigma cartesiano-baconiano nacido con la revolución científica del siglo XVII, el cual lleva implícita una concepción

lineal de los saberes que da razón de algunas leyes, reglas e hipótesis, pero que no permite validar otros planteamientos ni explica de manera satisfactoria la creatividad. Disciplinas como la filosofía de la ciencia, la epistemología, la psicología, la física y las matemáticas desarrolladas en el siglo XX o la neurociencia más reciente, han puesto de manifiesto la conveniencia de adoptar un nuevo marco de entendimiento. Este libro reflexiona sobre la necesidad de avanzar hacia una noción integral de la ciencia, aplicando lo que el pensamiento evolutivo y ecológico ya formula de forma explícita. Lamarck, zoólogo del siglo XVIII y padre del concepto de biología, advirtió que la comprensión de lo «viviente» —en la acertada expresión aristotélica— no podría prosperar si se separaba del análisis filosófico. Su profética visión tiene hoy más vigencia que nunca.

**Construindo o Novo Ensino Médio: Projetos Interdisciplinares - Biologia** Charbel N. El-Hani,Clarissa

Machado,2022-08-22 A Base Nacional Comum Curricular (BNCC) preconiza a formação continuada de professores como um processo permanente de aperfeiçoamento dos saberes necessários aos docentes. Construindo o Novo Ensino Médio: Projetos Interdisciplinares - Biologia foi elaborado para ser um aliado efetivo do professor ao contribuir nesse processo, trazendo recursos e vivências que o ajudam a refletir sobre sua trajetória profissional e a continuar a exercer a docência de maneira plena, de acordo com os preceitos da BNCC, de modo que alcance bons resultados pessoais e profissionais e conviva solidariamente na comunidade escolar. O livro contém orientações para sua atuação como organizador e mediador do processo de ensino e aprendizagem e sugere caminhos para a transposição didática do conhecimento científico, a socialização do saber e a colocação do estudante na condição de protagonista de sua aprendizagem por meio da realização de projetos interdisciplinares, contribuindo para que você alcance com êxito os objetivos educacionais com os quais está comprometido.

La investigación educativa durante la pandemia : reflexiones desde el terreno Inés Dussel,Alicia Civera,2025-03-26 Según la historiadora de la ciencia Lorraine Daston, la radical incertidumbre y novedad de la pandemia nos retrotrajo a un grado cero del empirismo, en el que hubo que movilizar todas las capacidades de observación y reflexión en un territorio que nos resultaba opaco e impredecible, cual calamares que nadan en su propia tinta. La investigación educativa no estuvo al margen de ese desafío: el cierre de los edificios escolares y el desplazamiento de las prácticas educativas a otros escenarios trajo modificaciones muy significativas, que muchos intentaron registrar y documentar tempranamente. En este libro reunimos 30 textos producidos por investigadores consolidados y en formación del Departamento de Investigaciones Educativas del Cinvestav, que tienen en común la preocupación por saber qué pasó con las prácticas escolares durante el largo cierre de edificios escolares que se decretó en respuesta a la pandemia por COVID-19. Si bien estamos empezando a conocer sus efectos, y aun sabiendo que éstos serán de largo alcance, estos escritos suman a la producción existente argumentos y perspectivas que permiten acercarse al análisis de cómo fue la experiencia escolar en la emergencia, dimensionar sus

consecuencias y pensar la escuela a futuro. Muchos de ellos, aunque se revisaron posteriormente, fueron escritos durante el momento más álgido de la pandemia, entre 2021 y 2022, y como tales, dan cuenta de las experiencias de investigadoras, auxiliares de investigación y estudiantes de posgrado en investigaciones educativas que buscaban comprender lo que estaba sucediendo durante aquel momento. Esto tiene varias implicaciones para el propio campo de la investigación, cuyas repercusiones también apenas empezamos a dimensionar.

