Tree Breeding and Genetics in New Zealand C.J.A. Shelbourne, Mike Carson, 2019-08-09 Dothistroma pini changed New Zealand commercial forestry dramatically. Tree breeding became concentrated on a very few species and development of selection methods and breeding strategies changed in response to the new challenges. Tree-Breeding and Genetics in New Zealand provides a critical historical account of the work on provenance research and tree breeding, often with the wisdom of hindsight, and it tracks the development of breeding strategy, especially for *P. radiata*, Douglas-fir and the most important eucalypt species, *E. regnans*, *E. fastigata* and *E. nitens*. The book is a compendium of abstracts and summaries of all publications and reports on tree improvement in New Zealand since the early 1950s, with added critical comment by the author on much of the work. It is intended for other tree breeders internationally, for interested NZ foresters and for graduate students studying genetics and tree breeding.

The Price of Gold John Sandlos, Arn Keeling, 2025-10-16 Fifty years of gold mining at Yellowknife in the Northwest Territories spurred northern settlement and produced millions of dollars in profits. But mineral processing also had catastrophic environmental effects and left a troubled legacy. When two mining companies in Yellowknife began processing gold ore in the 1940s, they did so with little or no pollution controls. Giant Mine spewed thousands of kilograms of arsenic trioxide from its roaster stack into the environment, causing illness and death among people and animals, especially in the adjacent Yellowknives Dene community. Even after the companies installed controls, arsenic trioxide continued to enter the atmosphere and waterways. Eventually Giant Mine, the biggest polluter, would deposit the arsenic dust beneath the mine, leaving 237,000 tonnes of highly toxic material buried underground. For decades, the mining companies and the federal government hid the worst effects of the pollution, doubted their own studies, and resisted calls for action. Yet the Yellowknives Dene fought back with the support of labour unions and environmental groups, questioning the safety of the air and water in their community and the massive toxic deposit underground. *The Price of Gold* traces the troubling history of one of Canada's most contaminated sites but also the inspiring story of Indigenous, labour, and environmental activists who resisted the ongoing poisoning of their communities.

Present-Day Corporate Communication Rudolf Beger, 2018-06-22 This book serves as an easy-to-read, up-to-date practical guide on professional corporate communication. The key market for this book is the Asia-Pacific region, mainly because there is a gap in know-how in corporate communication among many industry sectors. In addition, at present, one cannot find a lot of educational literature about corporate communication in the market. Therefore, this guidebook closes that gap. In Asia, companies are starting to realize the importance of corporate communication in all areas (external and internal corporate communication, crisis communication (Example: TEPCO) and political communication / government relations / lobbying). This is triggered not only by the recent high profile and success of targeted (political) communication in the USA, but also by the notorious export-orientation of many Asian companies and their increasingly multi-national orientation (fostered by M&A and foreign investments). In addition, the increasing importance of online communication and digital/social media is an important reason why existing guidebooks on corporate communication have to be reassessed and

modernized. This book focuses on all major aspects of modern corporate communication, including online / digital communication, and covers new developments, such as “fake news”, “post-truths”, “political correctness”, “the art of bridging” and other new phenomena in the world of (corporate) communication. Simple cartoon-style drawings supplement the text in order to facilitate reading and learning. Corporate communication professional, as well as students and professors in business/management programs, will be given tools to effectively and successfully plan and implement corporate communication strategies and tactics in all major areas.

Vassal State Angus Hanton, 2024-04-11 'Provocative and detailed ... Excellent' The Telegraph 'Shocking and meticulous' Danny Dorling 'An eye-opening revelation ... a must-read' Joel Bakan THE TELEGRAPH BEST BOOKS OF 2024 British politicians love to vaunt the benefits of the UK's supposed 'special relationship' with the US. But are we really America's economic partner - or its colony? Vassal State lays bare the extent to which US corporations own and control Britain's economy: how American business chiefs decide what we're paid, what we buy and how we buy it. US companies have carved up Britain between them, siphoning off enormous profits, buying up our most lucrative firms and assets, and extracting huge rents from UK PLC - all while paying little or no tax. Meanwhile, policymakers, from Whitehall mandarins to NHS chiefs, shape their decisions to suit the whims of our American corporate overlords. Based on his 40 years of business experience, devastating new research and interviews with the major players, Angus Hanton exposes why Britain has become the poor transatlantic relation - and what we can do to change it.

