

Venus Of Dolni Vestonice

W. P. T. James

Dolní Vestonice-Pavlov Jirí A. Svoboda, 2020-09-25 Perhaps the oldest modern human settlement in Europe, the archaeological site at Dolní Věstonice-Pavlov, located in the rolling, forested plains just north of the Danube River, has yielded a treasure trove of Ice Age artifacts since its first excavation in 1924. The earliest people who lived here some 30,000 years ago produced tools crafted from stone and bone and carved elaborate animal and human figurines fashioned of mammoth ivory and sculptures of fired clay, including the famous “Venus of Dolní Věstonice,” one of the oldest known ceramic artifacts in the world. Interestingly, novelist Jean M. Auel took much of the inspiration for her popular novel, *Clan of the Cave Bear*, from the discoveries at Dolní Věstonice-Pavlov. Richly illustrated throughout, including beautiful color renderings of scenes from Paleolithic life suggested by Svoboda’s research, this first English translation of *Dolní Věstonice-Pavlov: Explaining Paleolithic Settlements in Central Europe* is sure to provide not only vital information for scholars, researchers, and students but also insightful and thought-provoking background for interested general readers.

A Feast of Families Virginia Stem Owens, 2008-07-11 What do you want for your children? Faced with that question, Virginia Owens searches deeply for an honest answer. Faith, she decides, is what she wants to pass on. But how do we transmit our faith to the next generation in a world that has lost its regard for the family? Owens shows in vivid detail how we can live in all the ups and downs of family life and still impart our faith as a true fulfillment, not merely as a cultural appendage. In a beautiful, sensitive, and heartwarming manner, Virginia Stem Owens evokes many memories as she recalls the joys and sorrows of her own large and sometimes difficult and eccentric Texas clan, as well as the experiences of others, from Russian novelists to Texas bank robbers. *A Feast of Families* is a rich and rewarding repast.

Clay Suzanne Staubach, 2013-09-03 More than a third of the houses in the world are made of clay. Clay vessels were instrumental in the invention of cooking, wine and beer making, and international trade. Our toilets are made of clay. The first spark plugs were thrown on the potter's wheel. Clay has played a vital role in the health and beauty fields. Indeed, this humble material was key to many advances in civilization, including the development of agriculture and the invention of baking, architecture, religion, and even the space program. In *Clay*, Suzanne Staubach takes a lively look at the startling history of the mud beneath our feet. Told with verve and erudition, this story will ensure you won't see the world around you

in quite the same way after reading the book.

History's Mysteries Brian Haughton,2010-04-20 History's Mysteries is an absorbing and meticulously researched exploration of the archaeology, history, and mysteries of 35 ancient places worldwide. Wakan Tanka John Bennett,2021-02-25 Where did we come from? Why are we here? Is there a god? In our modern world, many people yearn for answers to these most fundamental of life's questions, having become disillusioned with trite explanations and troubled by narratives that deny their intuitive spirituality. Beginning with some of our most ancient ancestors, Wakan Tanka traces the evolution of humanity through the ages. Citing paleontological and archaeological discoveries, along with recent genetic evidence, it recounts how mankind evolved from the earliest mammals into anatomically and behaviourally modern humans. Wakan Tanka describes how human culture and spirituality evolved in concert with anatomy. Showing how humankind has, since very ancient times, had an instinctual, moral sense, it discusses how our spirituality has given us an appreciation for both the aesthetic and divine aspects of life as reflected in our cultures and artistic endeavours. By comparing philosophical and religious views of creation with modern scientific theory, Wakan Tanka reaches the conclusion that, rather than conflicting, these views are remarkably similar and equally valid ways of describing the same reality. Indeed, our scientific knowledge and spiritual beliefs can be harmonized, providing us with a deeper understanding of ourselves, of creation and of life's purpose.