Ensinar e aprender biologia em tempos de pandemia Bruno Rafael Santos de Cerqueira,Diego Marques da Silva Medeiros,Leila Cristina Aoyama Barbosa Souza,Máira Batistoni e Silva,Rena de Paula Orofino,Vitor Abrahão Cabral Bexiga,2022-05-27 O livro é uma iniciativa da Diretoria Regional 1 da Associação Brasileira de Ensino de Biologia. Buscou-se dar voz a professores, licenciandos e outros profissionais de todo o Brasil com o objetivo de retratar o panorama do ensino de Ciências Biológicas no período de pandemia de COVID-19, destacam-se através dos relatos de experiência os limites e as possibilidades do trabalho docente, da formação de professores e da pesquisa na área de ensino de Ciências e Biología, evidenciando-se diferentes contextos e condições em que as ações educativas foram realizadas.

*Ecología* Manuel Erazo Parga,Rocío Cárdenas Romero,2013-01-05 Esta obra desarrolla los contenidos básicos de la ecología de ecosistemas y de poblaciones para comprender la problemática ambiental actual y la necesidad de contribuir en el seguimiento y aplicación de los acuerdos internacionales en materia ambiental. A través del curso se describe el origen de los problemas ambientales y su impacto en la salud humana, en la biodiversidad y en el equilibrio de la biosfera en general con el fin de promover una conciencia cívica sobre la importancia del cuidado y protección del entorno natural, así como del consumo sostenible de los recursos. Incluye cuatro grandes módulos: - Módulo 1. Ecología de ecosistemas. - Módulo 2. Ecología de poblaciones y comunidades. - Módulo 3. Crisis ambiental actual. - Módulo 4. Acuerdos internacionales ambientales, marco hacia un desarrollo sostenible.

*Arquitectura biodigital* Marcelo Fraile,2021-06-17 La rápida e intensiva evolución que han experimentado las tecnologías biológicas y digitales a finales del siglo XX, han producido importantes transformaciones en nuestros hábitos cotidianos y laborales. En el campo específico de la arquitectura, se iniciaba con esto, un universo de nuevos planteos que desafían las concepciones tradicionales del diseño, dando lugar a una arquitectura con una expresión espacial germinal, fluida, en continuo proceso de cambio y de transformación hasta su concreción física final. Una arquitectura de modelos digitales producidas a través de una amplia gama de herramientas tecnológicas: modelos paramétricos, algoritmos genéticos, tecnologías CAD/CAM, que permiten optimizar los recursos de un modo lógico, más allá de la construcción gráfica o del discurso exclusivamente conceptual. Revelando el peso de lo biológico y de lo digital en la práctica del arquitecto contemporáneo. En este ámbito, la presente investigación parte de la hipótesis de que un nuevo paradigma está surgiendo en el modo de concebir la arquitectura. Dentro de la situación contemporánea donde los límites disciplinares parecieran ser

difusos, algunos afirman que la arquitectura biodigital es la nueva vanguardia, otros que es una moda formalista pasajera que en muy poco tiempo será olvidada. Hasta qué punto constituye dicho marco un nuevo paradigma es aún un tema sometido a debate. ¿Revolución científica o anomalía? Esta dicotomía presenta un campo abierto que será objeto de esta investigación cuyos límites y consecuencias son impredecibles.

**Science Teaching and a New Teacher Culture** Mario Roberto Quintanilla Gatica, Agustín Adúriz-Bravo, 2024-03-29

This edited volume discusses various epistemological positions about science teaching and the complex processes of understanding and learning in the classroom. Including discussions around Natural Sciences teacher training models, as well as the development of logics of reflection on practice based on critical and dialogic interpretative visions guiding higher level competency learning. It brings together contributions from researchers promoting a coherent and robust methodological analysis, theoretically based on the systematization of evidence in different contexts within Europe and Latin America. While supporting innovation in teacher training and science teaching, it offers specific contributions and suggestions for classroom work in the subjects of Physics, Chemistry and Biology. It includes didactic guidelines for experimental practices, for the evaluation of scientific learning, as well as for the use of epistemology and the history of science in teaching. In addition, it's considered an important contribution to the challenge of rebuilding science education programs as well as its correct implementation in schools and universities. This book is a translation of an original Spanish publication. The translation was done with the help of artificial intelligence (machine translation by the service DeepL.com). A subsequent human revision was done primarily in terms of content, so that the book will read stylistically differently from a conventional translation.

