**The Landscape Urbanism Reader** Charles Waldheim, 2012-03-20 In The Landscape Urbanism Reader Charles Waldheim—who is at the forefront of this new movement—has assembled the definitive collection of essays by many of the field's top practitioners. Fourteen essays written by leading figures across a range of disciplines and from around the world—including James Corner, Linda Pollak, Alan Berger, Pierre Bolanger, Julia Czerniak, and more—capture the origins, the contemporary milieu, and the aspirations of this relatively new field. The Landscape Urbanism Reader is an inspiring signal to the future of city making as well as an indispensable reference for students, teachers, architects, and urban planners.

Architecture Competitions and the Production of Culture, Quality and Knowledge Jean-Pierre Chupin, Carmela Cucuzzella, Bechara Helal, 2015-01-26 [Winner of the 2016 Bronze medal in Architecture, Independent Publisher Book Awards] This book comprises a series of 22 case studies by renowned experts and new scholars in the field of architecture competition research. In 2015, it constitutes the most comprehensive survey of the dynamics behind the definition, organization, judging, archiving and publishing of architectural, landscape and urban design competitions in the world. These richly documented contributions revolve around a few questions that can be summarized in a two-fold critical interrogation: How can design competitions - these historical democratic devices, both praised and dreaded by designers - be considered laboratories for the production of environmental design quality, and, ultimately, for the renewing of culture and knowledge? Includes 340 illustrations, bibliographical references and index of over 200 cited competitions. Keywords: Architecture / International competitions / Architectural judgment / Design thinking / Digital archiving (databases) / Architectural publications / Architectural experimentation / Landscape architecture / Urban studies

Flights of Imagination Sonja Dümpelmann, 2014-09-19 In much the same way that views of the earth from the Apollo missions in the late 1960s and early 1970s led indirectly to the inauguration of Earth Day and the modern environmental movement, the dawn of aviation ushered in a radically new way for architects, landscape designers, urban planners, geographers, and archaeologists to look at cities and landscapes. As icons of modernity, airports facilitated the development

of a global economy during the twentieth and early twenty-first centuries, reshaping the way people thought about the world around them. Professionals of the built environment awoke to the possibilities offered by the airports themselves as sites of design and by the electrifying new aerial perspective on landscape. In *Flights of Imagination*, Sonja Dümpelmann follows the evolution of airports from their conceptualization as landscapes and cities to modern-day plans to turn decommissioned airports into public urban parks. The author discusses landscape design and planning activities that were motivated, legitimized, and facilitated by the aerial view. She also shows how viewing the earth from above redirected attention to bodily experience on the ground and illustrates how design professionals understood the aerial view as simultaneously abstract and experiential, detailed and contextual, harmful and essential. Along the way, Dümpelmann traces this multiple dialectic from the 1920s to the land-camouflage activities during World War II, and from the environmental and landscape planning initiatives of the 1960s through today.

**Constructing Gardens, Cultivating the City** Amanda Shoaf Vincent, 2023-05-16 *Constructing Gardens, Cultivating the City* is the first cultural history of major new parks developed in Paris in the late twentieth century, as part of the city's program of adaptive reuse of industrial spaces. Thanks to laws that gave the city more political autonomy, Paris's local government launched a campaign of park creation in the late 1970s that continued to the turn of the millennium. The parks in this book represent this campaign and illustrate different facets of their cultural and historical context. Archival research, interviews, and analyses of the parks reveal how postmodern debates about urban planning, the historic city, public space, and nature's presence in an urban setting influenced their designs. In sum, the city adopted the garden as a model for public parks, investing in complex, richly symbolic and representational spaces. These parks were intended to represent contemporary twists on traditional designs and serve local residents as much as they would contribute to Paris's role as a world city. The parks' development process often included points of conflict, pointing to differing views on what Parisian space should represent and fundamental contradictions between the characteristics of public space and the garden as it is traditionally defined. These parks demonstrate the ongoing cultivation of the city over time, in which transformed sites not only fulfil new functions but also engage with history and their surroundings to create new meaning. They stand for landscape as a form of signifying cultural production that directly engages with other art forms and ways of knowing. Just as the Luxembourg Gardens, the Tuileries, and the Buttes-Chaumont parks exemplify their eras' cultural dynamics, such parks as the Jardin Atlantique, Parc André-Citroën, and the Jardin des Halles express contemporary French culture within the archetypal space of their era, the city. Finally, they point the way to current trends in landscape architecture, such as citizen gardening and ecological initiatives.

