Masks and Mirrors Bernard Rosen,2001-07-30 As America experiences the growing pains associated with the rapid social changes in the economy, technology, and culture, various groups must develop coping mechanisms to help them deal with the anxiety that is brought on by such changes. Generation Xers, on the cutting edge of these changes, are no exception. More so than any other group, elite Xers, those who are succeeding in the new economy, have adopted a unique personality style, chameleonism, as a defense mechanism. People with a chameleon personality pretend to be what others want them to be in an effort to obtain for themselves the kind of security Xers feel previous generations have enjoyed, but which may not be available to their own generation. Rosen further argues that this personality component, of pretending to be something one is not, becomes a permanent part of the personality when it is practiced and used frequently enough. This riveting examination of the Xer generation sheds new light on the survival mechanisms employed by those who feel threatened by social changes, even as they participate in and benefit from them. The author begins by providing a careful explanation of the chameleon personality before delving into the special problems and obstacles (both real and perceived) that torment elite Xers, and their ways of dealing with these issues. He discusses various sources of anxiety and how the chameleon personality comes into play with regard to conflict between generations, conflict between the genders, and conflict brought on by immigration and foreign competition. While Rosen's approach is primarily socio-psychological, he also provides historical background on issues of social change and other attempts at dealing with it in the past. He presents a reasoned examination of the chameleon personality as it is manifested in America's Generation X in an effort to shed light on this unique segment of our population.

The Mask Handbook Toby Wilsher,2006-11-22 This book, from Europe's leading Mask director and co-founder of the Trestle Theatre Company, provides a fascinating demystification of the process of using masks. Full of simple explanations, and collating over twenty-five years' experience of writing for, directing and acting in masks, The Mask Handbook examines how masks have the ability to play the fundamental game of theatre - the suspension of disbelief. The Handbook includes: an introduction to the origin of masks advice on preparing, making and using masks tips on writing, devising and directing

maskwork lots of fun and effective practical exercises. This accessible and inspiring handbook will empower teachers, directors and actors to fully explore the world of the mask.

Mask Makers and Their Craft Deborah Bell, 2014-01-10 Profiling 30 mask makers from around the world, this book explores the motivations and challenges of contemporary artists working to bring the traditional methods and conventions of mask making to an evolving global theatre. There are 181 photographs--including two sections of color plates--which illustrate how the mythic iconography of masks is used in the modern fields of dance, mime, theatre and storytelling. Topics include the ways in which mask artists and performers maintain a sense of universality despite varying local customs; the legacies of Italian mask makers Amleto and Donato Sartori and of the California-based Dell'Arte International School of Physical Theatre; and the ways in which traditional approaches in mask artistry continue to influence commercial mask performance ventures in film, on Broadway, and in touring companies.

Materials and Electro-mechanical and Biomedical Devices Based on Nanofibers Alexander L. Yarin,Filippo

Pierini,Eyal Zussman,Marco Lauricella,2024-05-08 The book is interwoven according to the intrinsic logics of modern most important applications of electrospun nanofibers. It discusses such application-oriented nanofibers as self-healing vascular nanotextured materials, biopolymer nanofibers, soft robots and actuators based on nanofibers, biopolymer nanofiber-based triboelectric nanogenerators, metallized nanofibers, and heaters and sensors based on them. It also includes such topics as the injectable nanofibrous biomaterials, fibrous hemostatic agents and their interaction with blood, as well as electrospun nanofibers for face-mask applications. The book also details polyelectrolytes-based complex nanofibers and their use as actuators. It also covers drug release facilitated by polyelectrolytes-based complex nanofibers. The fundamental aspects of electrospinning of polymer nanofibers discussed in the final part of the book link them to the applications described in the preceding chapters. Such topics as polymer solution preparation and their rheological properties, e.g., viscoelasticity and the related spinnability, the electrical conductivity of polymer solutions, and the cascade of the physical phenomena resulting in formation of nanofibers encompass the experimental aspects. Also, the general quasi-1D equations used for modeling of formation of electrospun polymer nanofibers, and the numerical aspects of their solution are discussed in detail, including such modeling-driven applications as nanofiber alignment by electric focusing fields.

Handbook of Photomask Manufacturing Technology Syed Rizvi,2018-10-03 As the semiconductor industry attempts to increase the number of functions that will fit into the smallest space on a chip, it becomes increasingly important for new technologies to keep apace with these demands. Photomask technology is one of the key areas to achieving this goal.

Although brief overviews of photomask technology exist in the literature, the Handbook of Photomask Manufacturing Technology is the first in-depth, comprehensive treatment of existing and emerging photomask technologies available. The Handbook of Photomask Manufacturing Technology features contributions from 40 internationally prominent authors from industry, academia, government, national labs, and consortia. These authors discuss conventional masks and their supporting technologies, as well as next-generation, non-optical technologies such as extreme ultraviolet, electron projection, ion projection, and x-ray lithography. The book begins with an overview of the history of photomask development. It then demonstrates the steps involved in designing, producing, testing, inspecting, and repairing photomasks, following the sequences observed in actual production. The text also includes sections on materials used as well as modeling and simulation. Continued refinements in the photomask-making process have ushered in the sub-wavelength era in nanolithography. This invaluable handbook synthesizes these refinements and provides the tools and possibilities necessary to reach the next generation of microfabrication technologies.

The Miracle of Consciousness Ervin K. Kery, Frank M. Wanderer, 2025-01-04 There is a mysterious human dimension, the recognition of which shatters all our ideas about who we are, where we come from and what our mission in this world is. This is the realm of Consciousness: The final scientific and spiritual mystery. This book is about the mysteries and miracles of Consciousness. About the living spirit in action which, dressed up in the machinery of your body, discovers itself and the wonders of the world.

Living Masks Umberto Mariani, 2008-11-25 The Nobel Prize-winning dramatist Luigi Pirandello (1867-1936) is undoubtedly one of the most innovative playwrights of the twentieth century and also one of the most complex. While his influence spread throughout modernist and postmodernist works, many first-time audiences and readers are confronted with the difficulty associated with such a radical aesthetic experience. In *Living Masks*, Umberto Mariani presents a clear and comprehensive introduction of Pirandello's major plays for general readers, students, and scholars new to Pirandello. Functioning as a guide to understanding the fundamental themes of Pirandello's plays, the author also examines the critical, aesthetic, and technical problems associated with these plays. He provides extensive reflection on some of the failings of early and contemporary criticism on Pirandello's works and offers many corrections of interpretative direction that will be significant and helpful to directors and performers. In particular, Mariani presents a deeper understanding and greater appreciation of Pirandello's works as a challenge to the tendency to adapt, and modify them, which drastically deprive the works of their original power and beauty. A concise and accessible introduction to a twentieth-century literary master, *Living Masks* will be of interest to dramatists, literary scholars, and students and scholars of Italian studies.
