Pathfinders' Dawn of Understanding Elle Travis, 2023-01-31 It is the year 2030. Six best friends discover a magical world under the earth where time stands still. A messenger fairy takes the teens through an education unlike anything they

know. She transports them through historic ages and helps them remember truths found deep in their DNA. The teens hear wisdom from the giant whales that nature was never a competition or struggle of survival of the fittest, but rather all life; plants, trees, animals, insects, fish, microorganisms, and humans living in mutual cooperation. As the teens get a new education from Light Feather, another equally important mission is being carried out. Ms. Cheryl, a trailblazer and friend of the teens, is hard at work holding ceremonies at ancient sites where an energy grid crisscrosses the earth. It is being restored for the first time since the collapse of Atlantis. We learn how it mirrors a grid 60 miles above the earth which is under control of dark forces and has been for thousands of years. If Ms. Cheryl is successful, light forces from far away galaxies will be able to flip the grid and regain control. This will further accelerate the awakening of humanity to new possibilities for peace. Once their education is complete they take next steps for their initiation or 'rite of passage from childhood to adulthood. Upon completion they attend a graduation ceremony on the other side of the earth in the Great Pyramid of Giza where they experience many surprises. They step into character as superheroes in waiting as they meet their mentors and practice perfecting their superpowers. They each tackle a different aspect of nature. Over time the teens' crusade makes big changes to help people heal and that helps Mother Earth get better.

100 Best Quotes from Children's Books Susan Gabrielle, 2012-07-30 ABOUT THE BOOK Storytelling has been around as long as humankind, although the ability to be a storyteller or history-keeper is a special gift not everyone possesses. Generations of our ancestors told oral tales of encounters with nature-with wild animals or with the land itself, real or imagined. Clans gathered around to hear of dreams or of explanations of certain unexplainable phenomena, such as thunder and lightning. These stories were often illustrated by scratching them or painting them onto cave walls or on rocks, and especially those tales of great battles against warring tribes. Some of the stories only existed as verbal histories passed from grandfathers to sons to grandsons. MEET THE AUTHOR Susan Gabrielle has had work published in The Christian Science Monitor, TheBatShat, New Verse News, and local publications, and was a finalist in the Tiny Lights Narrative Essay Contest. Her short story What she should have said was published in the Social Justice issue of the Little Patuxent Review, and she has been nominated for a Pushcart Prize for her poem After 10 years of War. She currently teaches writing and literature classes as a university instructor, and is at work on a nonfiction writers' guide. You can reach her at Susan-Gabrielle.com EXCERPT FROM THE BOOK But while storytelling itself is an ancient art form, the genre of children's literature is relatively

new, and children's book publishing only came to prominence beginning in Great Britain in the 18th century. As Allen notes, From the time John Newbery, publisher and bookseller, decided to create books just for children in 18th-century England until the end of the 19th century, when English industry produced children's books of the highest quality, the body of children's literature that became available from England earned a growing respect throughout the literary world. Before that time, children were treated as miniature adults, useful only insofar as their ability to bring income to the home. Most children up to the 1800s worked on the family farm, so there was little free time for play, and since many children did not attend school, they could not read. The family may have owned a Bible, but it most likely would have been read to them by the father, perhaps after dinner. I Should've Been A Nun Raven Sky,2025-04-03 Raven Sky came up with the title as an oxymoron. She raised the question, Where would you be if you changed your choice at any point in your life? If you changed your choice from what you did choose to another? Would you have gone through the same challenges or maybe you wouldn't? Would you become the person you are now if you didn't choose the path you chose in the past? So by coming up with this title, it was meant to be humorous. If she chose to be a nun, she would not have learned the lessons or gone through the challenges she has gone through to make her who she is today. Nor would she be able to share her knowledge from her life to help those who search for peace or understanding in their life.

American Indian Educators in Reservation Schools Terry Huffman, 2013-02-15 The role of Native American teachers and administrators working in reservation schools has received little attention from scholars. Utilizing numerous interviews and extensive fieldwork, Terry Huffman shows how they define their roles and judge their achievements. He examines the ways they address the complex issues of cultural identity that affect their students and themselves and how they cope with the pressures of teaching disadvantaged students while meeting the requirements for reservation schools. Personal accounts from the educators enrich the discussion. Their candid comments about their choice of profession; their position as teachers, role models, and social service agents; and the sometimes harsh realities of reservation life offer unique insight into the challenges and rewards of providing an education to Native American students. Huffman also considers the changing role of Native educators as reservation schools prepare their students for the increasing complexities of modern life and society while still transmitting traditional culture. He shows that Native American educators meet daunting challenges with enduring

optimism and persistence. The insights these educators offer can serve those in other communities where students navigate a difficult path out of discrimination and poverty.

Indian Transnationalism Online Ajaya Kumar Sahoo, Johannes G. de Kruijf, 2016-05-23 Present-day migration takes place in a world characterized by the compression of time and space, with cheaper air travel and the existence of new communication technologies - the internet in particular - making it easier to stay in contact with the places, people and cultures that one has left. This book investigates the online organization of, and exchanges within, the global Indian diaspora. Bringing together research from around the world and presenting studies drawn from the US, Europe and India, it engages with theoretical and methodological debates concerning the shaping and transformation of migrant culture in emerging sites of sociality, and explores issues such as religion, citizenship, nationalism, region and caste as they relate to Indian identity in global, transnational contexts. With detailed empirical case studies showing both how members of the Indian diaspora connect with one other and 'life at home' and how institutions in India maintain such links, Indian Transnationalism Online sheds light on the ways in which information and communication technology functions as both a catalyst and indicator of contemporary socio-cultural change. As such it will be of interest to sociologists, anthropologists, political scientists and studies of cultural studies working in the areas of migration, transnationalism and ethnic studies.

Sustainable Revolution Juliana Birnbaum, Louis Fox, 2014-02-25 Urban gardeners. Native seed-saving collectives. Ecovillage developments. What is the connection between these seemingly disparate groups? The ecological design system of permaculture is the common thread that weaves them into a powerful, potentially revolutionary—or reevolutionary—movement. Permaculture is a philosophy based on common ethics of sustainable cultures throughout history that have designed settlements according to nature's patterns and lived within its bounds. As a movement that has been building momentum for the past 40 years, it now is taking form as a growing network of sites developed with the intention of regenerating local ecologies and economies. Permaculture strategies can be used by individuals, groups, or nations to address basic human needs such as food, water, energy, and housing. As a species, humans are being called forth to evolve, using our collective intelligence to meet the challenges of the future. Yet if we are to survive our collective planetary crisis, we need to revisit history, integrating successful systems from sustainable cultures. To boldly confront our position on the brink of the earth's carrying capacity and make changes that incorporate the wisdom of the past is truly revolutionary. Sustainable Revolution features the work of a worldwide network of visionaries, including journalists, activists, indigenous leaders and permaculturists such as David Holmgren, Vandana Shiva, Charles Eisenstein, Starhawk, Erik Assadourian, Victoria Tauli-Corpuz, Albert Bates, and Geoff Lawton. This beautifully photographed collection of profiles, interviews, and essays features 60 innovative community-based projects in diverse climates across the planet. Edited by anthropologist Juliana Birnbaum Fox and award-winning activist filmmaker Louis Fox, it can be read as an informal ethnography of an

international culture that is modeling solutions on the cutting edge of social and environmental change. The research presented in the book frames the permaculture movement as a significant ally to marginalized groups, such as the urban poor and native communities resisting the pressures of globalization. Sustainable Revolution uplifts and inspires with its amazing array of dynamic activists and thriving, vibrant communities.