*IIT Europe 13F Sim Yunhak* Yunhak Sim, 2013-12-05 The Paris Program studio examines architecture in an urban design framework. The studio investigates typologies (primarily institutions or collective housing) for metropolitan sites that are in

flux, where there is a crisis that effects expectations about the building type, or where infrastructural organization is shifting (because of new demands, because of demographic shifts, because of territorial instability, because of changing social attitudes, cultural values, economic conditions, etc.)

Architectural Drawings as Investigating Devices Marianna Charitonidou, 2023-07-10 Architectural Drawings as Investigating Devices explores how the changing modes of representation in architecture and urbanism relate to the transformation of how the addressees of architecture and urbanism are conceived. The book diagnoses the dominant epistemological debates in architecture and urbanism during the 20th and 21st centuries. It traces their transformations, paying special attention to Le Corbusier and Ludwig Mies van der Rohe's preference for perspective representation, to the diagrams of Team 10 architects, to the critiques of functionalism, and the upgrade of the artefactual value of architectural drawings in Aldo Rossi, John Hejduk, Peter Eisenman, and Oswald Mathias Ungers, and, finally, to the reinvention of architectural programme through the event in Bernard Tschumi and the Office for Metropolitan Architecture (OMA). Particular emphasis is placed on the spirit of truth and clarity in modernist architecture, the relationship between the individual and the community in post-war era architecture, the decodification of design process as syntactic analogy and the paradigm of autonomy in the 1970s and 1980s architecture, the concern about the dynamic character of urban conditions and the potentialities hidden in architectural programme in the post-autonomy era. This book is based on extensive archival research in Canada, the USA and Europe, and will be of interest to architects, artists, researchers and students in architecture, architectural history, theory, cultural theory, philosophy and aesthetics.

*Designing Networks Cities* Steve Whitford, James Brearley, 2024-01-31 designing networks cities presents a sophisticated, multi-disciplinary, and multi-dimensional approach to urban design. Emerging from years of practice, experimentation, and research by designers (landscape architects, urban planners, urban designers and architects), this approach engages with contemporary thought across a number of disciplines to re-invent the entrenched blunt instruments of the city making process. A cry for flexible, sharp-instruments in urban design, designing networks cities presents a multi-dimensional way of seeing the essential components of the city (form, space-time, order and aesthetics). It purposefully links traditional architectural design derivation mechanisms to urban design, in the hope that cities will not only be pragmatic, but also become sophisticated iconographically, poetically, and syntactically. It provides the tools to enable decision making within a multiplicity of constraints and opportunities: a philosophy of becoming, not being; a science of dynamic systems, not stasis; and an art of sensations, not subjectivity. And finally, and most importantly, it argues why it is important that cities embrace these multiple dimensions of society on a planet that is facing increasing environmental challenges: an economics focused on equity for all, not for some more than others; a politics supporting a genuine representational democracy, not one representing the overly influential; and a culture [including history] that embraces difference, not one that encourages

division. designing networks cities not only provides the means to identify these issues and a methodology to deal with them within a complex emerging co-existence, but also demonstrates the development of cities that embrace and respond to the complexities of life in what some are calling the Anthropocene.

