Matematica finanziaria (classica e moderna) Fabrizio Cacciafesta,2013-10-25 La Matematica Finanziaria, da sempre strumento di lavoro indispensabile per tutte le professioni aventi a che fare con il commercio e l'economia, ha visto ingigantita la sua importanza dal recente, tumultuoso ed incontrollato sviluppo della dimensione finanziaria della vita economica. Al tempo stesso, è venuta trasformandosi da materia tecnicamente elementare a campo di ricerca avanzata. Nell'opinione di chi scrive, un corso base nella materia non può rinunciare all'impostazione rigorosa classica: quella, per intendersi, che insegna a distinguere un tasso d'interesse da uno di sconto, l'interesse semplice da quello composto, e un tasso di valutazione da uno di rendimento (e non sembri poco). Quanto agli sviluppi più moderni, essi richiedono, per una piena comprensione ed un utilizzo consapevole, una preparazione di partenza impensabile in uno studente dei primi anni di corso. Senza cercare improbabili (ed ipocrite) scorciatoie verso formule magiche, è però possibile introdurre, se non le tecniche, le logiche che le sostengono; anche, se non soprattutto, per insegnare a riconoscerne i limiti di validità.

Esercizi di matematica finanziaria. Svolti e commentati Massimiliano Frezza,2019

Matematica finanziaria Samuel A. Broverman,2020-03-20T15:25:00+01:00 Il volume affronta i temi classici trattati in un corso di matematica finanziaria con un approccio che coniuga teoria e applicazioni pratiche. I temi a cui viene dato maggiore spazio sono: la struttura a termine dei tassi di interesse, i contratti a termine di vario tipo, gli swap su tassi di interesse e le opzioni finanziarie. Alle formule e alle definizioni chiave è data ampia evidenza, come è forte il richiamo a eventi di attualità del mondo reale per dimostrare l'applicazione dei concetti chiave. Il testo è corredata da numerosi esercizi svolti, contenuti sia nel volume cartaceo sia nell'area Mybook.

Lezioni di matematica finanziaria. Esercizi e temi d'esame svolti Luigi Bilancia,2011

Matematica Finanziaria Daniele Ritelli,2014-01-01 Il manuale sfrutta il materiale utilizzato nei corsi di Matematica finanziaria da me tenuti a partire dal 1997 nelle (allora facolta` e ora) scuole di Economia delle Universita` di Bologna e Ferrara. Il punto di vista da cui è stato scritto il manuale è quello di un matematico, che fissato un sistema di assiomi, introdotti per rispondere a ragionevoli presupposti economico finanziari, trae logicamente le loro conseguenze. Questo probabilmente differenzia il manuale da analoghe opere scritte da colleghi con formazione economica, a differenza della mia che è in matematica pura, dove, a mio avviso, talora il rigore matematico non è sentito come prioritario. Ho deciso di proporre le dimostrazioni delle formule finanziarie: non me la sono sentita di abolirle, in quanto ritengo che un laureato debba accostarsi alla materia in modo attivo e non meramente esecutivo, possibilmente avendo contezza di quanto andrà quotidianamente ad applicare. Comunque la materia è trattata con taglio applicativo, avendo presenti le future necessità professionali degli studenti. Ad ogni argomento sono associati esercizi svolti. Inoltre sono proposti altri esercizi, di cui mi limito a fornire la soluzione, lasciando spazio allo studente di verificare autonomamente il suo stadio di apprendimento della materia. Il sapore della trattazione è più aziendale che finanziario, questo in ragione delle differenze di formazione matematica fra i curricula aziendali e finanziari e per il fatto che il mio corso si colloca in una laurea di area aziendale. In ogni caso il lettore/studente deve rassegnarsi al fatto che questo testo è scritto a supporto di un insegnamento di carattere matematico, anche se rivolto alle applicazioni aziendali. Nei capitoli dedicati al calcolo finanziario spesso scriveremo uguaglianze arrotondate quali $1567,84781\dots = \square 1567,85$. I numeri sono indicati all'italiana, le migliaia sono separate da uno spazio e, la virgola indica l'inizio della parte decimale.

Problemi risolti di Matematica Finanziaria Luca Barzanti,Alessandro Pezzi,2022-01-01 Il presente Volume è concepito come completamento ed estensione del Testo "Matematica Finanziaria" dei medesimi Autori e ne condivide l'impostazione di tipo problem solving. Lo sviluppo di numerosi Casi di Studio è realizzato ponendo particolare attenzione alla modellazione del

problema, effettuata anche per via grafica. Dal lato risolutivo, i metodi sono spiegati nel dettaglio e con cura, in particolare quando si tratta di tecniche non elementari, come ad esempio i metodi numerici che intervengono nella determinazione del Tasso Implicito. Viene inoltre ribadita l'analisi delle tecniche che coinvolgono l'utilizzo del foglio elettronico, al fine di realizzare soluzioni automatiche di ampie classi di problemi. Attraverso le apposite Sezioni denominate "Caccia all'errore" si esaminano inoltre gli errori più comuni riscontrati nelle risoluzioni e se ne esplicita l'origine, al fine di renderne più agevole l'eliminazione. Senza l'esigenza di completezza sui fondamenti teorici, si sviluppano infine Approfondimenti e Analisi empiriche su aspetti specifici ricorrenti al fine di individuarne la natura pur senza l'utilizzo di tecniche matematiche non elementari.

Questa esauriente raccolta di esercizi consente agli studenti dei corsi base di Matematica finanziaria di prepararsi adeguatamente per affrontare la parte pratica dell'esame. Gli esercizi vengono presentati con i testi e i procedimenti di svolgimento dettagliati e completi, oppure con i soli testi, ma comunque con le soluzioni finali espresse in numeri. Per ciascun argomento vengono richiamati sinteticamente i relativi presupposti teorici, così da facilitare la comprensione dei testi dei problemi. Per una più approfondita conoscenza e padronanza della materia si consiglia altresì di affiancare all'impiego di questo volume lo studio accurato di un buon manuale di teoria.
