W. Eugene Kleinbauer, Antony White, Henry Matthews

Hagia Sophia: A History Richard Winston, 2017-05-18 Hagia Sophia is more than 1,400 years old. It was a Christian Church, then a Muslim mosque, and is now a museum. Here, from National Book Award winner Richard Winston, is the extraordinary story of one of the world's great architectural treasures and its everchanging role in the history of Constantinople.

Hagia Sophia, 1850-1950 Robert S. Nelson, 2004-07-14 Hagia Sophia, the Church of Holy Wisdom, sits majestically atop the plateau that commands the straits separating Europe and Asia. Located near the acropolis of the ancient city of Byzantium, this unparalleled structure has enjoyed an extensive and colorful history, as it has successively been transformed into a cathedral, mosque, monument, and museum. In *Hagia Sophia, 1850-1950*, Robert S. Nelson explores its many lives. Built from 532 to 537 as the Cathedral of Constantinople, Hagia Sophia was little studied and seldom recognized as a great monument of world art until the nineteenth century, and Nelson examines the causes and consequences of the building's newly elevated status during that time. He chronicles the grand dome's modern history through a vibrant cast of characters—emperors, sultans, critics, poets, archaeologists, architects, philanthropists, and religious congregations—some of whom spent years studying it, others never visiting the building. But as Nelson shows, they all had a hand in the recreation of Hagia Sophia as a modern architectural icon. By many means and for its own purposes, the West has conceptually transformed Hagia Sophia into the international symbol that it is today. While other books have covered the architectural history of the structure, this is the first study to address its status as a modern monument. With his narrative of the building's rebirth, Nelson captures its importance for the diverse communities that shape and find meaning in Hagia Sophia. His book will resonate with cultural, architectural, and art historians as well as with those seeking to acquaint themselves with the modern life of an inspired and inspiring building.

The Hagia Sophia Charles River Charles River Editors, 2018-02-15 *Includes pictures *Includes contemporary accounts of the construction of the Hagia Sophia and its appearance *Includes a bibliography for further reading So the church has been made a spectacle of great beauty, stupendous to those who see it and altogether incredible to those who hear of it...Its breadth and length have been so fittingly proportioned that it may without impropriety be described as being both very long and extremely broad. And it boasts of an ineffable beauty, for it subtly combines its mass with the harmony of its proportions,

having neither any excess nor any deficiency, inasmuch as it is more pompous than ordinary [buildings] and considerably more decorous than those which are huge beyond measure; and it abounds exceedingly in gleaming sunlight. You might say that the [interior] space is not illuminated by the sun from the outside, but that the radiance is generated within, so great an abundance of light bathes this shrine all round. - Procopius The Hagia Sophia, built from 532-537, is inarguably the masterpiece of Byzantine architecture and one of the greatest buildings ever constructed. Upon its completion, the Hagia Sophia remained the largest enclosed space in the world for nearly a thousand years, a reign that only ended after the rebuilding of St. Peter's in Rome. Fittingly, the rebuilding of St. Peter's was partly inspired by the conversion of Hagia Sophia into a mosque in 1453. The building of Hagia Sophia itself was shocking and transformational. Beginning with Procopius of Caesarea, Justinian's court historian, visitor after visitor noted that the giant dome seems to hover on air, and it's unquestionably true that the arches, vaults, semidomes, and domes add up for an otherworldly, ethereal effect. The surfaces are enriched by colored marble and elaborate mosaics, and when viewing from the aisles and galleries, looking into the nave is dramatic thanks to all the interconnecting layered spaces and repeating, complex curved forms. Interestingly, however, the brick exterior of the building was left unadorned, representing a shell that houses a magnificent interior. The Hagia Sophia examines the history of one of the world's most famous religious sites and analyzes the religion and politics that shaped its fate.

A World History of Art Hugh Honour, John Fleming, 2005 Over two decades this art historical tour de force has consistently proved the classic introduction to humanity's artistic heritage. From our paleolithic past to our digitised present, every continent and culture is covered in an articulate and well-balanced discussion. In this Seventh Edition, the text has been revised to embrace developments in archaeology and art historical research, while the renowned contemporary art historian Michael Archer has greatly expanded the discussion of the past twenty years, providing a new perspective on the latest developments. The insight, elegance and fluency that the authors bring to their text are complemented by 1458 superb illustrations, half of which are now in colour. These images, together with the numerous maps and architectural plans, have been chosen to represent the most significant chronological, regional and individual styles of artistic expression.