*Design Thinking and Storytelling in Architecture* Peter G. Rowe, Yoeun Chung, 2023-12-18 This book offers a systematic account of the process of designing in architecture. Design thinking can be regarded as a fundamentally different way of knowing the world and a particular form of addressing creative problems. In this publication, the authors undertake to explore multiple and often controversial theoretical stances on the topic. Underlying principles of inquiry are present in all designing and a process takes place involving empathy or listening carefully before storytelling. Prototyping and testing of solutions are illustrated in the book with many examples, seen from different vantage points. In short, design thinking is a way of knowing and enabling being in the world and leads to a better understanding of architecture. Brilliant tour de force through several centuries of design thinking Peter G. Rowe is the internationally renowned author of some thirty books Lavishly illustrated volume with attractive graphic design

**Staging Urban Landscapes** B. Cannon Ivers, 2018-10-08 Open urban spaces are an ideal stage for public events. An important prerequisite for their design in an increasingly heterogeneous multicultural cityscape is the relationship between design, use, and social function. The book documents both temporary as well as permanent installations of various kinds - from the open-air courtyard of a museum to the design of a river bank promenade, through to a city park.

*Desert Paradises* Julian Bolleter, 2019-03-29 Desert Paradises: Surveying the Landscapes of Dubai's Urban Model explores how designed landscapes can play a vital role in constructing a city's global image and legitimizing its socio-political hierarchy. Using the case study of Dubai, Bolleter explores how Dubai's rulers employ a paradisiacal image of greening the desert, in part, as a tool for political legitimization. Bolleter also evaluates the designed landscapes of Dubai against the principles of the United Nations and the International Federation of Landscape Architects and argues that what is happening in Dubai represents a significant discrepancy between theory and practice. This book offers a new perspective on landscape design that has until now been unexplored. It would be beneficial to academics and students of geography, landscape architecture, urban design and urban planning - particularly those with an interest in Dubai or the many cities in the region that are experiencing Dubaiification.

**Learning from the Japanese City** Barrie Shelton, 2012-05-23 Japanese cities are amongst the most intriguing and confounding anywhere. Their structures, patterns of building and broader visual characteristics defy conventional urban design theories, and the book explores why this is so. Like its cities, Japan's written language is recognized as one of the most complicated, and the book is unique in revealing how the two are closely related. Set perceptively against a sweep of ideas drawn from history, geography, science, cultural and design theory, *Learning from the Japanese City* is a highly

original exploration of contemporary urbanism that crosses disciplines, scales, time and space. This is a thoroughly revised and much extended version of a book that drew extensive praise in its first edition. Most parts have stood the test of time and remain. A few are replaced or removed; about a hundred figures appear for the first time. Most important is an entirely new (sixth) section. This brings together many of the urban characteristics, otherwise encountered in fragments through the book, in one walkable district of what is arguably Japan's most convenient metropolis, Nagoya. The interplay between culture, built form and cities remains at the heart of this highly readable book, while a change in subtitle to Looking East in Urban Design reflects increased emphasis on real places and design implications.

**Landscape Architecture** Jamie Liversedge, Robert Holden, 2014-03-03 Aimed at prospective and new students, this book gives a comprehensive introduction to the nature and practice of landscape architecture, the professional skills required and the latest developments. After discussing the history of the profession, the book explains the design process through principles such as hierarchy, human scale, unity, harmony, asymmetry, colour, form and texture. It looks at how design is represented through both drawing and modelling, and through digital techniques such as CAD and the use of GIS (Geographic Information Systems). This is followed by an examination of project management and landscape management techniques. Finally, the book explores educational and employment opportunities and the future of the profession in the context of climate change and sustainability. Illustrated with international examples of completed projects, Landscape Architecture provides an invaluable, one-stop resource for anyone considering studying or a career in this field.

The Urbanism Reader Stefan Al, Tom Verebes, 2025-02-06 Positioning design at the center of the debate, The Urbanism Reader brings together classic and contemporary readings to help designers understand the complexities of cities and urban design in the 21st century. The selection of readings presented here is uniquely tailored to a design perspective for architects and urban designers – balancing social issues in urbanism with a clear focus on foregrounding design as an instrument for change in cities, and examining the outcomes and challenges of recent design theories, design methods, and technologies in the built urban environment. Covering today's most urgent issues, 45 texts explore key topics in urbanism – from digital design technologies to smart cities, from the ongoing ecological crisis to public health and the impact of Covid-19, and from emergence and informality to economic inequity in global cities. Chapters cover cultural issues including diversity, indigenous knowledge, decolonization, social justice, and inclusion alongside technological developments, while a final chapter speculates on the future of urbanism through readings in AI, virtual reality, and the frontiers of current thinking in architecture and urban design. The extracts are grouped by theme, each with an introduction to the historical contexts and guiding paradigms – helping design students, researchers, and professionals to make sense of the diverse field of theory and practice in the past, present, and future of global urbanism.

