Age of Chivalry D.L. Narrol, 2024-09-06 Book 3 of Colin Limmerick's adventures The third steam punk adventure takes the four time travelers to the unexpected once again. It's 1910, Captain Limmerick, Dr. Dimitrikov, Rosa, and Amoli mistakably time travel to 1487 England just after The War of the Roses. The queen is enchanted with Limmerick and has him knighted, where he must undergo challenging jousting tournaments, and prove his abilities as a skilled archer. He becomes entangled with the king's rivals and finds himself in near death situations. He uses his position, as part of the king's court, to rescue his friends from the castle dungeon, but struggles with the crown's idea of chivalry. During this voyage, they discover prehistoric mammals have been misplaced from when they tried to close the passage through time in Celtic Odyssey. The four time-travelers attempt to return to 1910, but another error occurs and for the first time, they travel to their future - 1970.

Mathematical and Algorithmic Puzzles Pramod Ganapathi, 2024-05-29 This book presents serious mathematical and algorithmic puzzles that are mostly counterintuitive. The presented puzzles are simultaneously entertaining, challenging, intriguing, and haunting. This book introduces its readers to counterintuitive mathematical ideas and revolutionary algorithmic insights from a wide variety of topics. The presented solutions that are discovered by many mathematicians and computer scientists are highly counterintuitive and show supreme mathematical beauty. These counterintuitive solutions are intriguing to the degree that they shatter our preconceived notions, shake our long-held belief systems, debunk our fundamental intuitions, and finally rob us of sleep and haunt us for a lifetime. Multiple ways of attacking the same puzzle are presented which teach the application of elegant problem-solving strategies.

Legend of the Last Star Knight: The Crown of Kings Jonathan Sears, 2024-04-20 THROUGH TIME AND THROUGH SPACE, HE WILL DISCOVER THAT TO RETURN HOME, HE MUST SAVE THE GALAXY. Alex Stone is an ordinary boy trying to figure out where he belongs. He has the same worries as any other teenage boy; friends, school and girls. But the discovery of a mysterious watch unlocks a secret past he never knew existed that sends him hurtling through time and space. Lost in the future on an alien world across the galaxy, Alex must fight for survival and embarks on a journey that will either take him home or on an amazing quest to find a lost treasure that unlocks the ultimate wisdom in the galaxy: The Crown of Kings.

Underwater Acoustic Data Processing Y. T. Chan,2012-12-06 This book contains the papers that were accepted for presentation at the 1988 NATO Advanced Study Institute on Underwater Acoustic Data Processing, held at the Royal Military College of Canada from 18 to 29 July, 1988. Approximately 110 participants from various NATO countries were in attendance during this two week period. Their research interests range from underwater acoustics to signal processing and computer science; some are renowned scientists and some are recent Ph.D. graduates. The purpose of the ASI was to provide an authoritative summing up of the various research activities related to sonar technology. The exposition on each subject began with one or two tutorials prepared by invited lecturers, followed by research papers which provided indications of the state of development in that specific area. I have broadly classified the papers into three sections under the titles of I. Propagation and Noise, II. Signal Processing and III. Post Processing. The reader will find in Section I papers on low frequency acoustic sources and effects of the medium on underwater acoustic propagation. Problems such as coherence loss due to boundary interaction, wavefront distortion and multipath transmission were addressed. Besides the medium, corrupting noise sources also have a strong influence on the performance of a sonar system and several researchers described methods of modeling these sources.

Travels Emma Woody,2022-09-23 In the town of Chimique, California, two teenagers have their world flipped upside down. After a challenging year, Belle Dupont and Beau Chastain face an even more challenging future than the past they just left behind. When a new tax collector, Leon Bawl, comes to town along with the advent of time travel, they send Beau and Belle down the path where they face their greatest adversaries and find their true selves.

My History Teacher is a Leprechaun Duane L. Ostler,2015-02-27 Book 3 of 'The Stewards of Light' series, and sequel to 'My Math Teacher is a Vampire.' Blake Drywater has a new history teacher--a leprechaun who escorts Blake to the underground time tunnels of his people. These tunnels are full of doors that open to different places and times, including the future. But then Blake discovers the real reason for his visit, and how it just might destroy the world!

Dynamic Urban Transportation Network Models Bin Ran,David Boyce,2012-12-06 Intelligent Vehicle-Highway Systems are providing a welcome stimulus to research on dynamic urban transportation network models. This book presents a new generation of models for solving dynamic travel choice problems including traveler's destination choice, mode choice, departure/arrival time choice and route choice. These models are expected to function as off-line travel forecasting and evaluation tools, and eventually as on-line prediction and control models in advanced traveler information and traffic management systems. In addition to a rich set of new formulations and solution algorithms, the book provides a summary of the necessary mathematical background and concludes with a discussion of the requirements for model implementation.

