The Qur'an & Modern Science: Compatible or Incompatible? Zakir Naik, 2007 Ever since the dawn of human life on this planet, Man has always sought to understand Nature, his own place in the scheme of Creation and the purpose of Life itself. In this quest for Truth, spanning many centuries and diverse civilizations, organized religion has shaped human life and determined to a large extent, the course of history. While some religions have been based on books, claimed by their adherents to be divinely inspired, others have relied solely on human experience. Al-Qur'aan, the main source of the Islamic faith, is a book believed by Muslims, to be of completely Divine origin. Muslims also believe that it contains guidance for all mankind. Since the message of the Qur'aan is believed to be for all times, it should be relevant to every age. Does the Qur'aan pass this test? In this booklet, I intend to give an objective analysis...

The Qur'an & Modern Science Maurice Bucaille, 1980 There is no human work in existence that contains statements as far beyond the level of knowledge of its time as the Qur'an. Scientific opinions comparable to those in the Qur'an are the result of modern knowledge. In the commentaries to translations of the Qur'an that have appeared in European languages, I have only been able to find scattered and vague references to them. Nor do commentators writing in Arabic provide a complete study of the aspects of the Qur'an that deal with scientific matters. This is why the idea of a comprehensive study of the problem appealed to me.

The Qur'an and Modern Science Zakir Abdul Karim Naik, 2021-02-08 Ever since the dawn of human life on this planet, Man has always tried to understand Nature, his own place in the scheme of Creation and the purpose of Life itself. In this quest for Truth, spanning many centuries and diverse civilizations, organized religion has shaped human life and, to a large extent, has determined the course of history. While some religions have been based on written text, claimed by their followers to be divinely inspired, others have relied solely on human experience. Al-Qur'an, the main source of the Islamic faith, is a book believed by its followers, the Muslims, to be completely of Divine origin. Muslims also believe that it contains guidance for all humankind. Since the message of the Qur'an is believed to be for all times, it should be relevant to every age. But does the Qur'an pass this test? In this booklet, I intend to give an objective analysis of the Muslim belief regarding the Divine origin of the Qur'an, particularly in the light of established scientific discoveries. There was a time, in the history of

world civilization, when 'miracles', or what were perceived to be miracles, took precedence over human reason and logic. Of course, the normal definition of 'miracle' is simply, anything that takes place out of the normal course of life and for which humankind has no explanation. However, we must be careful before accepting something as a miracle. In 1993, 'The Times of India', Mumbai, reported that 'a saint' by the name 'Baba Pilot' claimed to have stayed continuously submerged under water in a tank for three consecutive days and nights. However, when reporters wanted to examine the bottom of the tank of water in which he claimed to have performed his 'miraculous feat', he refused to let them do so. He argued by asking as to how one could examine the womb of a mother that gives birth to a child. Obviously the 'saint' had something to conceal! His claim was a gimmick simply to gain publicity. Surely, no modern person with even the slightest inkling towards rational thinking would accept such a 'miracle'. If such false miracles are the tests of divinity, then we would have to accept all world famous magicians known for their ingenious magical tricks and illusions, as genuine God-men! A book, claiming to be of Divine origin, is in effect, claiming to be a miracle. Such a claim should be easily verifiable in any age, according to the standards of that age. Muslims believe, that the Qur'an is the last and final revelation of God, the miracle of miracles, revealed as a mercy to mankind. Let us therefore investigate the veracity of this belief.