**Oswald Mathias Ungers and Rem Koolhaas** Lara Schrijver, 2021-10-07 Lara Schrijver examines the work of Oswald

Mathias Ungers and Rem Koolhaas as intellectual legacy of the 1970s for architecture today. Particularly in the United States, this period focused on the autonomy of architecture as a correction to the social orientation of the 1960s. Yet, these two architects pioneered a more situated autonomy, initiating an intellectual discourse on architecture that was inherently design-based. Their work provides room for interpreting social conditions and disciplinary formal developments, thus constructing a 'plausible' relationship between the two that allows the life within to flourish and adapt. In doing so, they provide a foundation for recalibrating architecture today.

Paradigm Islands: Manhattan and Venice Teresa Stoppani, 2012-12-06 Concerning architecture and the city, built, imagined and narrated, this book focuses on Manhattan and Venice, but considers architecture as an intellectual and spatial process rather than a product. A critical look at the making of Manhattan and Venice provides a background to addressing the dynamic redefinition and making of space today. The gradual processes of adjustment, the making of a constantly changing dense space, the emphasis on forming rather than on figure, the incorporation of new forms and languages through their adaptation and transformation, make both Manhattan and Venice, in different ways, the ideal places to contextualize and address the issue of an architecture of the dynamic.

**Architects Today** Kester Rattenbury, Robert Bevan, Kieran Long, 2006-08-10 This volume offers both an introduction to and an insight into key contemporary architects as well as giving a snapshot of the varied nature of architecture today. For each architect there are details of their life and work and illustrations of their most representative and iconic buildings.

**Collage and Architecture** Jennifer Shields, 2023-07-04 Collage and Architecture remains an invaluable resource for students and practitioners as the first book to cover collage as a tool for analysis and design in architecture. Since entering the contemporary art world over a century ago, collage has profoundly influenced artists and architects throughout the twentieth century and into the twenty-first. In *Collage and Architecture*, Jennifer A. E. Shields explores its influence, using the artworks and built projects of leading artists and architects, such as Mies van der Rohe, Daniel Libeskind, and Teddy Cruz to illustrate the diversity of collage techniques. This new edition includes: A stronger focus on contemporary practices, including digital methods; New designers and architects, including Marshall Brown, WAI Architecture Think Tank, and Tatiana Bilbao, bringing their methods and work to life; An expanded global and diverse perspective of architecture as collage; Collage is an important instrument for analysis and design. Through its 261 color images, this book shows how this versatile medium can be adapted and transformed in your own work.

*Is Landscape... ?* Gareth Doherty, Charles Waldheim, 2015-10-08 *Is Landscape . . . ?* surveys multiple and myriad definitions of landscape. Rather than seeking a singular or essential understanding of the term, the collection postulates that landscape might be better read in relation to its cognate terms across expanded disciplinary and professional fields. The publication pursues the potential of multiple provisional working definitions of landscape to both disturb and develop

received understandings of landscape architecture. These definitions distinguish between landscape as representational medium, academic discipline, and professional identity. Beginning with an inquiry into the origins of the term itself, *Is Landscape . . . ?* features essays by a dozen leading voices shaping the contemporary reading of landscape as architecture and beyond.

Collage and Architecture Jennifer A.E. Shields, 2014-01-03 Collage and Architecture is the first book to cover collage as a tool for design in architecture, making it a valuable resource for students and practitioners. Author Jennifer Shields uses the artworks and built projects of leading artists and architects, such as Le Corbusier, Daniel Libeskind, and Teddy Cruz to illustrate the diversity of collage techniques. The six case study projects from Mexico, Argentina, Sweden, Norway, the United States, and Spain give you a global perspective of architecture as collage. Collage is an important instrument for analysis and design, and Shields's presentation of this versatile medium draws on decades of relevance in art and architecture, to be adapted and transformed in your own work.