**Natureza humana: Fatos biológicos incríveis para fazer você pensar diferente - O livro do professor de biologia do TikTok** Yago Stephano, 2025-06-16 Você provavelmente já deve ter ouvido falar que os humanos são a ponta da evolução, ou até mesmo que somos a sociedade mais avançada em termos de organização. Mas, observando a natureza mais de perto, talvez note que vários comportamentos similares considerados exclusivamente humanos estão presentes na natureza há milhões de anos. Não tem ideia de como? Aguarde, que logo mais você vai entender. Você sabia, por exemplo, que o cuidado com os feridos durante uma batalha não é exclusividade nossa? Ou talvez que cupins tiram onda quando o assunto é arquitetura? Neste livro, você vai conhecer uma espécie de formiga com habilidades que muitos médicos adorariam ter e descobrir como os pequenos insetos que comem nossos móveis de madeiras são, muito antes da nossa espécie, mestre nas construções. Talvez fique surpreso ao descobrir que algumas espécies de plantas têm a própria internet, uma rede de comunicação que favorece sua sobrevivência. Obviamente, não é igual à nossa, mas nem por isso é menos efetiva. Também vai mergulhar na história do Inky, o polvo pra lá de esperto de um aquário da Nova Zelândia, e descobrir que tirar 10 em uma prova não é o único indício de ser inteligente. Utilizando os princípios da evolução e de muitas outras áreas da ciência,

falaremos sobre nosso corpo e quais de suas partes foram úteis para nos trazer até onde estamos agora. Meu objetivo é que você saia dessa leitura conhecendo ainda mais você mesmo, a história da nossa espécie e de muitas outras que apresentam comportamentos tão incríveis quanto os nossos. E mais: espero que se torne uma pessoa tão observadora e apaixonada pela natureza quanto eu. E aí, bora repensar uma Natureza mais Humana do que você imagina?

**Biología del desarrollo** Scott F. Gilbert, 2005 Resumen: La Biología del Desarrollo puede ser concebida como una imagen dinámica del desarrollo en la que se conjugan distintos aspectos provenientes de la morfología clásica y experimental, de la genética y de la biología celular. La obra consta de cuatro partes: Principios de biología del desarrollo, Desarrollo embrionario temprano, Desarrollo embrionario tardío y Ramificaciones de la biología del desarrollo. Versión excelentemente traducida al español de la séptima edición inglesa original, el Gilbert será sin duda bien recibido entre los universitarios interesados en este campo (biólogos, veterinarios, médicos, bioquímicos y farmacéuticos). Es una obra bien conocida y apreciada, dimensionada hábilmente en la frontera del libro de texto y el libro de referencia. Biología del Desarrollo es de lectura casi obligada para los profesionales que quieran mantenerse o estar al día en embriología. Más que un texto de biología del desarrollo, es una auténtica escuela de pensamiento en este campo.

Aventuras de un biólogo David E Gorla, Alcira Rivarosa, 2023-02-01 Este libro recoge experiencias y vivencias de un proceso de formación de un biólogo científico en Argentina durante 40 años y reflexiones que ese proceso evoca en una especialista en didáctica y epistemología de las ciencias. El proceso de formación está descripto en 5 capítulos. Al final de cada uno, hay una reflexión que sistematiza y ayuda a comprender el proceso de aprendizaje y la evolución del pensamiento del científico en formación. El libro pretende mostrar, desde el caso individual, que la formación de un científico es un proceso no lineal, no siempre exitoso, no siempre exento de prejuicios y subjetividades y con similares complejidades asociadas con la formación de cualquier profesional universitario.