The Qur'an and Modern Science Zakir Naik, 2001

The Quran and Modern Science Dr Anisur Rahman, 2024-12-28 Are you a sincere and honest truth seeker? God and religion-related issues are always very complicated because God or any particular religion cannot directly be proved by any laboratory experiment. However, that does not mean that God (Allah in Arabic) or religion issue is silly. It only proves that God is very mysterious and science or anybody cannot fully comprehend God. Science has enormous limitations in this regard. Can human beings comprehend the vastness and complexities of the Universe, let alone God Who created it? So even if you have won a Nobel Prize in science, you must be very humble! You are just a simple and mortal human being. The topic of God is so complex and mysterious that one can find many top-ranking scientists around the globe are atheist. Of course many top-ranking scientists believe in God too. Being an internationally reputed scientist of applied physics, the author honestly examines scientific aspects of the Quran, Islam's topmost holy book, and finds that many verses of the Quran indeed contain modern scientific facts and profound mysteries. Around 1400 years before nobody knew those scientific laws. Therefore, the Quran confirms not only the existence of God but also authenticates the fact that Muhammad was indeed a messenger of God. In the final section, the author also briefly addresses a crucial issue: if God is true, if Islam is true, if Prophet Muhammad is true how we could solve extremism, radicalism and blind belief in Islam. No doubt blind belief is very dangerous. The author never advocates any kind of blind belief, hence this book is for all honest and rational readers. God is the most kind and most merciful and He loves humanity very much, so He definitely does not want to see human suffering,

bloodshed and carnage in the name of God. If we know God exists (there are enough scientific proofs and evidences in the book) then we should promote what God wants us to do: love, tolerance, mercy, kindness, forgiveness, truthfulness, honesty and charity. Thank you and may God bless you.

The Quran & Modern Science Mohamed Tawfik, 2008 This work will define the template for writing on the topic of religion and science. With succinct comments and relevant pictures, this book will show you where exactly in the Quran the science is. There is no discussion of religion or expanding on science that does not manifest in the sacred text. The discussions involved here are very specific and the analyses purely scientific.

Islam's Encounter with Modern Science Taner Edis, 2023-12-07 Within Muslim populations, debates about the compatibility between science and religion tend to be framed by the long-standing competition between modernizing

reformers, particularly westernizers, and theological conservatives. Much like their liberal Christian counterparts, reformers propose to embrace technical knowledge and reinterpret traditional beliefs undermined by modern science. Conservatives are more open to challenging the content of science, especially when science appears to support materialist views. Islamists promote an alternative, non-western style of modernity, nurturing a more pious professional class that contrasts with westernized elites. By scientific standards, westernizers appear to have the upper hand, especially as conservative apologetics is drawn toward distortions of science such as creationism, or fruitless attempts to Islamize science. But conservatives can also point to some success in defusing tensions between scientific and religious institutions without adopting the full secularization of science seen in post-Christian countries.

The Quran Speaks Bahis Sedq, 2018-02-14 Even those who dispute the Quran do not question that it is in its original form. This enables one to travel back in time to take a closer look at the Prophet Muhammad, who is amongst the most towering personalities in history. This book avails that priceless chance to reconstruct his life based on evidence as well preserved as the Quran. It also explores the Quran's message on issues ranging from justice and women to the treatment of other religions, to see if the disconnect between certain Islamic practices and the modern world is based on misreading of the Quran. Among other topics, the book assesses the claims that the Quran is a scientific miracle, contains no inconsistencies, and is a masterpiece of literature, and also discusses the controversial incident of the "Satanic" verses in light of disclosures in the Quran. The effort is to gain a holistic understanding of possibly the most influential book of all time. The author has chosen to write under a penname, Seeker of the Truth, but remains optimistic of disclosing his identity in the future. He does not doubt that a vast majority of Muslims would allow him to express the views noted in this book, which are founded on the Quran. "Sedq uses many different translations of the Quran to present the material as clearly and sensibly as possible. ... Bottom line: This is an intriguing, engaging look at a religion still misunderstood by many in the West. ... It is bound to provoke heated debate." -Blueink Review "A searching look at the teachings of the Quran. ... Sedq takes up several common assertions about the Quran and subjects them to a scholarly, thorough, and often refreshingly cant-free contemporary analysis that takes modern social norms and literary scholarship into account. ... Sedq offers an interpretative look at the Quran that curious minds of all faiths will find fascinating." -Kirkus Reviews What's the most interesting or important book to come out recently about the Islamic world? "The Quran Speaks by Bahis Sedq: a hugely important book by a scholar of Islam who is, to my mind, the most sophisticated of all the dissidents in the Muslim world. He could be the Muslim Luther, if there were only a way to keep him safe." -Ayaan Hirsi Ali in The New York Times

