The History of McDonald's Heike Mieth, 2007-11 Essay from the year 1999 in the subject American Studies - Culture and Applied Geography, grade: 1,3, Friedrich-Alexander University Erlangen-Nuremberg, 26 entries in the bibliography, language: English, abstract: Going for a walk through a deserted alley in the city at night, watching the stars shining above, it might not seldom happen that you notice a yellow glow from behind a corner. When having curiously turned around it, perceiving a creepy loud rumbling, you spot that the glow comes from a big shining M floating in the air. The symbol becomes bigger and bigger the nearer you walk towards it, your pulse rises and having finally reached the M you open the door of the McDonald's restaurant and enter to have a burger to stop the rumbling of your stomach. Meanwhile, there is a McDonald's in every big city at nearly every corner. But where does McDonald's originally come from? This thesis gives a summary of the history of McDonald's - one of the most widespread companies in the world.

The Story of McDonald's Sara Gilbert, 2008-07 Details the history of the company from its beginnings in Illinois to becoming a major, international corporation.

McDonald's and Subway. A critical comparison of their organisational structures and fit to the chosen corporate strategy Patrick Schneider, 2019-05-06 Seminar paper from the year 2019 in the subject Business economics - Business Management, Corporate Governance, grade: 2,0, University of Applied Sciences Essen, course: Strategic Corporate Management, language: English, abstract: This assignment is answering the task to compare the organisational structure of two direct competitors in an industry of your choice. To what extent and how does the chosen organisational structure reflect the specific corporate strategy of these companies? Discuss the respective structures critically. The assignment is comparing McDonald's and Subway, the two main competitors in the fast food industry. The chosen companies are the two market leaders in the fast food industry. Since Hill and Jones point out that a corporate strategy formulation comes first followed by designing the organisational structure, the following sections will describe the corporate strategies of both companies first. Later on, it will be evaluated critically what kind of organisational structure each of the competitors are built on and which one has the better fit with regard to their strategy. In the end, concluding remarks and an outlook will be provided. The organisational structure of any company can be understood as a vehicle that depicts the activities and connections of various divisions, business units and functions of that company. It helps managers to comprehend and to control the flow of

activities. The organisational structure is highly important to be established appropriately because it presets the paths on which a company can create value and ultimately determines the efficiency of the value chain. There are various problems that can come up especially in large companies like a lack of coordination, information distortion and motivational problems. The weaknesses of a organisational structure are to be kept in mind when setting up a corporate strategy or else the structure needs to undergo changes in order to follow the strategy. The fit between a chosen corporate strategy and the structure of an organisation has an important influence on how smooth the different organs of a company can work together to fulfil the corporate objectives.

The Persuasion Industries Steven McKeivitt, 2018-08-08 At the end of the twentieth century, Britain was a consumer society. Commerce, intoxicating and addictive, had almost entirely colonized modern life. People were immersed in, and ultimately defined by, promotional culture. The things they consumed had overtaken class, religion, geography, or occupation as the primary form of self-identity and self-expression. For much of the twentieth century all forms of brand communication- from political campaigning to product advertising- were based on the theory of rational appeals to rational consumers. There was only one problem with this theory: it was wrong. *The Persuasion Industries: The Making of Modern Britain* examines developments in marketing, advertising, public relations, and branding. It explores the role they played in the emergence of the consumer society. New ideas from fields of behavioural psychology and economics, together with internal developments such as planning, positioning, and corporate branding allowed persuasion to become the driving force within many commercial enterprises. Together these changes led to the emergence of an alternative emotional model of brand communication. A simple idea that proved so compelling it changed the world we live in.

Eating History Andrew F. Smith, 2009-09-18 Food expert and celebrated food historian Andrew F. Smith recounts in delicious detail the creation of contemporary American cuisine. The diet of the modern American wasn't always as corporate, conglomerated, and corn-rich as it is today, and the style of American cooking, along with the ingredients that compose it, has never been fixed. With a cast of characters including bold inventors, savvy restaurateurs, ruthless advertisers, mad scientists, adventurous entrepreneurs, celebrity chefs, and relentless health nuts, Smith pins down the truly crackerjack history behind the way America eats. Smith's story opens with early America, an agriculturally independent nation where most citizens grew and consumed their own food. Over the next two hundred years, however, Americans would cultivate an entirely different approach to crops and consumption. Advances in food processing, transportation, regulation, nutrition, and

science introduced highly complex and mechanized methods of production. The proliferation of cookbooks, cooking shows, and professionally designed kitchens made meals more commercially, politically, and culturally potent. To better understand these trends, Smith delves deeply and humorously into their creation. Ultimately he shows how, by revisiting this history, we can reclaim the independent, locally sustainable roots of American food.