How Ruins Acquire Aesthetic Value Tanya Whitehouse, 2018-11-30 This book provides the first recent philosophical account of how ruins acquire aesthetic value. It draws on a variety of sources to explore modern ruins, the ruin tradition, and the phenomenon of “ruin porn.” It features an unusual and original combination of philosophical analysis, the author’s

photography, and reviews of both new and historically influential case studies, including Richard Haag's Gas Works Park, the ruins of Detroit, and remnants of the steel industry of Pennsylvania. Tanya Whitehouse shows how the users of ruins can become architects of a new order, transforming derelict sites into aesthetically significant places we should preserve.

The Post-Industrial Landscape as Site for Creative Practice Gwen Heeney, 2018-06-11 This book brings together experts in the fields of art history, visual arts, music, cultural geography, curatorial practice and landscape architecture to explore the role of material memory in the post-industrial landscape and the ways in which that landscape can act as a site for many forms of creative practice. It examines the role of material memory in the siting of public artworks and politically inspired installation art within the socio-economic post-industrial landscape. The post-industrial ruin as a place for innovation in the curatorial process is also investigated, as are social memory and the complexities of inscribing memory into places. A number of chapters focus on photography and its important role in recording memory as transformation, abandonment and erosion. Artists and musicians present personal case studies examining the siting of permanent and temporary artworks which can invoke memory of both culture and place. The land itself and its associated histories of post-industry are explored in artistic terms investigating dislocation, wasted spaces and extinction. Landscape architects and cultural geographers explore the aesthetic of the urban ruin, its natural and human ecologies and the re-wilding of urban spaces. The volume provokes discussion by a group of diverse experts on a very contemporary subject.

Genetics and Molecular Biology of Rhythms in Drosophila and Other Insects Jeffrey C. Hall, 2003-02-07 Biological rhythms, such as the sleep-wake cycle or circadian clock, are an intriguing aspect of biology. This book describes and evaluates studies in this field and discusses the investigations done on rhythmic biology, including genetic and molecular approaches used on other insect species. It highlights the mystery of the clock mechanism.

Identity Crisis John Sides, Michael Tesler, Lynn Vavreck, 2019-08-13 In this gripping in-depth account of the 2016 presidential election, authors Sides, Michael Tesler, and Lynn Vavreck reveal how Trump's victory was foreshadowed by changes in the Democratic and Republican coalitions that were driven by people's racial and ethnic identities.

Reimagining Alternative Technology for Design in the 21st Century Brook S. Kennedy, 2023-05-30 Reimagining Alternative Technology for Design in the 21st Century presents a new approach to design that harnesses still-valuable alternative, traditional and abandoned technologies alongside the creation of new ones to address contemporary global problems. It focuses on design opportunities that reduce energy and material consumption to tackle issues such as climate

change and pollution in industrialized economies. The book takes the reader on a journey surveying different facets of human activity to identify underused and discarded technologies that could be indispensable today. It critically addresses newer approaches to design and technology by comparing them to existing alternatives, unpacking examples including air conditioning with smart thermostats, electric lighting, durable reusable products, domestic maintenance tools and methods of transportation. Written for practicing designers and students in industrial design, architecture, sustainable design and human-centered design, this book provides new ideas and tools for creating more useful, energy-and-resource-efficient product designs and systems.

Planetary Sciences National Academy of Sciences, Division on Engineering and Physical Sciences, Commission on Engineering and Technical Systems, 1991-02-01 This book contains the proceedings from a workshop on planetary sciences sponsored by the Academy of Sciences of the USSR and the National Academy of Sciences. The proceedings include papers written by American and Soviet scientists who examine the current theoretical understanding of how the planets were formed and how they evolved to their present state. They assess the type of observations and experiments that are needed to advance understanding of the formation and evolution of the solar system based on the current theoretical framework.
