Gestión de muestras biológicas POSADA AYALA, MARÍA,2020-04-24 El profundo conocimiento de las bases en Ciencias Experimentales lleva al éxito de la mayor parte de los análisis clínicos. El libro desarrolla los contenidos del módulo profesional de Gestión de Muestras Biológicas, de los Ciclos Formativos de grado superior en Anatomía Patológica y Citodiagnóstico, y en Laboratorio Clínico y Biomédico, pertenecientes a la familia profesional de Sanidad. Gestión de muestras biológicas se estructura en diez unidades, cuyo estudio permitirá al alumnado reconocer los pasos básicos que ha de seguir a la hora de abordar un análisis de moléculas, tanto en fluidos biológicos como en tejidos. Esto abarca también el control de la conservación y el almacenaje de las muestras. Introduce además algunas nociones de control de calidad, y una presentación de la gestión de los biobancos. Asimismo, se incluye una unidad sobre seguridad en el laboratorio para aprender a garantizar la seguridad del técnico superior y para gestionar los residuos químicos, radiactivos y biológicos, algo fundamental para cuidar el medioambiente. María Posada Ayala es docente de la rama biosanitaria, además de profesora universitaria en la rama biomédica y doctora en Bioquímica, Biología Molecular y Biomedicina. Comenzó su vida laboral en la industria farmacéutica con la investigación de nuevos fármacos y continuó trabajando en la investigación, tanto en la universidad como en el sector hospitalario. Todo lo anterior le ha permitido dotar al libro de una completa visión del trabajo diario y real que se lleva a cabo en un laboratorio. Además, es autora de otros títulos de formación publicados por esta editorial.