The Readers' Advisory Guide to Street Literature Vanessa Irvin Morris,2012 Emphasizing an appreciation for street lit as a way to promote reading and library use, Morris's book helps library staff establish their "street cred" by giving them

the information they need to provide knowledgeable guidance.

In-A-Gadda-Da-Vida Stark Hunter, 2002-02-06 17 minutes... so much can happen to a person in 17 minutes... one's life can dramatically change during those one thousand and twenty seconds of inexorable time... In-A-Gadda-Da-Vida by the Iron Butterfly was blasting away on Teresas little brown stereo when it happened... a swelteringly hot July afternoon in 1969, and for 17 year old Stark Hunter, life would never be the same... 17 minutes... and the entire decade of the 1960s is painstakingly revisited and remembered. Do you remember when it happened to you for the very first time? Fasten your seat belts... its going to be a very strange ride...

Modeling Dynamic Transportation Networks Bin Ran, David Boyce, 2012-12-06 This book seeks to summarize our recent progress in dynamic transportation network modeling. It concentrates on ideal dynamic network models based on actual travel times and their corresponding solution algorithms. In contrast, our first book *Dynamic Urban Transportation Network Models - Theory and Implications for Intelligent Vehicle-Highway Systems* (Springer-Verlag, 1994) focused on instantaneous dynamic network models. Comparing the two books, the major differences can be summarized as follows: 1. This book uses the variational inequality problem as the basic formulation approach and considers the optimal control problem as a subproblem for solution purposes. The former book used optimal control theory as the basic formulation approach, which caused critical problems in some circumstances. 2. This book focuses on ideal dynamic network models based on actual travel times. The former book focused on instantaneous dynamic network models based on currently prevailing travel times. 3. This book formulates a stochastic dynamic route choice model which can utilize any possible route choice distribution function instead of only the logit function. 4. This book reformulates the bilevel problem of combined departure time/ route choice as a one-level variational inequality. 5. Finally, a set of problems is provided for classroom use. In addition, this book offers comprehensive insights into the complexity and challenge of applying these dynamic network models to Intelligent Transportation Systems (ITS). Nevertheless, the models in this text are not yet fully evaluated and are subject to revision based on future research.

Drunken Space Pirates! Phoenix Freebird A., 2009-06-30 Running from a mutinous crew, sucked through a wormhole like in a bad sci-fi movie and slowly running out of booze . . . and that's just the beginning of this non-traditional story that starts off as a simple captain's log book and evolves into something more like a really warped and twisted TV show in text. Follow the Captain and crew on a series of seemingly random adventures, where it's obvious it's not just the Captain who's been drinking. At some point you may ask yourself, is all this just coincidence or is there something dark and annoying on the horizon? The Captain seems to have a drinking problem, the problem being he never has enough to drink and people from his past keep showing up and ruining his buzz / Akki a corrupted artificial intelligence who occasionally takes over the Captain's log has his own plans, mostly self-serving ones because he has nothing better to do. The rest of the crew, pirates, hot chicks,

robots and a foul beaked little space penguin round out the Drunken Space Pirates and with all the wise cracks and shots aimed at everyone and everything its clear the alcohol flows rather freely within the D.S.P. Many of the off the wall characters of the D.S.P. are walking guilty pleasures who say what they feel, do what they want and just generally give it to life, pop culture and the universe in general with both barrels . . . and occasionally fish...

The American Novel of War Wallis R. Sanborn, III, 2012-10-30 In song, verse, narrative, and dramatic form, war literature has existed for nearly all of recorded history. Accounts of war continue to occupy American bestseller lists and the stacks of American libraries. This innovative work establishes the American novel of war as its own sub-genre within American war literature, creating standards by which such works can be classified and critically and popularly analyzed. Each chapter identifies a defining characteristic, analyzes existing criticism, and explores the characteristic in American war novels of record. Topics include violence, war rhetoric, the death of noncombatants, and terrain as an enemy.

Planes of Existence Kyle Lance Proudfoot, 2013-09-09 ? Planes Of Existence is a Science Fiction/Fantasy Novel with a good dosage of Humor and Horror which I, Kyle Lance Proudfoot, have written. It combines the best elements of both science fiction and fantasy and is hyper modern and futuristic taking place on far distant planets in the Universe. Leading from The Black Dungeon Doorway which is published by AuthorHouse UK it expands upon Character Classes introduced in The Free Show giving life to their profiles. There is great adventure, plenty of magic and technological devices and absolutely phenomenal battles. There is also a strong portrayal of the theme of Light and Shadow. I maintain my highly descriptive and exciting style of writing. ? Planes Of Existence is Part 2, the sequel of The Black Dungeon Doorway. This will give me time to promote and try to make a bestseller of The Black Dungeon Doorway which is already published by AuthorHouse UK. There is also a Free Draft Promo of it. ? My plan is to write a trilogy; the third title is The Door Of Light or Door Of Light and is a progression towards the Light and Good which is standard in all stories and most Hollywood plot lines.

