Twenty Thousand Leagues Under the Sea Jules Verne, 2017-04-27 'It is a ripping yarn, but it is also an eerie tale of isolation and madness ... with a compellingly Byronic central character' Guardian Combining thrilling adventure with scientific facts and a wonder at the natural world, *Twenty Thousand Leagues Under the Sea* is Jules Verne's most enduringly popular novel. It begins when a vast black object is spotted menacing the oceans, causing panic over the world. When Professor Aronnax joins an expedition to hunt down the creature, he and his two companions discover it is a giant submarine, the Nautilus. Captured and held prisoner on board by its captain, Nemo - unpredictable, enigmatic, exiled from humanity - they have no choice but to travel the terrifying underwater depths with him. Translated with an Introduction and Notes by David Coward

**The Complete Twenty Thousand Leagues Under the Sea** Jules Verne, 1991 When an unidentified monster threatens international shipping, French oceanographer Pierre Aronnax and his unflappable assistant Conseil join an expedition organized by the US Navy to hunt down and destroy the menace. After months of fruitless searching, they finally grapple with their quarry, but Aronnax, Conseil, and the brash Canadian harpooner Ned Land are thrown overboard in the attack, only to find that the monster is actually a futuristic submarine, the Nautilus, commanded by a shadowy, mystical, preternaturally imposing man who calls himself Captain Nemo. Thus begins a journey of 20,000 leagues - nearly 50,000 miles - that will take Captain Nemo, his crew, and these three adventurers on a journey of discovery through undersea forests, coral graveyards, miles-deep trenches, and even the sunken ruins of Atlantis. Jules Verne's novel of undersea exploration has been captivating readers ever since its first publication in 1870.

**Twenty Thousand Leagues Under the Sea** Jules Verne, 2000 The man who invented the future, Verne created the prototype for modern science fiction. **Twenty Thousand Leagues Under the Sea** Jules Verne,2014 *Twenty Thousand Leagues Under the Sea* (French: *Vingt mille lieues sous les mers*) is a classic science fiction novel by French writer Jules Verne published in 1870. It tells the story of Captain Nemo and his submarine Nautilus, as seen from the perspective of Professor Pierre Aronnax. The title refers to the distance traveled while under the sea and not to a depth, as 20,000 leagues is over six times the diameter of Earth. The greatest depth mentioned in the book is four leagues. In the book, a league is equivalent to four kilometres. A literal translation of the French title would end in the plural seas, thus implying the seven seas through which the characters of the novel travel; however, the early English translations of the title used sea, meaning the ocean in general.