Islam and Modern Science Abdullah Amir, 2024-10-25 Islam and Modern Science is a scholarly commentary of the scientific verses of the Holy Quran. Growing up, as a student of Quranic studies, I felt a barrier between science on the one hand and esoteric meanings enriched in the Quran. I realized that though the information common Muslims need is available; it is quite scattered among scholarly sources. The purpose of this book is to see it altogether for anyone to study. All the information in this book is a calligraphy of the ancient and modern scholars. I have built it with utmost accuracy; the information is both reliable from a scholarly perspective, and is the peak of a golden age that exists right now in this very era. The approach in this book is to follow the traditional or classical scholars in their general interpretation of the Quran. Where there is a scientific interpretation, I have quoted relevant modern scholars who explained the ayat (verses) that specific way, who but nonetheless follow the the general traditional and classical approach. Dedication: I dedicate the work on this site to Allah, who is Al Rahman (the Compassionate), His Messenger (peace be upon him), the Believers, and my

family.

Islam's Quantum Question Nidhal Guessoum, 2010-10-30 In secular Europe the veracity of modern science is almost always taken for granted. Whether they think of the evolutionary proofs of Darwin or of spectacular investigation into the boundaries of physics conducted by CERN's Large Hadron Collider, most people assume that scientific enquiry goes to the heart of fundamental truths about the universe. Yet elsewhere, science is under siege. In the USA, Christian fundamentalists contest whether evolution should be taught in schools at all. And in Muslim countries like Tunisia, Egypt, Pakistan and Malaysia, a mere 15 per cent of those recently surveyed believed Darwin's theory to be 'true' or 'probably true'. This thoughtful and passionately argued book contends absolutely to the contrary: not only that evolutionary theory does not contradict core Muslim beliefs, but that many scholars, from Islam's golden age to the present, adopted a worldview that accepted evolution as a given. Guessoum suggests that the Islamic world, just like the Christian, needs to take scientific questions - 'quantum questions' - with the utmost seriousness if it is to recover its true heritage and integrity. In its application of a specifically Muslim perspective to important topics like cosmology, divine action and evolution, the book makes a vital contribution to debate in the disputed field of 'science and religion'.

How on Earth Is Modern Science Mentioned in the Quran? Rahima Islam, 2015-12-17 A non-fiction book, summarising some very interesting and fascinating scientific discoveries which have been mentioned in the Quran. The Quran was revealed more than 1400 years ago and contains information that modern scientists have discovered only recently. The book covers a variety of scientific topics and is supported by Quranic verses. An educational and religious book for all ages.

Quran and Modern Science MD Anisur Rahman, 2015-09-14 Are you a truth seeker? Are you looking for the true religion that is assigned by God almighty for mankind? To follow a religion blindly doesn't make any sense. You need to distinguish what is truth from what is falsehood, what is good from what only looks good by using science, reasons, logic and rationality. You should not be confused by some atheist scientists like Stephen Hawking et. al. Definitely there is an almighty God of the Universe. God (Allah in Arabic) did not create us aimlessly. We have indeed a profound relationship with God. Professionally Dr. Anisur Rahman is a prominent scientist in applied physics but he is a specialist in religion and modern science too. The existence of so many amazing scientific miracles in the Quran unambiguously proves that the holy Quran could not be produced by any human being 1400+ years ago. By using the holy Quran and modern science, Dr. Anis proves beyond any doubt that the holy Quran is a Book came from the Lord of the Universe, God.
