

City Under One Roof

Daniel M. Bluestone

City Under One Roof Iris Yamashita, 2024-01-16 A stranded detective tries to solve a murder in a tiny Alaskan town where everyone lives in a single high-rise building, in this gripping debut by an Academy Award-nominated screenwriter. When a local teenager discovers a severed hand and foot washed up on the shore of the small town of Point Mettler, Alaska, Cara Kennedy is on the case. A detective from Anchorage, she has her own motives for investigating the possible murder in this isolated place, which can be accessed only by a tunnel. After a blizzard causes the tunnel to close indefinitely, Cara is stuck among the odd and suspicious residents of the town—all 205 of whom live in the same high-rise building and are as icy as the weather. Cara teams up with Point Mettler police officer Joe Barkowski, but before long the investigation is upended by fearsome gang members from a nearby native village. Haunted by her past, Cara soon discovers that everyone in this town has something to hide. Will she be able to unravel their secrets before she unravels?

Making the Arctic City Peter Hemmersam, 2021-06-17 Making the Arctic City explores the unwritten history of city-building in the Arctic over the last 100 years. Spanning northern regions of North America, through Greenland, Svalbard to Russia, this is the first book to provide a truly circumpolar account of historical and contemporary architecture and urbanism in the Arctic – and it shows how the Arctic city offers valuable lessons for the post-colonial study of architectural and urban planning history elsewhere. Examining architects' and planners' designs for Arctic urban futures, it considers the impact of 20th-century models of urban design and planning in Arctic cities, and reveals how contemporary architectural approaches continue to this day to essentialize 'extreme' climate conditions and disregard the agency of Arctic city-dwellers – a critical perspective that is vital to the formulation of future design and planning practices in the region.

Sustainability John B. Cobb, 2007-01-23 Can a livable society also be sustainable? How can we move beyond anthropocentrism without surrendering humanity's unique contribution to the globe? What of the contradictions conservative economics seems to reveal in so-called liberal approaches to economics and ecology? Does Christianity have anything to say about living in a world of limits? In 'Sustainability', John Cobb argues that reflections on ecological issues inevitably raise religious questions as well. Admittedly, traditional Christian teaching to subdue the earth had contributed to the mindset responsible for the crisis we are facing today. But Christianity can contribute to the discussion of how to keep the planet from ecological disaster. For one thing, Christianity can keep ecological issues closely tied to those of social justice -- a necessity for a sustainable society. Christianity can also make clear the need for individual change of heart (conversion) that is a prerequisite to real social and economic change. As the Earth Summit testified, our world stands in need of new visions, to nurture new ways of integrating its human, mineral, animal, vegetable, and energy components. 'Sustainability' is John Cobb at his best . . . timely, incisive, and vigorous.

Capital Kenneth Goldsmith, 2016-03-08 Acclaimed artist Kenneth Goldsmith's thousand-page homage to New York City Here is a kaleidoscopic assemblage and poetic history of New York: an unparalleled and original homage to the city, composed entirely of quotations. Drawn from a huge array of sources—histories, memoirs, newspaper articles, novels, government documents, emails—and organized into interpretive categories that reveal the philosophical architecture of the city, Capital is the ne plus ultra of books on the ultimate megalopolis. It is also a book of experimental literature that transposes Walter Benjamin's unfinished magnum opus of literary montage on the modern city, The Arcades Project, from nineteenth-century Paris to twentieth-century New York, bringing the streets and its inhabitants to life in categories such as "Sex," "Central Park," "Commodity," "Loneliness," "Gentrification," "Advertising," and "Mapplethorpe." Capital is a book designed to fascinate and to fail—for can a megalopolis truly ever be captured in words? Can a history, no matter how extensive, ever be comprehensive? Each reading of this book, and of New York, is a unique and impossible project.

Victorian Visions of Suburban Utopia Nathaniel Robert Walker, 2020-11-17 The rise of suburbs and disinvestment from

cities have been defining features of life in many countries over the course of the twentieth century. In *Victorian Visions of Suburban Utopia*, Nathaniel Walker asks: why did we abandon our dense, complex urban places and seek to find the best of the city and the country in the flowery suburbs? While looking back at the architecture and urban design of the 1800s offers some answers, Walker argues that a great missing piece of the story can be found in Victorian utopian literature. The replacement of cities with high-tech suburbs was repeatedly imagined and breathlessly described in the socialist dreams and science-fiction fantasies of dozens of British and American authors. Some of these visionaries — such as Robert Owen, Edward Bulwer-Lytton, Edward Bellamy, William Morris, Ebenezer Howard, and H. G. Wells — are enduringly famous, while others were street vendors or amateur chemists who have been all but forgotten. Together, they fashioned strange and beautiful imaginary worlds built of synthetic gemstones, lacy metal colonnades, and unbreakable glass, staffed by robotic servants and teeming with flying carriages. As varied as their futuristic visions could be, Walker reveals how most of them were unified by a single, desperate plea: for humanity to have a future worth living, we must abandon our smoky, poor, chaotic Babylonian cities for a life in shimmering gardens.