**Hacia una epistemología del saber pedagógico y de la práctica pedagógica en la formación docente** Oscar Olmedo Valverde Riascos, 2023-01-01 Los cambios acelerados de la sociedad y la economía contemporánea, los avances de la ciencia y de la tecnología tienen efectos en la innovación y cambio de las instituciones de educación superior, las cuales promueven una mejor calidad en la formación docente y en la investigación educativa y pedagógica. La innovación y el cambio educativo exigen a la educación superior reflexiones acerca de la formación docente, el saber pedagógico y la práctica pedagógica, abriendo un diálogo entre los saberes y los agentes educativos, en el marco de la dinámica socio-cultural, y de las posibilidades y limitaciones de la ciencia y tecnología, para la formación integral de personas y el desarrollo de las regiones y del país. Desde este escenario, el rol que desempeña la educación y la pedagogía en sus diferentes niveles de formación hace que se repiense y se replantee desde sus formas de comunicación, de su mediación, de sujetos intervenientes de prácticas y discursos, que se involucran hacia adentro y hacia fuera del contexto de la escuela y su relación

con el territorio. Es así como, en el Doctorado en Pedagogía, se concibe, desde la concepción y propósito misional de la Universidad Mariana, al maestro como un sujeto de saber pedagógico y de práctica que se repensa en su práctica pedagógica discursiva, en su práctica pedagógica institucional y en su práctica pedagógica de estrategias de enseñanza, aprendizaje y evaluación desde una espiritualidad mariana franciscana, permitiendo vínculos con los maestros a nivel nacional e internacional.

**Educación en ciencias y educación ambiental en la formación de profesores** María Mejía Cáceres,Laísa M. Freire dos Santos,Edwin G. García Arteaga,2024-08-01 Los campos de la Educación en Ciencias y la Educación Ambiental conllevan interfaces inspiradoras. El presente libro recoge diferentes aspectos de las mutuas relaciones que hay entre ellos, desde el orden epistémico, ético, estético, hasta el político y social, con profunda incidencia en el campo de la formación de profesores. Tejer estas relaciones colocándolas en escenarios tan importantes como el de la formación de profesores invita al lector a pensar enfoques alternativos al de la industrialización de los conocimientos, del extractivismo y la explotación indiscriminada de los recursos naturales, orientados hacia una sociedad de consumo y sostenibilidad del desarrollo; por otro lado, se trata de visiones centradas en el sujeto y su interacción con los otros y con el entorno, como forma de vida en equilibrio con la naturaleza, hacia un ambiente sustentable. El libro aborda críticamente la crisis ambiental como una crisis del conocimiento que estamos viviendo en el planeta y, sugiere un alejamiento de los seres humanos como administradores de la naturaleza hacia seres humanos como parte integrante del funcionamiento interno de ella. Abordar estos temas de actualidad mundial permite ampliar la difusión del conocimiento necesario sobre la educación ambiental y acercar las fronteras académicas que existen en la sociedad como resultado de barreras lingüísticas y geográficas. El texto es un aporte al campo educativo desde el pensamiento latinoamericano y la epistemología del sur.

[Rivers of South America](#) Manuel A.S Graca,Marcos Callisto,Franco Teixeira de Mello,Douglas Rodriguez Olarte,2024-10-04 Rivers of South America examines the physical, chemical, and biological environment of South American Rivers, and the people living in their basins. The book explores the main river basins, with information on each river's history, physiography, clime, hydrology, biodiversity, ecological processes, environmental problems, management, and conservation. The book identifies conservation hotspots for riverine environments, and is enriched with a large number of maps, photos, graphs, and tables. This reference is important for aquatic ecologists, environmental authorities, local and national governments, academics, NGOs, and those interested in the preservation and management of flowing waters. -

Presents boxed information in each chapter to provide clear and consistent highlights throughout - Provides a single source of information for South America's major rivers - Offers full-color photographs and topographical maps to demonstrate the beauty, major features, and uniqueness of each river system
