*Fictionality* Karen Petroski, 2023-04-20 Does fiction enhance reality, or threaten our sense of what is real? What, if anything, is special about experiencing fictional works and worlds? Today we speak casually of parallel universes and virtual reality; how much do we really know about what these phenomena involve? In *Fictionality*, Karen Petroski explains how philosophers and literary theorists have approached these questions in the Western literary tradition, from Greek antiquity to the present day. The book introduces readers to both long-running and contemporary debates about: The value and dangers of engagement with fiction The origins of fictional artworks, especially literary works, in Western literature The role played

by imagination in engaging with fiction The peculiarities of fictional worlds The structure of linguistic reference within fictional artworks The functions of fictionality in non-linguistic artworks such as film and television The role played by fictionality outside artworks, for example, in philosophy, law, and politics Fictionality offers an accessible and comprehensive introduction to this field of increasing critical and theoretical interest. Bringing together theoretical insights from a variety of perspectives, it will be an essential resource for anyone studying fictionality.

**Transparent Minds in Science Fiction** Paul Matthews, 2023-10-17 *Transparent Minds* explores the intersection between neuroscience and science fiction stories. Paul Matthews expertly analyses the narratives of humans and nonhumans from Mary Shelley to Kazuo Ishiguro across 200 years of the genre. In doing so he gives lucid insight into the meaning of existence and self-awareness. Rigorously researched and highly accessible, Matthews argues that psycho-emotional science fiction writers both imitate and inform alien and post-human consciousnesses through exploratory narratives and metaphor. Drawing from a diverse range of scholars and critics, Matthews explores topics such as psychonarration and neuroaesthetics, to create a thoughtful and cogent argument. By synthesising concepts from philosophy, neuroscience, and literary theory, Matthews posits the potential for science fiction to bridge the gap in understanding between AI and human minds. Given the recent advancements in AI technology, Matthews' timely discussion enters the speculative realm of sentient technology and postcyborg ethics. The work constitutes a major contribution to cross-disciplinary perspectives on alien and posthuman psychology, that engages with future states of existence in both ourselves and the machines we create. *Transparent Minds* will be of interest to innovators, authors, and science fiction enthusiasts alike.

**Jeroun** Zachary Jernigan, 2017-01-17 Collected in a single omnibus edition, both novels set in Zachary Jernigan's critically-acclaimed, genre-bending world of fierce sensuality, dangerous alchemy, and awakening gods. The Needle extends over the heads of all who live upon Jeroun. Composed of iron spheres massive enough to affect the tides, it is the god Adrash's ultimatum to the people on the planet below: Prove yourselves worthy, or be destroyed. Veda is a member of the Black Suits, an order of men and women who show their opposition to Adrash by staging battles in the streets. After witnessing the death of a child in his care, knowing himself to be responsible, he sets off on a journey to the decennial fighting tournament in Danoor. Traveling with him across the continent are Churl, a mercenary haunted by the ghost of her daughter, and Berun, a constructed man possessed by the soul of his creator. Both come to understand that Veda's victory would start an all-out religious war. Unbeknownst to these three travelers, the aristocratic outbound mage Ebn and her protégé Pol use powerful alchemy to travel into space. Their plan: engage Adrash in ways that threaten to bring the god's wrath down upon the world. Meanwhile, one of the world's deepest secrets is gradually revealed. A madman, insisting he is the link to an ancient world, a pantheon of forgotten gods, offers the most tempting lie of all... Hope. Jeroun collects the two novels No Return and Shower of Stones in a single new omnibus edition. Together these works combine the mythic inventiveness of early Roger Zelazny and Samuel R. Delany, the dark weirdness of China Mieville, and the dramatic scope of George R. R. Martin, creating a literary science fiction epic that defies easy categorization, resulting in one of the most critically acclaimed narratives of recent years.

Edge of Worlds Martha Wells, 2016-04-05 An expedition of groundlings from the Empire of Kish have traveled through the Three Worlds to the Indigo Cloud court of the Raksura, shape-shifting creatures of flight that live in large family groups. The groundlings have found a sealed ancient city at the edge of the shallow seas, near the deeps of the impassable Ocean. They believe it to be the last home of their ancestors and ask for help getting inside. But the Raksura fear it was built by their own distant ancestors, the Forerunners, and the last sealed Forerunner city they encountered was a prison for an unstoppable

evil. Prior to the groundlings' arrival, the Indigo Cloud court had been plagued by visions of a disaster that could destroy all the courts in the Reaches. Now, the court's mentors believe the ancient city is connected to the foretold danger. A small group of warriors, including consort Moon, an orphan new to the colony and the Raksura's idea of family, and sister queen Jade, agree to go with the groundling expedition to investigate. But the predatory Fell have found the city too, and in the race to keep the danger contained, the Raksura may be the ones who inadvertently release it. The Edge of Worlds, from celebrated fantasy author Martha Wells, returns to the fascinating world of The Cloud Roads for the first book in a new series of strange lands, uncanny beings, dead cities, and ancient danger.