A Systems-Centered Approach to Inpatient Group Psychotherapy Yvonne M Agazarian, 2001-02-15 This book is built around the transcript of an inpatient therapy session, giving the reader the opportunity to follow verbatim how systems-centered therapy actually works. The Other chapters give an overview of the systems-centered ideas, their formulation as a theory, and the systems-centered methods that put the theory into practice.

Past Aways #5 Matt Kindt, 2015-04-29 **PAST AWAY DOWN!** Phil and his new student experiment with a novel form of time travel, Art begins a dangerous relationship with a 2015 native, and the impossible occurs when one of the immortal Past Aways passes away! The next opus from **Matt Kindt** (_MIND MGMT_)! Every time-traveling issue contains bonus 2015 travelogues! History comes alive in an unexpected manner in _Past Aways_. _◆ The Hollywood Reporter

Urban Utopias Tereza Kuldova, Mathew A. Varghese, 2017-03-09 This book brings anthropologists and critical theorists together in order to investigate utopian visions of the future in the neoliberal cities of India and Sri Lanka. Arguing for the

priority of materiality in any analysis of contemporary ideology, the authors explore urban construction projects, special economic zones, fashion ramps, films, archaeological excavations, and various queer spaces. In the process, they reveal how diverse co-existing utopian visions are entangled with local politics and global capital, and show how these utopian visions are at once driven by visions of excess and by increasing expulsions. It's a dystopia already in the making – one marred by land grabs and forced evictions, rising inequality, and the loss of urbanity and civility.

Superhero Thought Experiments Chris Gavalier, Nathaniel Goldberg, 2019-09-15 Examining the deep philosophical topics addressed in superhero comics, authors Gavalier and Goldberg read plot lines for the complex thought experiments they contain and analyze their implications as if the comic authors were philosophers. Reading superhero comic books through a philosophical lens reveals how they experiment with complex issues of morality, metaphysics, meaning, and medium. Given comics' ubiquity and influence directly on (especially young) readers—and indirectly on consumers of superhero movies and video games—understanding these deeper meanings is in many ways essential to understanding contemporary popular culture. The result is an entertaining and enlightening look at superhero dilemmas.

Geography, Institutions and Regional Economic Performance Riccardo Crescenzi, Marco Percoco, 2012-12-13 The book aims to present “traditional features” of regional science (as geographical concepts and institutions), as well as relatively new topics such as innovation and agglomeration economies. In particular it demonstrates that, contrary to what has been argued by recent economics literature, both geography and institutions (or culture) are relevant for local development. In fact, these phenomena, along with the movement of goods and workers, are among the main reasons for persisting development differentials. These intriguing relationships are at the heart of the analysis presented in this book and form the conceptual basis for a promising institutional approach to economic geography.

The Continuing Adventures Of A Time Traveling Hippie Surfer Brian S. Jarvis, 2019-01-09 Brian, The Time Traveling Hippie Surfer has been living in the year 1974, until he stumbles across the Dome of Time and Carl the First the Keeper of Time. It is one thing to hear about wild fires burning down California, to be told about the Great Northern Garbage patch floating in the Pacific Ocean and the Dead Zone in the Gulf of Mexico. Time Traveling up to the year 2017, being yanked 43 years into the future and set down within a few feet of these apocalyptic Items as they are happening is exactly what Brian is exposed to. Don't get me wrong, Brian, Sandra, and Carl still bee bop around in Time just for fun. They eat Nathans Hot Dogs in space, and wave at the people in the International Space station for grins. They surf at Top Sail beach North Carolina in the year 1414, and have lunch with the Cape Fear Indians. They buzz back to Hawaii in the year 808 to surf at Queens. Brian and Carl zap up to Mars and leave a Dr. Pepper bottle where the Mar Rover will find it on Halloween day.

Phenomenal Stories Quarterly, Vol. 2, No. 2, Summer 2019 Shawn M. Tomlinson, 2019-06-12 We press on with the third volume of Phenomenal Stories Quarterly, a collection of the April, May and June issues of Phenomenal Stories for 2019.

Joining the Phenomenal Stories fray are new and veteran writers working in new - for us - areas such as nostalgia and murder mysteries. Phenomenal Stories Quarterly is a companion magazine to Phenomenal Stories in the tradition of the science fiction/fantasy/horror pulps of the 1920s, 1930s and 1940s. It's also a somewhat cheaper means to get all the issues together. This issue contains stories by Martin G. Collins, Richard H. Nilsen, Mary Brookman, Haldor R. Hallum, J.D. Hayes-Canell, Bridget Flynn-O'Leary, Delia McTavish and classic reprints by Henry Kuttner, H.P. Lovecraft and Clark Ashton Smith. Phenomenal Stories Quarterly is a modern-day tribute to the science fiction/horror/fantasy/speculative pulp magazines of the 1920s, 1930s and 1940s.