City and Region Wendelin Strubelt, Grzegorz Gorzelak, 2008-02-26 This book deals with the development of cities and regions in times of decisive transformation in Europe throughout these past twenty years. In the Western parts of Europe cities and regions were challenged from the outside by globalisation and by technological and demographic change from the inside. On top of that the Eastern parts were confronted with deep restructuring processes enforced by the transition from socialist to capitalistic structures. By now, all European cities and regions are confronted with challenges stemming from a new global competition for jobs, population and status. Authors from different national backgrounds of Central Europe are analysing and reflecting on these changing structures and processes..

Divided Cities Annika Björkdahl, Lisa Strömbom, 2015-02-08 Combining peace and conflict studies with public administration research, *Divided Cities* critically investigates the roles of public administration and civil servants in resolving issues that are potentially conflictual in divided societies. Zooming in on nine cities with very different legacies and democratic development - Copenhagen, Malmö, Toronto, Belfast, Mostar, Cape Town, Mitrovica, Nicosia, and Jerusalem - the contributors analyze the tools, strategies, and understandings of conflict resolution that are available in different stages between conflict and stability. Exploring how contested issues have been addressed, by whom, and to what effect, this

collection of essays examines how public institutions and citizens have interacted to agree on the best course of action for progress in their respective cities.

Supreme City Donald L. Miller, 2015-05-19 An award-winning historian surveys the astonishing cast of characters who helped turn Manhattan into the world capital of commerce, communication and entertainment --

Calendar Year Message of ... Mayor of the City of Los Angeles, California to the Honorable City Council... Los Angeles (Calif.). Office of the Mayor, 1913

City of the Century Donald L. Miller, 2014-04-09 "A wonderfully readable account of Chicago's early history" and the inspiration behind PBS's American Experience (Michiko Kakutani, The New York Times). Depicting its turbulent beginnings to its current status as one of the world's most dynamic cities, *City of the Century* tells the story of Chicago—and the story of America, writ small. From its many natural disasters, including the Great Fire of 1871 and several cholera epidemics, to its winner-take-all politics, dynamic business empires, breathtaking architecture, its diverse cultures, and its multitude of writers, journalists, and artists, Chicago's story is violent, inspiring, passionate, and fascinating from the first page to the last. The winner of the prestigious Great Lakes Book Award, given to the year's most outstanding books highlighting the American heartland, *City of the Century* has received consistent rave reviews since its publication in 1996, and was made into a six-hour film airing on PBS's American Experience series. Written with energetic prose and exacting detail, it brings Chicago's history to vivid life. "With *City of the Century*, Miller has written what will be judged as the great Chicago history." —John Barron, Chicago Sun-Times "Brims with life, with people, surprise, and with stories." —David McCullough, Pulitzer Prize-winning author of *John Adams* and *Truman* "An invaluable companion in my journey through Old Chicago." —Erik Larson, New York Times bestselling author of *The Devil in the White City*

City by City Keith Gessen, Stephen Squibb, 2015-05-12 A collection of essays—historical and personal—about the present and future of American cities Edited by Keith Gessen and Stephen Squibb, *City by City* is a collection of essays—historical, personal, and somewhere in between—about the present and future of American cities. It sweeps from Gold Rush, Alaska, to Miami, Florida, encompassing cities large and small, growing and failing. These essays look closely at the forces—gentrification, underemployment, politics, culture, and crime—that shape urban life. They also tell the stories of citizens whose fortunes have risen or fallen with those of the cities they call home. A cross between Hunter S. Thompson, Studs Terkel, and the Great Depression-era WPA guides to each state in the Union, *City by City* carries this project of American storytelling up to the days of our own Great Recession.

Manhattan Skyscrapers Eric Nash, 1999-08 The city of New York is the city of skyscrapers. Every first-time visitor to Manhattan experiences the awe of gazing up at the soaring stone, steel, and glass towers of Wall Street or Midtown, and wonders how those structures came to be built. *Manhattan Skyscrapers* answers the question by presenting the 75 most

significant tall buildings that make up the city's famous skyline. From Louis Sullivan's Bayard-Condict Building of 1898 on Bleeker Street to the Conde Nast tower currently rising above Times Square, *Manhattan Skyscrapers* lavishly presents over a hundred years of New York's most interesting and important tall buildings. Author Eric P. Nash profiles familiar skyscrapers such as the Woolworth Building, the Empire State Building, the Chrysler Building, the World Trade Towers, the AT&T (now Sony) Building, and the Seagram Building, while also championing several often-overlooked yet significant structures, such as the McGraw-Hill, the Metropolitan Life Insurance, and the Fred F. French Buildings. Nash's writing strikes an elegant balance between history, architectural evaluation, and intelligent guidebook. For each building, Nash identifies the building style, gives the overall profile and image of the building, and discusses its construction; also included are quotes from the buildings' architects and the architectural critics of the time. Each skyscraper is illustrated with full-page color photographs by noted photographer Norman McGrath as well as architectural drawings and plans, archival images of the original interiors, postcards, and other ephemera. *Manhattan Skyscrapers* is essential reading-or an ideal gift-for anyone interested in the buildings that make New York the ultimate skyscraper city.