The Skull SarahKali Tamas DelaCroix,Salem Blackthorn,2024-01-03 Carlyle Alexander, a forensic artist suffering from psychosis, falls in love with the image of a young woman who was a victim to a serial killer. Through reconstructing the

visage on a skull that was recovered, Carlyle falls in love with the victim who he believes he shares a unique and supernatural bond. Carlyle vows to avenge his beloved by pursuing the perpetrator and bestowing 'justice' when the Florida Justice System of Zephyrhills fails to make their case against him. As one maniac pursues another the question of what happens when two separate psychoses collide, each believing that the other is the villain in their own delusion. With both believing that they were called to kill for a higher purpose, they relentlessly hunt one another to try and complete the mission their delirium had set forth. As Carlyle's mental state deteriorates, the former artist battles his own manic episodes and insurmountable personal demons, leading the reader to both empathize yet detest his decisions. While the serial killer continues to prey upon women in the area, Carlyle befriends many young women connected to the case who will inevitably be twisted into his 'accomplices,' who aid him in his tireless pursuit to avenge his beloved with the ultimate goal of returning her to life, demonstrating the extent to which his mental state had depreciated. The story delves into topics such as feminism, matriarchal religions, aesthetics, drug use, cults, necrophilia, and untreated mental illness. The Skull, the first book in the trilogy, seemingly concludes with the serial killer being slain and Carlyle apparently having committed suicide. The format of the book is a letter by Carlyle which acts as his manifesto, diary, confession, and ultimately his suicide letter addressed to the major detective on the case of the serial killer who becomes increasingly more suspicious of Carlyle, even believing that he is the serial killer himself.

Education and Technology David W. Kritt, Lucien T. Winegar, 2007-01-01 There are numerous publications about education and technology. What is missing is a balanced appraisal of the values and cognitive skills technology promotes and those it devalues. This is important for education because the way we teach influences how children think, and it is of more general importance for the evolution of society. If we wait until these issues are definitively resolved and have noticeable societal effects, it will inevitably be too late. Hence the need for informed debate now.

Before the Pharaohs Edward F. Malkowski, 2010-04-12 Presents conclusive evidence that ancient Egypt was originally the remnant of an earlier, highly sophisticated civilization • Supports earlier speculations based on myth and esoteric sources with scientific proof from the fields of genetics, engineering, and geology • Provides further proof of the connection between the Mayans and ancient Egyptians • Links the mystery of Cro-Magnon man to the rise and fall of this ancient civilization In the late nineteenth century, French explorer Augustus Le Plongeon, after years of research in Mexico's Yucatán Peninsula, concluded that the Mayan and Egyptian civilizations were related--as remnants of a once greater and highly sophisticated culture. The discoveries of modern researchers over the last two decades now support this once derided speculation with evidence revealing that the Sphinx is thousands of years older than Egyptologists have claimed, that the pyramids were not tombs but geomechanical power plants, and that the megaliths of the Nabta Playa reveal complex astronomical star maps that existed 4,000 years before conventional historians deemed such knowledge possible. Much of the past support for

prehistoric civilization has relied on esoteric traditions and mythic narrative. Using hard scientific evidence from the fields of archaeology, genetics, engineering, and geology, as well as sacred and religious texts, Malkowski shows that these mythic narratives are based on actual events and that a highly sophisticated civilization did once exist prior to those of Egypt and Sumer. Tying its cataclysmic fall to the mysterious disappearance of Cro-Magnon culture, Before the Pharaohs offers a compelling new view of humanity's past.

Women In Human Evolution Lori Hager,2005-08-18 This volume, the first of it's kind, examines the role of women paleontologists and archaeologists in a field traditionally dominated by men. Women researchers in this field, have questioned many of the assumptions and developmental scenarios advanced by male scientists. As a result of such efforts, women have forged a more central role in models of human development and have radically altered the way in which human evolution is perceived. This history of the feminist critique of science, is of profound significance and will be of interest to all those who work in the fields of anthropology, archaeology, paleontology, and human biology.