History and Society during the Mamluk Period (1250-1517) Bethany J. Walker, Abdelkader Al Ghouz, 2021-04-12 This volume is a collection of research essays submitted by fellows of the Annemarie Schimmel Kolleg, an Advanced Center of Research in Mamluk Studies. It covers three themes, which correspond to the research agenda of the final three academic years of the Annemarie Schimmel Kolleg. These were: environmental history, material culture studies, and im/mobility. The aim of the contributions is to overcome the disciplinary boundaries of the field and to engage in scholarly debates in Ottoman Studies, European history, archaeology and art history, and even the natural sciences.

The History of Architecture Gaynor Aaltonen,2013-07-28 This book takes a bird's eye view of architecture in time, and explores the different ways architects have responded to civilizations, giving them the buildings and cities they deserve.

Flashpoint Hagia Sophia Brian Croke,2021-12-30 Istanbul's Hagia Sophia ('Holy Wisdom'), or Ayasofya, is one of the world's most visited buildings. Yet, few visitors have any idea of its long and complex story, or why it has always been a place where history, religion and politics collide. In July 2020, Turkish President Erdoğan set off an explosive controversy by announcing that Hagia Sophia would now be modified into a mosque. This decision provoked fierce criticism from UNESCO because Hagia Sophia was enjoying World Heritage Site benefits. The United States, the European Union, Russia and Greece all chimed in. However, Erdoğan's action was wildly popular in Turkey, with its 99% Muslim population. Why is Hagia Sophia so important to modern Turkey? Why this provocative decision, and why now? How could all the international critics be ignored? Why does the world care so much about this old building? Why should it continue to care? This book explains President Erdoğan's controversial decision in terms of Turkey's national, independent and Islamic politics, and as a response to the mosque massacre in Christchurch in March 2019 when his life was threatened by the gunman. Any consideration of Hagia Sophia's present and future also requires appreciation of the almost 1,500-year old story of this architectural marvel, from its inception as a church in 537 to its configuration as a mosque in 2020 and beyond. Because all world heritage sites depend on national management, Hagia Sophia will remain Turkey's responsibility, but the international community is watching to ensure Turkey honours Hagia Sophia's entire heritage, from the 6th century to the 21st century.

History of Alevism Musa Güner, This work concerns the development of Alevism from the 6th century to the present. As are all historical and social problems in Turkey, it is a complex issue by its nature. One might think that this situation stems primarily from the structure of our social paradigm, which turns even the most easily solvable problems into intractable ones and tends to see the glass as half empty. Alevism remains a much-debated phenomenon, in not only the current political but also theological and historical contexts. This study allows the realities of Alevism to be seen and directs the reader to look at Alevism from a different perspective by going beyond the sterile Alevism debates.

The Conquest of Istanbul and the Manipulation of Architecture Berin F. Gür, 2025-08-15 This book explores the contemporary memory of the Ottoman conquest of Constantinople (now Istanbul) in 1453. It focuses on how the conquest is remembered by Islamist-nationalist imagination in Turkey today and how architecture plays a role in shaping this memory, underscoring its susceptibility to political manipulation. Discussing Islamist-nationalist rhetoric of Istanbul's conquest through the conceptual framework of melancholy—a significant theme in the history of ideas—the argument posits that this narrative is a politically driven endeavor fueled by paranoia, producing melancholy over the conquest of Istanbul. This book redefines melancholy as 'a politically manipulated project', which anchors the imagery of conquest to spatial and architectural symbols of mourning while creating imaginary lost objects. Architecture becomes the book's subject as the bearer of clues to searching for lost objects and as a spatial-political tool of conquest rhetoric, such as the Hagia Sophia in Istanbul and the Panorama 1453 History Museum. As various groups with differing ideologies and identities continue to feel

the impact of the conquest, this book also examines the 'other' side of the event—specifically, how the Greeks commemorate the fall of Constantinople, recognizing it as a dark memory from their perspective. This book targets diverse audiences in cultural studies, social sciences, arts, and humanities—including architecture, history, anthropology, and political studies—interested in Southeast Europe and Islamic societies.