Fast Food, Fast Talk Robin Leidner, 1993-08-04 Attending Hamburger University, Robin Leidner observes how McDonald's trains the managers of its fast-food restaurants to standardize every aspect of service and product. Learning how to sell life insurance at a large midwestern firm, she is coached on exactly what to say, how to stand, when to make eye contact, and how to build up Positive Mental Attitude by chanting I feel happy! I feel terrific! Leidner's fascinating report from the frontlines of two major American corporations uncovers the methods and consequences of regulating workers' language, looks, attitudes, ideas, and demeanor. Her study reveals the complex and often unexpected results that come with the routinization of service work. Some McDonald's workers resent the constraints of prescribed uniforms and rigid scripts, while others appreciate how routines simplify their jobs and give them psychological protection against unpleasant customers. Combined Insurance goes further than McDonald's in attempting to standardize the workers' very selves, instilling in them adroit maneuvers to overcome customer resistance. The routinization of service work has both poignant and preposterous consequences. It tends to undermine shared understandings about individuality and social obligations, sharpening the tension between the belief in personal autonomy and the domination of a powerful corporate culture. Richly anecdotal and accessibly written, Leidner's book charts new territory in the sociology of work. With service sector work becoming increasingly important in American business, her timely study is particularly welcome.

Fast Food, Fast Track Jennifer Talwar, 2018-03-05 Praise for *Fast Food, Fast Track* A fine ethnography with both theoretical and advocative significance, representing the best qualitative sociology. — Choice Explores the intimate realities and behind-the-scenes exchanges of a multiethnic work force serving the typical American meal. Through a lively narrative and insightful stories, Jennifer Parker Talwar gives a full sense of what it's like to live in both a global economy and a local culture. — Sharon Zukin, author of *The Cultures of Cities* No longer just pocket money for American teens, wages paid by multinational fast-food chains are going to a new generation of order-takers, burger-flippers, and basket-fryers—newly arrived immigrants hailing from China, the Caribbean, Latin America, and India, a colorful sea of faces has taken its place behind one of the most ubiquitous American business institutions—the fast-food counter. They have become a vital link between the growing service sector in our cities' ethnic enclaves and the multi-billion dollar global fast-food industry. For four years, sociologist Jennifer Parker Talwar went behind the counter herself and listened to immigrant fast-food workers in New York City's ethnic communities. They talked about balancing their low-paying jobs and monotonous daily reality with keeping the faith that these very jobs could be the first step on the path to the American Dream. In this original and compelling work of ethnography, Talwar shows that contrary to those arguing that the fast-food industry only represents an increasing homogenization of the American workforce, fast-food chains in immigrant communities must and do adapt to their

surroundings.

International Business and Culture Małgorzata Bartosik-Purgat, Monika Guzek, 2024-06-14 *International Business and Culture: Challenges in Cross-Cultural Marketing and Management* explores the intricate relationship between culture and business, offering valuable insights for both practitioners and scholars. The authors delve into the profound impact of cultural dimensions on various aspects of international business, marketing, human resource management, and organisational structure. They examine the theoretical frameworks underpinning these studies through a meticulous narrative literature review and case studies. The significance of understanding cultural influences on business decisions becomes paramount in an increasingly interconnected world. The book addresses challenges faced by companies operating across diverse cultures, emphasising the need for adaptation in international marketing and management. Based on practical examples, the research focuses on identifying the most culturally sensitive areas in international business and explores the crucial cultural determinants influencing engagement with foreign markets. The book's theoretical background spans international business, marketing, and management, and it is intertwined with cultural concepts from Hofstede and Hall. It consists of 16 chapters covering marketing and communication strategies across cultures, cultural aspects of international business and cross-cultural management based on practical examples of Duracell, Inc., PepsiCo, Volkswagen, VELUX Group, and Amica Group, among others. The book highlights the undeniable interconnectedness of culture and business. As businesses expand internationally, the symbiotic relationship between culture and business remains a pivotal factor influencing success and growth.
