Puentes del saber: transformando la educación y la ciencia para el futuro, 2025-06-24 El conocimiento no es un conjunto de comportamientos estancos, sino un entramado de ideas, métodos y perspectivas que se cruzan constantemente. La especialización ha permitido profundizar en campos específicos, pero también ha generado islas de conocimiento que, sin conexiones entre ellas, corren el riesgo de volverse estériles. En un mundo donde los desafíos son cada vez más complejos y globales, la interdisciplinariedad se convierte en una necesidad más que en una opción. Como decía Isaac Newton, Lo que sabemos es una gota de agua; lo que ignoramos es el océano, recordándonos que la amplitud del conocimiento siempre requiere nuevas conexiones.

Un viaje por los caminos y puentes de las comarcas occidentales de Cantabria: Costa Occidental, Saja-Nansa y Liébana Luis Villegas Cabredo, 2024-12-12 Los caminos y puentes son esenciales para la ocupación y transformación del territorio y el desarrollo de los pueblos, al tiempo que son hitos de nuestros paisajes, historia, patrimonio construido y memoria personal. Este libro narra la evolución de estas infraestructuras de transporte terrestre a lo largo de la historia de Cantabria, desde los caminos antiguos hasta las actuales autovías. Está escrito pensando en un «viajero» que va recorriendo las comarcas occidentales de esta región y a medida que supera las dificultades que la ruta lleva consigo (puertos de montaña, paso de ríos y demás), se va encontrando las referencias del camino (sus pueblos, iglesias, torres, casonas, puentes y otros).

Topics and Trends in Current Statistics Education Research Gail Burrill,Dani Ben-Zvi,2018-12-29 This book focuses on international research in statistics education, providing a solid understanding of the challenges in learning statistics. It presents the teaching and learning of statistics in various contexts, including designed settings for young children, students in formal schooling, tertiary level students, and teacher professional development. The book describes research on what to teach and platforms for delivering content (curriculum), strategies on how to teach for deep understanding, and includes several chapters on developing conceptual understanding (pedagogy and technology), teacher knowledge and beliefs, and the challenges teachers and students face when they solve statistical problems (reasoning and thinking). This new research in the field offers critical insights for college instructors, classroom teachers, curriculum designers, researchers in mathematics and statistics education as well as policy makers and newcomers to the field of statistics education. Statistics has become one of the key areas of study in the modern world of information and big data. The dramatic increase in demand for learning statistics in all disciplines is accompanied by tremendous growth in research in statistics education. Increasingly, countries are teaching more quantitative reasoning and statistics at lower and lower grade levels within mathematics, science and across many content areas. Research has revealed the many challenges in helping learners develop statistical literacy, reasoning, and thinking, and new curricula and technology tools show promise in facilitating the achievement of these desired outcomes.
