Aviation and Tourism Anne Graham, Andreas Papatheodorou, Peter Forsyth, 2016-04-08 Transport is an essential element of tourism, providing the vital link between the tourist generating areas and destinations. Good accessibility, which is determined by the transport services provided, is a fundamental condition for the development of any tourist destination. Moreover the transport industry can be a major beneficiary of tourism because of the additional passenger demand that may be generated. Aviation is an increasingly important mode of transport for tourism markets. Whilst geography has meant that, in modern times, air travel has always been the dominant mode for long distance travel and much international tourism, moves towards deregulation, and in particular the emergence of the low cost carrier sector, have also increased aviation's significance for short and medium haul tourism trips. Thus developments in aviation can have very major implications for many leisure and business tourism markets. However the characteristics and needs of leisure travellers are generally so very different from business travellers that this necessitates a separate consideration of these markets if a detailed understanding of the relationship with aviation is to be gained. In spite of the obvious closeness between the aviation and tourism industries, there are very few specialist texts on this subject. Most tourism focused books consider aviation as just one component of the tourism industry which needs to be discussed, whereas aviation specialist texts rarely concentrate on just leisure travel. In addition there is very little literature that gives a detailed appreciation of the complexities and potential conflicts associated with the development of coherent and effective aviation and tourism policies. Therefore it is the aim of this book to fill this important gap which exists with a comprehensive, in-depth study of the relationship between aviation and leisure travel. The book deals exclusively with issues related to the relationship between aviation and leisure travel. It does this with an analysis of the theoretical concepts relevant to the subject area combined with a detailed investigation of current practice within the aviation and tourism industries. Each chapter is illustrated with case study material that will reinforce the understanding of the issues that are being examined.

The Low Cost Carrier Worldwide Sven Gross, Michael Lück, 2016-02-17 Low Cost Carriers (LCCs) have become an integral part of today's air transport and tourism industries. Originating in the United States, the low-cost concept has subsequently been adopted by airlines on all continents. LCCs in Europe and North America, and to some extent in Asia, have already been well covered by academic literature. However, scientific publications on the topic of LCCs in Africa, Latin

America, the Middle East, Australia and New Zealand are scarce. This volume provides the first comprehensive overview of developments, the legal framework and the current situation of the low-cost carrier phenomenon across the globe. It contains a dozen chapters, each dedicated to a region, all written by highly experienced and renowned experts from around the world. The Low Cost Carrier Worldwide is written primarily for upper-level undergraduate and postgraduate students, as well as researchers and practitioners within the fields of aviation, transport and tourism.

Pest Risk Modelling and Mapping for Invasive Alien Species Robert C Venette, 2015-03-26 Over the past century, the number of species that have been transported to areas outside their native range has increased steadily. New pests and pathogens place biological pressure on valuable resident species, but strict bans may conflict with trading and travel needs. An overview of how the conflict can be managed using pest risk mapping and modelling, this book uses worked examples to explain modelling and help development of tool kits for assessment.

International Student Security Simon Marginson,Chris Nyland,Erlenawati Sawir,Helen Forbes-Mewett,2010-07-29 More than three million students globally are on the move each year, crossing borders for their tertiary education. Many travel from Asia and Africa to English speaking countries, led by the United States, including the UK, Australia and New Zealand where students pay tuition fees at commercial rates and prop up an education export sector that has become lucrative for the provider nations. But the 'no frills' commercial form of tertiary education, designed to minimise costs and maximise revenues, leaves many international students inadequately protected and less than satisfied. International Student Security draws on a close study of international students in Australia, and exposes opportunity, difficulty, danger and courage on a massive scale in the global student market. It works through many unresolved issues confronting students and their families, including personal safety, language proficiency, finances, sub-standard housing, loneliness and racism.

Understanding Youth in the Global Economic Crisis Alan France, 2016-03-24 In this innovative book, Alan France looks not at the economic impact of the global economic crisis and great recession of the past decade, but at the effect these forces have had on our very understanding of youth through its associated institutions. Using eight countries as case studies, he undertakes an in-depth sociological analysis of historical and contemporary developments in secondary education, training, work, and welfare policy to show how the ecological landscape of youth has been affected. Mapping the growing influence of neoliberalism as a political strategy in each of the countries, he shows how, after the crisis, the reconfiguration of institutions and practices that are central to the lives of the young is accelerating, bringing new meaning to youth, age, transition, diversity, risk, and inclusion.
