A Measure of Intelligence Pepper Stetler,2024-08-20 In a quest to advocate for her daughter, Pepper Stetler uncovers the dark history of the IQ test, leading her to question what exactly we are measuring when we measure intelligence. When Pepper Stetler learned that her daughter, Louisa, who has Down Syndrome, would be required to take periodic IQ tests to secure support in school, she asked a simple question: Why? The hunt for an answer set Stetler on a winding, often dark investigation into how the IQ came to be the irrefutable standard for measuring intelligence. Blending a mother's love and dedication to her daughter with incisive historical and cultural analysis, *A Measure of Intelligence* investigates the origins of the IQ test and its influence on our oppressive culture of high stakes testing. As she unravels the history of the IQ--exposing its roots in eugenics, racism, xenophobia, and ableism--Stetler realizes that the desire to quantify intelligence is closely tied to the desire to segregate society. *A Measure of Intelligence* is at once a mother's determined quest, a demand for a fundamental reevaluation of how we understand an individual's perceived potential, and a recognition of what we miss when we judge one another by this warped scale.

The Measured Word Kurt Brown,2001 Though the interests of science and art frequently seem to inhabit opposite poles, *The Measured Word* assembles a brilliant anthology of twelve essays that illumine the historic--and newly emerging--relationships between the poetic and scientific imaginations. Assembling the writings of leading contemporary poets, essayists, and thinkers, Kurt Brown highlights ways in which poets use scientific discoveries and mathematical ideas to their

artistic advantage--and offers insight on the recently apparent integration of technology and other discoveries into the postmodernist poetry. Here are meditations on the similarities and differences between the poetic and scientific imagination; on the poetic use of fractals; on hypertext; on the changing shape of poetry in the scientific age. Commentary by Czech poet and immunologist Miroslav Holub, Paul Lake, Alison Hawthorne Deming, Alice Fulton, Forrest Gander, and Stephanie Strickland, among others, presents a diverse selection of opinions. These viewpoints are complemented by many careful, innovative readings of individual poems informed by the sciences. The writings in this collection not only celebrate the advent of a new age of discovery but also identify the need for a revision of the western thinking that separates the mind and the heart--replacing division with the reciprocity of mutual communication.