A Social and Cultural History of Late Antiquity Douglas Boin, 2017-12-18 2019 PROSE Award finalist in the Classics category! *A Social and Cultural History of Late Antiquity* examines the social and cultural landscape of the Late Antique Mediterranean. The text offers a picture of everyday life as it was lived in the spaces around and between two of the most memorable and towering figures of the time—Constantine and Muhammad. The author captures the period using a wide-lens, including Persian material from the mid third century through Umayyad material of the mid eighth century C.E. The book offers a rich picture of Late Antique life that is not just focused on Rome, Constantinople, or Christianity. This important resource uses nuanced terms to talk about complex issues and fills a gap in the literature by surveying major themes such as power, gender, community, cities, politics, law, art and architecture, and literary culture. The book is richly illustrated and filled with maps, lists of rulers and key events. *A Social and Cultural History of Late Antiquity* is an essential guide that: Paints a rich picture of daily life in Late Antique that is not simply centered on Rome, Constantinople, or Christianity Balances a thematic approach with rigorous attention to chronology Stresses the need for appreciating both sources and methods in the study of Late Antique history Offers a sophisticated model for investigating daily life and the complexities of individual and group identity in the rapidly changing Mediterranean world Includes useful maps, city plans, timelines, and suggestions for further reading *A Social and Cultural History of Late Antiquity* offers an examination of everyday life in the era when adherents of three of the major religions of today—Christianity, Judaism, and Islam—faced each other for the first time in the same environment. Learn more about *A Social and Cultural History of Late Antiquity*'s link to current social issues in Boin's article for the History News Network.

The Heritage of Edirne in Ottoman and Turkish Times Birgit Krawietz, Florian Riedler, 2019-12-16 Modern scholarship has not given Edirne the attention it deserves regarding its significance as one of the capitals of the Ottoman Empire. This edited volume offers a reinterpretation of Edirne's history from Early Ottoman times to recent periods of the Turkish Republic.

Presently, disconnections and discontinuities introduced by the transition from empire to nation state still characterize the image of the city and the historiography about it. In contrast, this volume examines how the city engages in the forming, deflecting and creative appropriation of its heritage, a process that has turned Edirne into a UNESCO heritage hotspot. A closer historical analysis demonstrates the dissonances and contradictions that these different interpretations and uses of heritage produce. From the beginning, Edirne was shaped by its connectivity and relationality to other places, above all to Istanbul. This perspective is employed at many different levels, e.g., with regard to its population, institutions, architecture, infrastructures and popular culture, but also regarding the imaginations Edirne triggered. In sum, this multi-disciplinary volume boosts urban history beyond Istanbul and offers new insight into Ottoman and Turkish connectivities from the vantage point of certain key moments of Edirne's history.

The Power of Geography Tim Marshall, 2021-11-09 From the author of the New York Times bestseller *Prisoners of Geography*, a fascinating, “refreshing, and very useful” (The Washington Post) follow-up that uses ten maps to explain the challenges to today’s world powers and how they presage a volatile future. Tim Marshall’s global bestseller *Prisoners of Geography* offered us a “fresh way of looking at maps” (The New York Times Book Review), showing how every nation’s choices are limited by mountains, rivers, seas, and walls. Since then, the geography hasn’t changed, but the world has. Now, in this “wonderfully entertaining and lucid account, written with wit, pace, and clarity” (Mirror, UK), Marshall takes us into ten regions set to shape global politics. Find out why US interest in the Middle East will wane; why Australia is now beginning an epic contest with China; how Turkey, Saudi Arabia, and the UK are cleverly positioning themselves for greater power; why Ethiopia can control Egypt; and why Europe’s next refugee crisis looms closer than we think, as does a cutting-edge arms race to control space. Innovative, compelling, and delivered with Marshall’s trademark wit and insight, this is “an immersive blend of history, economics, and political analysis that puts geography at the center of human affairs” (Publishers Weekly).
